GARDEN BOOK

LONDON
CANADA

" They Come Up "

Dominion Garden Book

- 1922 -

FROM a small beginning in 1864, this business has developed into one of the largest and most complete seed houses in Canada.

This annual contains a complete list of Seeds, Bulbs, Plants, Poultry and Bee Supplies.

Dominion Seeds have established a Dominion-wide reputation for their purity, high germinating tests and lastly wonderful productive qualities.

Dominion Seeds dominate for real reasons. **Dominion Seeds** yield more because of their superior quality.

The great need of our Canada is more production in vegetables and fruits, home gardens. A good garden of vegetables and flowers insures health and happiness, and lessens the cost of living, in fact makes a home a real quantity.

The quality of the seeds a gardener uses means everything to the successful failure of the effort to produce a crop.

Dominion Seeds are tried and tested at our trial farm, **Glen Maple Gardens**.

We specialize in Seeds, our training has been along this path of real acquaintance with Seed Production, and actual growing of vegetables, flowers and nursery stock.

We are filled with confidence that comes with knowledge that "We Know" Seeds. Our customers will reap the benefit from this real first-hand knowledge of seeds and conditions of growth.

"Truth in Seeds" is our motto.

Buy Dominion Seeds—Try Dominion Service.

Dominion Seeds won't stay planted—"they come up."

General Directions to Customers

We respectfully call attention to the following directions which will, if followed, assist us very much in the filling of orders, and thus be of benefit to customers themselves.

SEND YOUR ORDERS EARLY—By so doing you are sure of getting your order filled promptly and in full. Our rush season commences about March 1st, when it is impossible to fill orders promptly; hence orders received after this date are apt to be delayed. We endeavor to fill such orders in rotation as received.

Owing to unfavorable conditions some varieties of seeds will be short this season. In such cases we will substitute to the best of our judgment unless otherwise instructed.

SEND CASH WITH ORDER—Remittances should be made by Post Office Order, Postal Note, Express Money Order, Bank Draft, or Registered Letter. Money sent in any of these ways will ensure the minimum risk. Small amounts may be sent in stamps.

NAME AND ADDRESS—Be sure and write your name and Post Office address plainly (giving street and number, where necessary), as we very often get letters without signature, and others without the Post Office. In such cases we are, of course, unable to give them proper attention.

LADIES should always prefix their names with Miss or Mrs., as the case may be.

BY EXPRESS OR FREIGHT—Where prices in this catalogue are quoted "By Express or Freight," customers pay these charges at their end.

CASH WITH ORDER—It is necessary that each order be accompanied with the cash. We send no goods C.O.D. (collect on delivery) nor do we give credit. Send cash with order, it saves much confusion and delay.

SENDING PLANTS—All orders for plants and bulbs which are liable to damage from frost, will be held till about the 1st of April, when we begin shipping, and continue as fast as the weather will permit until all are sent out; should the seeds be sent and not the plants and bulbs, do not be impatient, as they are held for your protection against loss and will be forwarded when the weather permits.

Be Sure and Write Your Name, Post Office and Express Office Plainly—Every season we get a number of orders without the name of the sender or Post Office, and the post mark on envelope is often too obscure to be made out. Should parcels by mail not arrive safely, or shipments by express or freight reach you in an unsatisfactory condition, please write us promptly, stating where the trouble lies, when we will look into the matter fully.

NEW AND CHOICE VEGETABLE SEEDS

BLACK PRINCE BEET

Dark Blood Red.

Superior Flavor.

Tender and Crisp.

Cooks Sweet.

Enormous Cropper

Without question the finest long beet grown for Fall and Winter use. It is of a deep red color, almost black; rich excellent flavor; is an enormous cropper, and keeps solid and fresh throughout the long winter. Cooks sweet, tender and crisp; is very desirable for pickles. It must not be compared with the Common Long Smooth Blood offered by many seedsmen at a less price, as its high grade was attained by long years of care and selection. The roots are thick shouldered, grow largely under ground, are, when mature, about 2 inches in diameter and 10 inches long. They are ready for the table in about 60 days. They are very prolific. Foliage, dark crimson. **Pkt. 10c, oz. 25c, 2 oz. 45c, ¼ lb. 80c.**

**DOMINION SEEDS WON'T
STAY PLANTED
"THEY COME UP"**

CARROTS "Golden Rod"

**Handsome Meltingly Tender and Sweet. The Finest
Early Table Variety Grown.**

This Carrot, introduced by us, will prove one of the most universally popular varieties ever sent out. People who never liked carrots before are delighted with the melting tenderness and sweet mild flavor.

It is a half-long cylindrical Carrot, blunt pointed with a small tap-root and small top. They run very uniform in shape and size, 6 to 7 inches long by 1½ inches through; clean skinned, smooth, easily pulled and keep well. The flesh is of fine texture entirely devoid of stringiness, coarseness, fine woody heart or core. The color of the flesh is the rich red-orange so attractive when served. "Golden Rod" excels all other half-long Carrots in earliness without being inferior to them in productiveness. (See cut). **Pkt. 10c, oz. 30c, 2 oz. 50c, ¼ lb. 90c.**

TOMATO---"John Baer"

"JOHN BAER" Tomato produces large, beautiful, solid tomatoes. Produces an enormous crop of tomatoes, 50 to 100 fruit to each plant. Ripens evenly, right up to the stem. No scalds, no blight, no cracked, no wrinkled, no one-sided, uneven fruit. When dead ripe "John Baer" Tomato will not burst. Has a wonderful glistening bright red color. Has a mild, deliciously sweet flavor. In shape and form exactly like photograph above. Is almost seedless, a marvelous stem setter, often ten fruit in first cluster, solid and meaty. Has just enough foliage—will stand plenty of manuring without going to vine. Set plants $2\frac{1}{2}$ x 3 feet. The most perfect tomato ever grown—was saved by the originator, who personally selected and picked every tomato, selecting only the most beautiful perfect fruit. [This

tomato is the result of fifteen Generations of Improvement and Selection for earliness, quality, shape, fruit, color and shipping quality. Being such a tremendous yielder, can be gathered in one-third the time of any other tomato. Pkt. 15c, $\frac{1}{2}$ oz. 40c, oz. 75c, 2 ozs. \$1.35, $\frac{1}{4}$ lb. \$2.50.

MUSK MELON "Dominion Gold"

IT'S A LITTLE BETTER THAN THE REST

[A]Paragon of Merit in size, shape, netting, appearance, aroma, flavor, depth of flesh, smallness of seed cavity, cropping ability and shipping quality. It leaves nothing to be desired.

This new melon, originated at our Glen Maple Gardens, and offered for the first time two years ago. It will surely prove a revelation in cantaloupes. Its sweet, rich, thick, golden flesh, uniform and handsome appearance as shown in our photograph, are unsurpassed by any other early, large or medium-sized melons. It is a fine shipper, and its blight and rust-resisting qualities are really wonderful. Pkt. 15c $\frac{1}{2}$ oz. 35c, oz. 60c.

Dominion Gold.

SUMMER ASPARAGUS

A Vegetable Novelty
Meltingly Tender

TASTES LIKE MORE

A delightful addition to summer-time menu. Grows easily in the open ground after the habit of Bush Marrow, fruits profusely from early summer until frost.

Cook until tender without peeling, cut lengthwise and serve with butter, pepper and salt, or a sauce such as you would use for asparagus. The taste tells the rest.

Pick when six or seven inches long. They are best at this time.

This new summer vegetable was grown with great success by Capt. Smith, South London, and pronounced by him and all his friends a great success. Pkt. 15c, oz. 40c.

New Sweet Corn

"Dominion Dawn"

The new sweet corn "**Dominion Dawn**," that you have been looking for, combining the luscious sweetness of the long time favorite "Golden Bantam," "the sweetest corn that grows" with the Early Evergreen. We confidently recommend this corn to you knowing you will be well pleased, in fact delighted with it; rich yellow in color and twice the size ear the well-known Golden Bantam has. As early as Bantam and will yield at least one-third more. Try "**Dominion Dawn**" this season and you will never willingly be without it in your garden. Pkt. 10c, $\frac{1}{4}$ lb. 25c, $\frac{1}{2}$ lb. 40c, 1 lb. 60c, Postpaid.

If you grow vegetables or flowers for market send for our Market Gardeners' and Florists' Price List.

Garden Huckleberry

A HEAVY-YIELDING GARDEN BERRY

This fruit can be grown from seed the first year and produces berries about as large as an average size gooseberry. The color is jet black and, when cooked, is as palatable, and can scarcely be discerned in taste from the real huckleberry. Plant seed in a box or pan in early spring, and when danger of frost is over, plant out 2x4 feet. Cultivate same as tomatoes. **Do not eat green.**

Berries make better pies, jelly and sauce than the wild huckleberries. For winter use, take up the vines just before frost, store away where they will not freeze, and delicious fresh fruit can be picked all winter, as they will keep nice for months. A most promising new vegetable in climates where ordinary small fruits do not do well. Pkt. 15c. (Seed very small).

Directions for Cooking Garden Huckleberry

To one pint of fruit, add two cups sugar, one quart of water and season with cloves to taste. Be sure and pound into a pulp before boiling.

Garden Huckleberry

SYMMES

Blue Hubbard Squash

Named in honor of Mr. S. S. Symmes, a well-known market gardener. Mr. Symmes obtained it, by careful selection from the Hubbard. Thick-meated, fine grained, dry and very sweet; close your eyes while eating and you would think you were eating cake. It remains longer without showing signs of mould than any Squash handled. This is very valuable where Squash has to be cut for family use. When harvested Symmes' Blue Hubbard outyielded everything—but only about three-quarters of a crop. Pkt. 10c, $\frac{1}{2}$ oz. 20c, oz. 35c, 2 ozs. 65c.

NEW POLE BEAN

"Green Mountain"

Late in the spring of 1904, an old resident of the city, who takes a great pride in his private garden, brought into our office for our inspection a small basket full of green pods of a bean which he has had in his possession for a number of years. Having only a small garden, he at first only grew what he considered would do for his own private use, but having in later years introduced them into several of our principal hotels, he had to increase his planting, but still only supplied a limited number of patrons, getting any price asked for them. We secured a small quantity from our friend, which we offered to our customers in 1907-8, but the past few seasons being very unfavorable we were obliged to drop it from our list but we are now pleased to say that our crop was so exceptionally good this year that we are in a position to offer it in larger quantities than by the packet, which we were never able to do before.

Description—The vine is a rapid grower, covered with luxuriant, broad, dark green leaves which denote unusual vigor and healthy constitution, enabling it to withstand severe changes.

The beautiful green pods are from eight to ten inches long, thick meated, brittle, and stringless, never showing a bean or becoming tough until quite old.

The vines are literally covered with pods and a few vines will keep an ordinary family in green beans all season.

We are selling more pole beans every year, and we sell kinds that are really a success and will do well anywhere. Select rich, warm soil, and plant after the ground gets warm, say just after corn planting, in hills three feet apart each way. Put in several seeds, and when they come up, thin out to three in a hill. When they begin to vine, set your poles and tie them together at the top in fours. "Wigwam shape," so they won't blow down. We had them this way in our Test Gardens this summer and the under side of those arches were hung with masses of pods. You could stand under one of them and pick a market basket full.

Pkt. 15c, 2 pkts. 25c, ¼ lb. 40c.

Note.—Positively not more than ¼ lb. sold to any one purchaser.

New Pole Beans—"Green Mountain."

ENGLISH BROAD BEANS

TAYLOR'S IMPROVED BROAD WINDSOR

This class is very hardy and will stand frost. They should be planted as early as possible after the ground is open, in drills two feet apart and four inches apart in the drills. A strong, heavy soil suits them best.

A splendid, most robust and wonderfully prolific variety, which appears to miss mildew and the attacks of the bean aphid better than any other broad bean now in cultivation. The pods, which are produced in the utmost profusion, are very large and handsome, each containing from six to eight large, thick and very fleshy beans of the most delicious flavor and of the deepest and most attractive green color when cooked. It is undoubtedly the most valuable variety yet offered. Pkt. 10c, ¼ lb. 25c, lb. 75c, Postpaid.

RADISH

All Season's Mixture

Contains all shades and shapes—red, white, pink and variegated; round, half-long and long, in great variety. It is "all the go" for small gardens where space is limited and you want to make a garden and be done with it. One sowing does for the whole season, as they become ready for the table early, medium and late. You always have some that are just right—sweet, juicy, delicious, crisp. You will be surprised and delighted with our popular radish mixture. Your garden this season will not be complete without a bed of these crisp little table delicacies. Pkt. 10c, oz. 25c, 2 ozs. 45c, ¼ lb. 80c.

All Seasons

IF INTERESTED IN FRUITS SEE OUR LIST IN THIS CATALOGUE

WEBER'S DWARF WAX BEAN

Those who consider Wardwell's Kidney Wax "the only market gardener's bean" should try this new sort alongside. Comparative trials with us have proven that our new Wax Bean, "Weber's Wax," is not only more prolific—bearing almost two pods to Wardwell's one—but the beans are also longer, handsome, entirely stringless and of superior quality; plants are of robust, erect growth, bearing the loads of beautiful pods well above the ground. They are healthy, blight-resisting and continue to bear a long time. The pods are flattish-oval, thick and fleshy. They average six to seven inches in length, are borne in large clusters and make the finest show on the market on account of their rich yellow-lemon color and straight handsome shape. In quality this bean is unsurpassed. Brittle and stringless at all stages of development; meaty and of fine flavor. Matures with Wardwell's, but will outyield this old standby every time. Pkt. 10c, $\frac{1}{4}$ lb. 20c, $\frac{1}{2}$ lb. 30c, lb. 50c, Postpaid.

PEAS MATCHLESS WONDER

A New Extra Wrinkled Pea, as Early as the Alaska, as Sweet as the Old Favorite, Champion of England

Hitherto all the extremely early peas have been smooth, round seeded sorts, like the Alaska. First and Best, etc.; palatable enough when the pods are picked in a half-matured state, but hardening quickly on the vine, and not at all satisfactory to those who plant for their own use. Many years ago Henry Ward Beecher said: "A Pea without sweetness is like a sweet potato without the sweet."

The great preacher was right. A pea without sweetness is not fit to put upon the table, and it is well to bear in mind that the smooth pea is never a very sweet pea.

THE MATCHLESS WONDER is as early as the Alaska, or any other Pea, and as sweet as the Champion of England, or any other pea.

The vine, which is very luxuriant and beautiful, grows from 15 inches to 2 feet in height, according to soil and season. It yields abundantly of good-sized pods (larger than Alaska or First and Best), which, while maturing uniformly, do not harden or grow leathery quickly.

It is a grand pea for gardeners to build up a reputation. It is a most satisfactory pea for private gardens.

Stock is very limited this year, and we cannot at present offer it in larger quantities than ten pounds to a purchaser.

Pkt. 10c, $\frac{1}{4}$ lb. 20c, $\frac{1}{2}$ lb. 35c, lb. 60c, Postpaid. By Express or freight at purchaser's expenses, 10 lbs. \$4.00.

LEMON CUCUMBER

A New and Entirely Distinct Type,
Tender, Sweet, Crisp.

Many of the seedsmen of Europe who have tested its good qualities are offering it. If you are fond of cucumbers and want one that will almost melt in the mouth, try our new lemon.

Our illustration is a good representation of the fruits. They are nearly round with the yellow and green markings and smooth skin of the lemon, while the flesh is exceedingly tender and crisp, with a sweet flavor surpassing all other cucumbers. For slicing they excel; for pickling, ripe or green, one of the best and most attractive on account of their quaint form. They can also be used for Mangoes, the same as small melons. They may be served green or just as they are turning yellow. Size from two and a half to three inches in diameter; just right for one portion. Pkt. 10c, $\frac{1}{2}$ oz. 30c, oz. 50c.

Ground Cherry

Copenhagen Market

POPPING CORN

Japanese Hulless

A great many people like to grow Pop-corn, but there is so much difference in the popping qualities of the various varieties that one hesitates to offer anything in the line unless it has real merit. In this variety we have a dwarf growing corn, a heavy yielder of attractive ears, peculiar in form, but the grain is very similar to the best strain of White Rice Pop-Corn. The ears are short and thick, and run very uniform. Of a pearly white and the grain is of excellent popping quality and flavor after being popped. In popping the hull disappears entirely and is not a nuisance to one eating the Corn, as is the case with most other sorts. It is a splendid thing. **Pkt. 10c, ¼ lb. 20c, lb. 60c, Postpaid.**

PIMENTO OR PERFECTION PEPPER

This pepper is of a pimento type, and has been brought up to a degree which we have not found in any other strain or variety that we have ever seen or grown. We have tested about all the varieties now in cultivation. Results have shown that there is not a single variety that we have tested that is in any respect equal to the "Perfection." It is one of the best for the Home garden, both green or ripe. It is so smooth and uniform in shape that the skins can be easily slipped off after burning over a hot fire a few seconds or by boiling a few minutes in hot water. It can also be pared like an apple by using a sharp knife the green peppers can be pared best in this way. The hull or meat is from two to three times as thick as that of the "Bird" types and yields about a half more edible product to the same measurement. The quality is very sweet and delicious and entirely free from pungency. In color, when ripe, it is a beautiful scarlet red. It is very productive, yielding heavy crops until cut off by frosts. In consequence of the many superior and valuable qualities of this pepper it will be much sought and grown for sweet pickles. **Pkt. 15c, ¼ oz. 40c, oz. \$1.25.**

GROUND CHERRY

Yellow Improved Another year adds to our faith in this popular little fruit, and as a fruit for the table it cannot be excelled. It is a great improvement on the wild ground cherry. They grow well on almost any dry soil are easier raised than the tomato and are prolific bearers. For sauce they are excellent and for pies not one can equal them for taste and flavor. They are delicious as preserves; and when dried in sugar are much better than raisins for cakes and puddings. No one after raising them once, will ever make a garden again without devoting a small portion at least to the ground cherry. **Pkt. 10c.** (Seed very small).

If all the ground cherries are not gathered before frost, pull up the vine; hang it in a frost-proof cellar for winter use. Full directions for preserving, etc., sent with each purchase.

CABBAGE

Copenhagen Market This superb new Cabbage created quite a sensation at the farm of the originator. It is undoubtedly without a rival as the finest large round-headed early cabbage in cultivation. The type is thoroughly fixed, the heads maturing all at the same time—this being a great consideration to market gardeners, entailing less labor in harvesting the crop and allows the ground to be cleared at the first cutting. The heads average about ten pounds each in weight, are very solid, with small core, and of fine quality. It matures as early as Charleston Wakefield, and will give a much heavier yield per acre than that popular variety. The plant is short-stemmed; the heads being produced almost on the ground level. The leaves are light green, rather small, saucer-shaped, and always tightly folded. The plants, therefore, can be set closer than is usual with varieties of similar size. Stock of seed (all grown in Denmark) is very limited. **Per pkt. 10c, ½ oz. 45c, oz. 75c, 2 ozs. \$1.40.**

Golden Cluster Wax Pole Bean.

PERFECTION DRUMHEAD SAVOY CABBAGE

THE BEST FLAVORED OF ALL CABBAGES

This is the hardest-heading and best all-round Savoy. Plants are of strong growth, having only a moderate number of outer leaves growing closely about the large, solid, round heads. Heads beautifully blanced and of the finest flavor.

This Savoy Cabbage differs from all others in the peculiar crumpled character of the leaves. This is caused by a more rapid growth of the parts of the leaf between the veins, and as this is the tenderest part of the leaf, the reason for its good quality is apparent. This characteristic is maintained even in the younger leaves.

Although excellent at any season of its growth, the Savoy Cabbage is never at its best until touched by frost, and for this reason should be used only as a fall or early winter crop. In the latitude of London the best results are obtained from crops raised from seed sown in June.

Pkt. 10c, $\frac{1}{2}$ oz. 50c, oz. 90c, 2 ozs. \$1.75.

GOLDEN CLUSTER WAX POLE BEAN

Golden Yellow Pods. Brittle and Stringless, Pods 8 to 9 inches long. Beans white. Splendid for home garden. Bears from middle of June until frost.

The best and most productive of the wax-podded pole beans. It should be largely cultivated, and of excellent quality if used either as snap or green and dried shelled beans. The vines are of a large growth and produce in abundance clusters of 3 to 6 yellow pods, averaging about 8 to 9 inches in length. They are very attractive and make a fine variety for exhibition purposes. The pods are flat, straight, very broad, thick and fleshy, entirely stringless, and have a very smooth surface. The dry seed is medium sized, oval and pure white. A splendid variety for the home garden and for market. Pkt. 10c, $\frac{1}{4}$ lb. 25c, $\frac{1}{2}$ lb. 45c, lb. 85c, Postpaid.

CHILIAN JUMBO SQUASH

WEIGHT 200 POUNDS OR MORE—VERY PRODUCTIVE—
IMMENSELY PROFITABLE

Attains an enormous size, often reaching a weight of 200 pounds, and not infrequently weighs 300 pounds, and even more. Despite its size, its flesh is rich and fine-flavored. It is especially desirable for stock feeding and exhibition purposes. We deem it the most profitable crop to grow. They can be used almost entirely for feeding cows and swine. For feeding the cows it is best to cut them up, mixing with ground feed. As they yield an acre will run from 8 to 15 tons, it will produce a very cheap and nutritious feed. In feeding to swine, all that is necessary is to break the squashes open and they will help themselves.

NOTE—Full instructions for growing large squashes and Pumpkins with each order for one package or more.

Pkt. 15c, oz. 35c, 2 ozs. 60c, $\frac{1}{4}$ lb. \$1.00.

BIG BOSTON LETTUCE

In the heart of a section noted for lettuce growing of the highest quality, this Special Strain of Big Boston, was pronounced by expert lettuce growers the best they had ever seen. Every plant produced was a perfect head. There were no spots or blanks; every space held a solid, finely-formed head of Big Boston. All ready to cut at one time.

Big Boston is one of the best varieties for either the market garden or the home garden. The heads are large and blanced to a creamy white when the outer leaves are removed, very fine grained and packed as close as cabbage. Plants are sure headers, and stand a long time before seeding. When the plants are thinned to 10 to 12 inches apart the heads grow to a large size, measuring from 10 to 12 inches in diameter. Big Boston head up under cold weather conditions better than any other.

We supply many of the largest growers with this Special Strain. Pkt. 10c, $\frac{1}{2}$ oz. 20c, oz. 35c, 2 ozs. 60c.

Big Boston Lettuce.

BRIGHTEST CRIMSON GLOBE ONION

Our attention was first called to Brightest Crimson Globe Onion two years ago by one of our market gardener friends who had been growing and improving this onion for the past 20 years. We have been watching it on our trial grounds for four years, where it has done so well it gives us pleasure to offer it to our customers this season as the best red variety.

Brightest Crimson Globe is a very hardy, vigorous grower, producing perfect globe-shaped onions of a bright crimson color. Its long keeping qualities make it an A No. 1 shipping variety. The white flesh is fine grained and of mild flavor. Our stock is limited so we advise early orders. Pkt. 15c, $\frac{1}{2}$ oz. 35c, oz. 60c, 2 ozs. \$1.10, $\frac{1}{4}$ lb. \$2.00.

BRIGHTEST CRIMSON
GLOBE

THE GREATEST
NOVELTY
IN YEARS
AND THE KING OF ALL
RED GLOBE ONIONS

New Golden Sweet Water-Melon

GOLDEN YELLOW FLESHED, SWEET CRISP AND DELICIOUS

The most important novelty in the way of water-melon that has been introduced in years. A new melon with yellow flesh that fairly melts in the mouth, and which for its fine sugary, juicy and delicious flavor cannot be surpassed by any red flesh melon on the market; medium size, and a perfect sort for home use. The rind is thin but hard and the color of flesh a golden yellow, solid, crisp, smooth, of delightful aroma, and with but few seeds. For table use its contrast with the red flesh varieties will create a heavy demand for it; and this, with its tempting, melting flavor, will make it one of the most popular water-melons on the market for the home gardener. Owing to it being a shy seeder, our stock is limited this year, so advise prompt orders. Pkt. 15c, $\frac{1}{2}$ oz. 30c, oz. 50c, 2 ozs. 90c.

Water- Melon National

The National is a water-melon of medium to large size and of high quality. In shape it is oblong. The outside color is pale green, with darker green markings. The flesh is brilliant red in color, and remarkably solid. The flavor is delicious, and the flesh entirely stringless. The rind, though thin, is tough, insuring good shipping qualities. National produces large melons, often weighing 40 pounds and over. Its handsome appearance and luscious flavor make it a rapid seller, and for the home garden it has no equal. Pkt. 10c, oz. 35c, 2 ozs. 60c, $\frac{1}{4}$ lb. \$1.00.

OF THIS VALUABLE VARIETY
CAN ONLY BE HAD
FROM US

Earliest Ripe Fodder Corn

THE MOST PERFECT, EARLIEST RICH FODDER CORN IN EXISTENCE.

Something Grand!

EARLIEST
RIPE FODDER CORN.

This Corn will ripen ears inside sixty days after planting, and usually from two to three ears on the stalk. The foliage is probably 6 feet high, very leafy and bushy, and contains a tremendous amount of nutritious matter. Of course, this is not as prolific as our Imp. Leaning Fodder Corn, but it has the advantage over any and every other Fodder Corn in the world to-day by its being thirty days earlier. The farmer can easily figure out the great profit in having a Fodder Corn extremely early, having it come at the time when pasturage is short, and he can then feed this rich, luxuriant Earliest Ripe Fodder Corn. You have it in excellent condition to feed the latter part of July or first of August. Fodder at this time is always in demand. If you are raising hogs or cattle, this Corn, above all other Corn, will return to you a tremendous profit on account of its extreme earliness, large and many ears and healthy, nutritious qualities.

Another thing, if this Corn is required for winter fodder, it can be planted early; it can be cut months ahead of frost, and can be stored away in first-class shape, and will keep all winter. This can be done before your busy fall work crowds you. We believe Earliest Ripe Fodder Corn worthy of a thorough, extensive and impartial trial on every farm, and we stake our reputation that there is nothing that will pay the possessor of hogs and cattle more handsomely than to plant generously of it.

The Most Magnificent Testimonials Imaginable—We could fill several pages with magnificent testimonials from customers to whom we sent a small quantity of this Corn for trial, asking them to give it an impartial test, and each and every letter received brings forth the most intense endorsements of the Corn, claiming that in earliness, in yield and quality and nutritious matter it is far ahead of anything and everything that they have ever tried, and that it had been the means of making money for them, as it ripened so very early. Sow in drills 30 inches apart, using half-bushel to acre. Pk., \$1.00; Half-Bush., \$1.75; Bush., \$3.25. Bags free.

STANDARD INOCULATING BACTERIA

The use of inoculants has been thoroughly demonstrated to be beneficial and profitable. Their use is rapidly becoming more general among practical and progressive planters.

Legumes are the only plants that can assimilate nitrogen from the air as part of their food, due to the presence of bacteria on their roots. Why not take advantage of this feature and encourage them to build up, in the soil, the supply of this most important fertilizing element?

EASY TO APPLY—JUST MOISTEN THE SEEDS BEFORE SOWING—COMPLETE DIRECTIONS IN EVERY PACKAGE

Standard Bacteria is scientifically grown direct from the nodules, by bacteriologists, who have made this their life work. The Laboratories are fitted up with the modern and best equipment. Each bottle is examined microscopically before shipment. The bacteria is inoculated in improved extra sensitive media, enough food being included to feed the germs. Rubber corks are used, with glass air tubes to supply air to the bacteria and specially prepared cotton is packed in the tubes to filter out intruding mould and other foreign germs. Amber bottles are used to exclude direct light.

Root, Showing Nodules

INOCULATE—INCREASE YOUR CROPS—IMPROVE YOUR SOIL

We can supply Standard Inoculating Bacteria for the following crops:

SOY BEANS
GARDEN BEANS
FIELD BEANS

GARDEN PEAS
COW PEAS
FIELD PEAS
VETCH
SWEET PEAS

Always state crop for which inoculation is wanted.

Price: 1-acre \$1.00, 2-acre \$2.00, 6-acre \$4.50.

STERLINGWORTH TARRED FELT DISKS

Tarred Felt Disks (Sterlingworth) are for protecting cabbage, cauliflower and similar plants, when first set out, against the Root Maggot. They are used by fitting around the stem of the plant. Ordinary tarred paper is useless.

Sterlingworth Tarred Felt Disks are made the right shape of special non-curling material, and are free from imperfections in which the Maggot Fly might find a place to deposit eggs. They are recommended by all Agricultural Experimental Stations and give practically 100 per cent. protection.

Price: 75c per 100, 500 for \$3.00, 1000 for \$5.75, postpaid.

SOW GOLD MEDAL MIXED SWEET PEAS. THEY WILL SAY IT WITH FLOWERS.

Giant Flowering Antirrhinum

(SNAPDRAGON)

These modern Hybrid Antirrhinums have been elevated by popular favor from the plebeian "Snapdragon" rank of common flowers to a higher level. This marked change in general estimation is the direct result of the evolutionary improvement for the past few years, that has made the Giant Flowering Antirrhinum race so highly satisfactory for gardens, bedding, borders, pot culture, for house decoration, forcing for winter cut flowers, etc. The plants are of a healthy, robust growth, with deep green foliage, free and continuous-blooming, producing long, graceful spikes of immense and durable pure colored flowers, either rich and brilliant or soft and dainty. Their continuous-blooming qualities, ease of culture and independence of heat and drought, and pure, bright colors, should entitle them to a permanent place in gardens. The flowers are nearly double the size of the older sorts. An effective bed may be formed by planting the centre with the tall varieties and the outer rows with the semi-dwarf; planted in a combination of separate colors, the effect is very beautiful—although even a "Mixed" bed is a feast to the eyes; the plants should be placed 9 inches apart each way. Pinching out the tops—although it delays the beginning of flowering—forces the plants to branch low and ultimately gives better results.

TALL GIANT FLOWERING

Splendid luxuriant growers, 2 to 3 feet in height—with long spikes of immense flowers—very graceful and beautiful cut for vases.

Colossal Red Mignonette

474. One of the finest, being of strong growth, healthy and deep-rooting. The average spikes of flowers are immense, measuring 6 to 8 inches long by $2\frac{1}{2}$ inches in diameter, and are compactly filled with giant florets measuring $\frac{1}{2}$ inch across and packed full, even in the centre with anthers, or three times as many as the older Mignonette contain; consequently this variety is correctly called a double Mignonette. The color of the florets—fire-red—is strengthened on account of the density of the florets and spikes, thus presenting almost solid columns of brilliant red, effectively contrasted against the healthy, rich, green foliage. The fragrance is delightfully rich and powerful. For cutting it is perfection, remaining fresh for from eight to ten days in water. Pkt. 10c.

Heart of France Aster

24. The best pure red Aster ever introduced. All others have sombre shades of blue or too much yellow in the color pigments. Heart of France opens red as the purest ruby deepens with age and retains its remarkable beauty to the very end. The petals appear strikingly changeable, showing now a glow and sheen quite unique, now a soft warm velvety texture. In any light, natural or artificial, Heart of France is startlingly beautiful and will command instant admiration. Because of all these splendid qualities it has been named in honor of brave, brilliant, steadfast France.

The flowers are large and full with never a trace of hollow centre. The plants are of branching type and very robust habit. The stems are long and strong and have very few laterals. The plants begin to bloom, quite early in the season and open fully with the mid-season variety. They retain their brilliancy and lustre for a longer period than almost any other color.

This will be a tip-top variety for florists as well as home gardeners for the reason that the flowers and stems are so large and vigorous and their shipping and long-keeping qualities are such as to make it a winner for almost any purpose. Heart of France will surely supplant all other reds and near reds of either branching or upright types because of its marvelous beauty and other satisfactory characteristics.

Prices: Per packet, 15 cents; two for 25 cents.

Giant Flowering Snapdragon

SOW DOMINION FLOWER SEEDS. THEY WILL SAY IT WITH FLOWERS.

Butterfly Flower

POOR MAN'S ORCHID

This is one of the airiest and daintiest flowers imaginable, especially adapted to bordering beds of taller flowers and those of a heavier growth. The seeds germinate quickly and come into bloom in a few weeks from sowing. The florescence is such as to completely obscure the foliage, making the plant a veritable pyramid of the most delicate and charming bloom. Makes admirable pot plants for the house in late winter and early spring. For this purpose sow in the autumn.

Dwarf Large-Flowered 496. A new variety, forming compact pyramidal plants a foot high, literally covered with large, beautiful, orchid-like flowers in a bewildering range of color.....Pkt. 10c

Good Venture Geranium

384. A strain of seed saved from grand new Hybrids, all greatly enlarged and improved. The flowers are extra large, round, of the most perfect form, borne on splendid trusses, some of them forming balls 16 inches in circumference. The colors include shades of scarlet and crimson, rose, pink, salmon, creamed veined pink, bluish snowy white, and all of the new aureole types with lovely rings and white, large eyes. These all stand the hot sun. Although perennials, they produce nice bushy plants and flower from seeds sown in the same season. The gorgeous flowers, borne continuously, render these most popular plants for pot culture in winter or for bedding out in summer; 12 to 18 inches high.....Pkt. 15c

Jubilee Phlox

THE MOST BEAUTIFUL RACE OF PHLOX DRUMMONDII.

476. Grand acquisitions, forming sturdy little bushes only eight inches high, producing masses of bloom from ground to summit. The flowers borne in immense trusses, are unusually large and of superior substance. For bedding this is a most brilliantly effective annual type. Will form a floral picture of incomparable richness of coloring. They are of easy culture—amply repaying generous treatment—succeeding in all sunny positions, beginning to bloom in early summer from spring-sown seed and continuing until close of autumn.....Pkt. 10c

Butterfly Flower

VICK'S EARLY BRANCHING ROSY RED ASTER

505. After years of development and training, this beautiful new Aster, Vick's Early Branching Rosy Red, is here introduced to the Canadian flower-loving public. This is positively a new color in asters. Nothing like it in any other class. Darker than rose, lighter than crimson, no trace of yellow or magenta; just a beautiful rosy red.

The plants are more vigorous and the flower larger than those of any other shade of red. Therefore, this variety will without doubt be a favorite in cut-flower markets, while the general habit of the plant and its season of bloom easily identify it with Vick's Early Branching Aster. The flowers in shape are about midway between the closely-folded, regular formed, massive blooms of Early Branching and the large, loose, fluffy, wide-petaled flowers of the Mikado type. Our customers will be greatly pleased with this new variety in combination with other colors and types in their gardens this year. Packet, 20 cents; two for 35 cents.

HEART OF FRANCE AND EARLY BRANCHING ROSY RED ASTERS ARE BEAUTIES.

Vick's Ruffled Petunia

506. The Originators say:—This is the most expensive crop we grow. One entire greenhouse is used, in which each plant, potted separately, is carefully tended and the pollen spread from plant to plant with a camel's hair brush in the hands of an expert. A good crop sometimes costs us as little as \$800.00 per pound. Some years the crops costs more. We go to all this expense to keep up the quality of this superbly ruffled and beautifully marked strain, acknowledged by every expert who has seen it as absolutely unsurpassed anywhere. After studying for weeks the brilliant coloring and delicate threads or veins in every conceivable hue, an artist, whose color sketches of flowers are greatly admired, says: "No human being can ever depict accurately in colors the exquisite beauty and intricate detail of your Ruffled Petunia. Its gorgeousness baffles description." Vick's Ruffled Petunias, mixed colors: Pkt. 35c.

The Cardinal Climber

495. The most brilliantly beautiful New Annual Climber that has been introduced for many a year. An extremely rapid grower, it flowers early and profusely; the vines branch freely, quickly attaining a height of from 20 to 30 feet. The dark green leaves are deeply lacinated, resembling a fine Japanese Maple. Each plant bears almost countless numbers of extremely rich, circular, glowing scarlet flowers which average $1\frac{1}{2}$ inches in diameter, the tube being $1\frac{1}{4}$ inches in length. It succeeds best in a warm, sunny position, and should be planted in rich soil. While most profuse in flowering from July until frost, it is an extremely shy seeder, most of the flowers failing to produce any seed at all. We recommend starting early indoors, when practically each seed should give one of these grand vines that grow so vigorously and attract such attention. Pkt. 15c.

Beauty Stocks

472. "Beauty Stocks" is an appropriate name for this comparatively new and magnificent race which is bounding into popularity wherever grown or exhibited in Europe and America. The plants are of fine symmetrical habit, bushy and in flower stands about $1\frac{1}{2}$ to 2 feet in height. The numerous side branches each carry a tall strong spike well furnished with unusually large and very double deliciously clover-scented flowers. After they commence blooming their long-continued profusion is phenomenal. Seeds started early in the spring and the seedlings transplanted in the garden in May will begin flowering in July and continue to bloom until frozen. As cut flowers, "Beauty" Stocks are unsurpassable, their splendid trusses of bloom lend themselves to table and other floral decorations. Pkt. 15c.

Scarlet Dragoon Salvia

468. A most magnificent summer and autumn flowering bedding plant. The old Salvia Splendens, or Scarlet Sage, has long been a favorite and our customers can partially appreciate the superiority of this new variety when we state that the flowers are nearly double the size, closely crowding the immense spikes that often measure six inches across. Full grown plants in bloom form compact bushes three feet through by three feet high, and bloom from ground to summit. We know of nothing that can equal the gorgeous effect of a row or bed of these Salvia when in full bloom; the waving masses of glistening scarlet, green surroundings of lawn or foliage is matchless. Pkt. 15c.

Nicotiana Sanderae

GIANT AFRICAN DAISY

New Hybrids, Mixed 458. No painter's brush can properly describe the amazing beauty of these wonderful new African Daisy Hybrids. The world owes a debt of gratitude to the Originator in Europe, who had the knowledge and skill to "create" them—the crowning achievement of half a century in seed growing. In habit, growth and foliage, as well as height of plants (twelve to fifteen inches), and the size of the flowers (two and one-half to two and three-quarter inches across), these new Hybrids are like the parent *Dimorphotheca Aurantiaca*. They range in color from the purest white to red and bluish-white tints, sulphur, salmon and bright golden-yellow, golden-orange, reddish-yellow, changing to light salmon-rose, superb shades of salmon, very light to deep orange-salmon. There are also varieties with different colored zone, such as white with a broad sulphur-yellow zone around the black disc, and soft salmon with deep salmon-red inner circle. These zoned flowers enhance the beauty and varied aspect of these remarkable new Hybrids. **Pkt. 10c.**

CHINESE WISTARIA

477. A very rapid grower, and one of the most beautiful of all climbers. It is perfectly hardy, climbing to a height of fifty feet; when covered with bloom it is magnificent. Desirable for trellises, porches, etc. When well established it blooms perfectly. The light purple or white flowers are very showy, and are produced in long racemes. A large plant in bloom is a beautiful sight. Perfectly hardy. **Pkt. 15c, Plants \$1.00 each. Postpaid.**

NICOTIANA

Sanderae Hybrid, Mixed 467. Most showy and profuse-flowering garden annuals, giving a continuous display of brilliant flowers through summer and autumn; easily grown from seed, commencing to flower in a few weeks from sowing, thriving in a sunny position in any good garden soil. The plants, of branching bushy habit, 2 to 3 feet high, carry the flowers in clusters, the whole being literally ablaze with them, thousands being borne on a single plant during the season; the glorious effect in the garden is unsurpassable. The plant and flowers are similar in habit and form to those of the popular, white-flowering, fragrant *N. Affinis*, but the flowers of these new hybrids are much larger, measuring from 1½ to 2 inches across, and very fragrant. Colors, purple, white, dark red, light red, salmon, crimson, violet, rose and pink. **Pkt. 10c.**

NEW DAHLIA FLOWERED ZINNIA

233. This new type of Zinnias so closely resembles dahlias that placed in a vase they are difficult to distinguish. The plants grow vigorously and bloom freely. The flowers are of large size, perfect form, and of many fine colors. **Pkt. 20c.**

PANSY MATCHLESS

OUR OWN RAISING

403 We are delighted to be able to offer this year our matchless form of Giant Pansies.

We have been selecting these for years, our aim being to obtain what we now have, i.e., a perfectly formed Pansy, with a matchless variety of delicious shades of art colors. They range from a golden yellow, beautifully blotched and edged, to an exquisite rich claret and reddish bronze, the surface beautifully shaded with a rich silk velvety sheen.

These lovely shades of color must be seen in their natural state to be fully appreciated.

The blooms are of immense size, with grand substance, and free from any coarseness or flimsiness.

The plants are of strong, sturdy habit, with large, rich green foliage.

It is in every way an ideal exhibition or market Pansy. **Pkt. 25c.**

EARLY FLOWERING GIANT COSMOS

471. In this strain which has been selected and re-selected with great care and labor, will be found the finest forms of cosmos thus far developed. It is a noble mixture or collection of large-flowered forms, embracing all colors, such as white, pink, crimson, white-tinted rose, etc. The great flowers, borne in abundance on long and graceful stems, are sometimes six or more inches across. Some blooms are nearly flat and cone-shaped, with petals variously cut and fringed. Certain of the fringed forms resemble California poppies, with broad petals of great elegance and beauty. This magnificent type of cosmos may be started very early under glass or in the window box, thus giving it a long season for full development. Seeds sown out of doors in early spring produce plants that will bloom in early autumn, and the gorgeous flowers will continue long after the advent of frost. **Pkt. 10c.**

572. **Giant Pink Lady Lenox**—A new variety. Flowers much larger, with wide, overlapping petals, making a perfectly full circular flower. Extra long stems and splendid for cutting. Color a deep rosy pink, ¼-oz. **40c, Pkt. 10c.**

573. **Giant White Lady Lenox**—Same as above with white flower, ¼-oz. **40c, Pkt. 10c.**

New Double-Crested Cosmos

These, which are commonly called double, are not fully double, but are double crested, having double centers and a row of petals around the base of the flower which makes them very effective. These are also shy seeders.

574. **Mixed Colors**.....**Pkt. 20c**

Chinese Woolflower

(CELOSIA CHILDSI)

Most Showy Garden Annual in Cultivation

41. This was introduced from China five years ago and has proved a great success everywhere. There is not the slightest doubt but that it is the most magnificent garden annual ever introduced. Its ease of culture and long continued season of bloom (early July until frost), together with its massive bunches of wool-like flowers

MORNING GLORY

"CALIFORNIA SUNBEAMS"

and glowing color, combine to make it the showiest as well as the most odd and novel garden flower. Five years of cultivation have demonstrated this fact.

Plants grow two to three feet high, the blooms starting early with a central globular head which often reaches the immense size of two feet in circumference. Scores of branches are thrown out, each bearing a ball of scarlet wool. All these branches support numerous laterals with small heads of bloom mixed with fresh green foliage so that a plant looks like an immense bouquet splendidly arranged and set in the ground. None of the blooms fade in any way until hit by frost, but all continue to expand and glow with a deepening richness of color, a deep crimson-scarlet. Flowers when cut in a fresh state and carefully dried retain their shape and brilliant color and are useful for winter decorating, like everlastings. Pkt. 15c, 2 Pkts. 25c.

California Sunbeams

(Calliopsis lanceolata Grandiflora)

42. This is one of the finest of hardy plants; with large, showy bright yellow flowers, produced in the greatest abundance from June till frost. As a cut flower they stand near the head among hardy plants, having long stems and lasting in good condition a week or more. Easily grown from seed, flowering the first year if sown early. Hardy Perennial, Pkt. 15c.

Morning Glory

GIANT FANCY FRINGED

385. The flowers are as big as saucers, ruffled from stem to margin like crumpled velvet, and the coloring and markings beyond description, ranging from snow-white to black-purple with all the possible intermediate shades. Others are edged with white, having throats of one of the above colors; there is also an endless number having flowers spotted, marbled, striped, flaked and splashed. They are beyond question the largest and most beautiful of this handsome family of easy grown climbers, and are the Orient's best gift to flower lovers. Wherever climbers can be grown our New Giant Mikado Strain should have a prominent place. The seed we offer is of our own importation direct from Japan. Pkt. 15c, 1/2-oz. 25c, oz. 40c.

Giant Hardy Hybrid Gaillardias

89. Great improvements have been made in these worthy garden plants the past few years, and the seed that we here offer has been saved by a European specialist from his choice collection of new giant hybrids. The flowers are of extraordinary large size, many of them four and five inches across and very highly colored in great diversity of variations and blendings, including such combinations as dazzling scarlet with gold edge, blood crimson with yellow edge, yellow with orange disc, golden with scarlet border, pure yellow, fiery crimson and many others. These magnificent Gaillardias are hardy perennials less coarse and more compact in growth than the older kinds, and they produce a constant succession of flowers all summer and fall; when grown in large groups they are gorgeously effective. As cut flowers they are almost unrivaled, the immense and brilliant colors, on long self-supporting stems, "vase" handsomely, and they last in water for days. (See cut.) Mixed Colors, Pkt. 10c.

NEW GIANT GAILLARDIA

FLOWER SEED Department

ABBREVIATIONS—H. A. Hardy Annual, flowering the first year; H. H. A., Half Hardy Annual, flowering the first year; P., Perennial, or those that do not flower until the second year; H. H. P., Half Hardy Perennial; B., Biennial, or those that live and generally bloom two years; Tra., Trailing Plants; Ht., Height; Pkt., Packet.

FAILURES—Nine-tenths of the failures in flower culture come from improper treatment of the seeds and young plants, and we urge every purchaser of our seeds to study carefully the cultural directions printed on each packet, and keep in mind the following golden rules for sowing flower seeds. Make the surface as fine and smooth as possible. Do not plant any of the seeds when the ground is at all wet. Cover each lot of seeds to a uniform depth, which should never be more than three or four times the diameter of the seeds. Press the soil firmly over the seeds. Plant in rows so that the young plants can be easily seen, and pull up all the weeds which spring up between the rows the day they appear, but do not pull plants out of the row until you are sure they are weeds.

Aquilegia (Columbine)

Charming hardy perennial plants, growing from 1 to 3 feet high, bearing in countless numbers through May and June their exquisite blossom of pure blue, white, rose, yellow, purple, striped, etc. For planting in permanent borders or naturalizing along the edges of woods or shrubbery, this old-fashioned favorite is one of the best of all hardy flowers. H. P. 1 to 3 feet.

31. Mixed.....Pkt. 10c

32. Long Spurred Hybrids, Mixed.....Pkt. 15c

Ageratum

Valuable for the large beds or borders and very useful where cut flowers are in demand; blooms the whole summer; also good for winter blooming; of easy culture, succeeding in any soil.

4. Little Dorrit—Flowers pure white, height 9 ins.....Pkt. 10c

5. Dwarf Blue—Fine color; dwarf habit; height 9 ins.....Pkt. 10c

6. Fine Mixed—A great variety of color, height $\frac{3}{4}$ to $1\frac{1}{4}$ ft.....Pkt. 10c

Amaranthus

Remarkably handsome foliage, and interesting flowers, producing a striking effect in the border as a background, or as a centre of beds. Seed may be sown in the open border in a hot-bed; transplant about the first week in June. Produces the most attractive and brilliant foliage upon poor soil; transplant to 20 inches.

29. Fine Mixed—A great variety.....Pkt. 10c

Alyssum

A desirable annual, flowering from early spring until killed by frost, and all winter in the house, is sown in August. Most effective in masses of plants one foot apart.

412. Carpet of Snow—Emits a honey-like perfume; grows only two to three inches. Perfect carpet of snow throughout the season; 300 heads of pure white flowers open on one plant at one time. H. A.....Pkt. 10c

9. Sweet—White flowers, fragrant, very delicate; makes a pretty border. H. A.....Pkt. 10c

10. Little Gem—Grow 3 or 4 inches high, and each plant spreads 12 to 20 inches in diameter; deliciously fragrant. H. A.....Pkt. 10c

11. Golden Saxatile—Flowers brilliant golden yellow, completely hiding the foliage. Plants about one foot high; desirable for rock work and quite showy in masses. H. P.....Pkt. 10c

3. Lilac Queen—The name describes the color, a most charming variation. H. A.....Pkt. 10c

Carpet of Snow

Imperial-Mixed

ASTERS

Asters are one of the most important summer and autumn flowers, and receive special care at our hands. Yearly exhaustive tests are made with a view to offering only the choicest kinds, regardless of cost. As a result of this care our list comprises only such sorts as can be planted with perfect confidence that nothing better is procurable, no matter at what price or from what source.

The varieties offered on this and the following page, also those varieties in our novelty list, represent the finest Asters introduced to date, and are all firmly established favorites with the most critical growers of this popular flower, and should be in every garden where high quality is appreciated.

448. Vick's Purple Rochester—These magnificent flowers are more double and more chrysanthemum-like than those of the original Lavender Pink Rochester. The long narrow petals fall over one another in a charming cascade of color, forming a wonderfully shaggy mass that cannot be equalled for richness of effect. In addition to their great diameter, they have a most remarkable thickness, making them truly massive. A rich shade of deep purple. **Pkt. 25c**

449. Vick's White Perfection—We consider this the finest mid-season white aster in cultivation. The flowers are exquisite in form, and plants are taller than those of the latter upright asters. Grown on our farm under ordinary field conditions, the flowers average four inches in diameter. When they are ready for market the entire flower is strongly whorled, producing a charming effect and making the White Perfection quite distinct from any other aster. The plants carry about twelve flowers on large stems. **Pkt. 20c**

376. Mikado Pink Rochester—The Premier of Lavender Pink Asters—Makes the fluffiest aster we have ever seen. In color it is a most exquisite shade of lavender pink. It is not uncommon to find one plant with a dozen flowers from 4½ to 6 inches in diameter. **Pkt. 15c**

379. Violet King—In form, the flower is entirely new and distinct, being fantastically twisted, curled and incurved, from 4 to 5 in. diameter **Pkt. 15c**

New Crego—This new variety surpasses, in size and beauty, any other aster we have ever seen. The plant is well branched, grows about two feet high, and produces many long flower stems, which make this sort a very profitable one for the gardener or florist. The flowers are as fine as chrysanthemums, seldom measuring less than six inches across; of beautiful form, double, with long fluffy, gracefully curled petals.

479. Shell Pink, beautiful shade. **Pkt. 15c**

480. Snow White, large, pure white. **Pkt. 15c**

481. Crego, Mixed. **Pkt. 15c**

433. Vick's Enchantress, Pink—The beautiful large, double

flowers have the delicate shade of the Pink Enchantress Carnation. Unlike many other Pink Asters, this variety holds its soft, delicate color for a long time without fading. **Pkt. 15c**

482. New Astermum—A beautiful new class of the Comet type, producing many flower stems which grow directly from the parent stem close to the ground, which habit makes it conspicuous and a valuable border, bedding or pot plant, attaining a height of 18 to 24 inches. The flowers are large, with long gracefully curled petals. Unrivalled for table decorations, and particularly appreciated as cut flowers. **Mixed Colors, pink and white. Pkt. 15c**

447. Vick's Autumn Glory—Prolongs the aster season two weeks and coming at a time when good flowers are extremely scarce. The flowers are very double, and are borne on stems of unusual length. **Pkt. 20c**

365. Daybreak—This beautiful Aster is one of those rare gems that has come to stay; no private garden is complete without it; and for florists' use it is unsurpassed. The flowers are round as a ball, very large and full, on long stems; the color a lovely sea shell pink. **Pkt. 15c**

485. Giant Ostrich Plume Mixed—Embraces all the desirable colors in splendid mixture. A very large flowering class, the blooms of which are of most perfect shape; splendid for cut flowers. Resemble the Giant Comet Asters, as they have the same curled and twisted petals. However, the petals are longer and the whole flower larger. Individual blooms often measure 4 to 6 inches in diameter. Plants of luxurious branching habit, with flowers on long slender stems. Height, 2 feet. **Pkt. 10c**

Imperial Mixture **434.** This is a mixture of the most beautiful striking and distinct colors, selected from the cream of the Trauffaut's, Victoria, Crown, Giant Comet, Chrysanthemum-flowered, Ostrich Plume, Branching Paeony-Flowered, and other desirable sorts, and include many kinds especially purchased for this mixture. This is the finest mixture of asters in existence, and the most critical lover of this flower will be astonished at the wide range of colors and varieties given in this truly unexcelled strain. **Per Pkt. 15c, 2 Pks. 25c, 1-8 Oz. \$1.00**

366. Jubilee, Mixed—Flowers five inches in diameter. Individual plants carry 25 to 40 immense flowers. Colors beautiful. **Pkt. 10c**

Jubilee Aster

THIS AND FOLLOWING PAGE CONTAIN THE CREAM OF THE ASTER FAMILY

ASTERS

14. **Giant Comet**—Plants 18 inches high, flowers resemble Japanese Chrysanthemums, and are of very largest size. Finest colors, mixed.....Pkt. 10c

375. **Vick's Branching Mixed**—This exceptionally fine aster is without a rival; is often mistaken for the chrysanthemum; stems 15 to 20 inches long; grand for cutting. One plant will cover a space 2½ feet square.....Pkt. 20c

388. **Vick's Cardinal**—It is almost an impossibility to describe the coloring of this aster. When massed in a bed by itself, its deep vivid cardinal color is as striking as the brilliant Scarlet Salvia.....Pkt. 20c

363. **Royal Purple**—Medium early. Continuing until late in the fall. Are large and full to the centre; color bright purple.....Pkt. 10c

364. **Purity**—A handmaid to Day-break; blossoms pure white. A finer combination of colors than Purity and Day-break cannot be imagined.....Pkt. 15c

16. **Trauffaut's Paeony-Flowered Perfection**—Two feet in height, blooming very freely; the flowers are paeony-like. Colors range from pure white to scarlet, etc. Mixed.....Pkt. 10c

17. **Dwarf Chrysanthemum-Flowered**—Flowers from 3 to 4 inches in diameter and very abundant; later than any other varieties, therefore valuable for succession. Finest colors, mixed.....Pkt. 10c

378. **Lavender Gem**—The color of this variety is of delicate-lavender. The feathery effect of the ostrich-feathered type, irregularly cut and slashed, looks like a ragged chrysanthemum.....Pkt. 15c

23. **White Plume**—Flowers from 3 to 4 inches in diameter.....Pkt. 10c

26. **White Varieties, Choicest Mixed**—This mixture cannot be surpassed. Height, 1½ to 2 feet.....Pkt. 10c

27. **All Varieties, Mixed**—Mixture of standard varieties.....Pkt. 10c

Early Branching—A distinct advance in the branching class, attaining the size and vigor of Late Branching and coming into flower about two weeks earlier. The whole strength of the plant is given to the development of very large and perfect flowers, which are borne on extra long stems. We offer two colors only for this season:

401. **Early Branching White**.....Pkt. 10c

402. **Early Branching Rose**.....Pkt. 10c

25. **Royal Asters, Mixed**—Form a new class of Asters in which the petals are very broad and distinctly incurved or shell-shaped. The peculiar shape of the petal gives an effect of shading that enhances the beauty of the color, has a charming grace and a Cyrysanthemum-like effect.....Pkt. 15c

Balsams

"The balsams snapped their tender pods, and threw their seeds away." Our Balsam seed is of a superior strain saved from the most perfect flowers. H. H. A. 1½ to 2 feet.

33. **Pearce's Famous**—This is the most magnificent strain of double Balsams ever introduced.....Pkt. 10c

34. **Camelia-Flowered, Double-Mixed**—Richly varied colors, blotched and marked.....Pkt. 10c

36. **Fine Double-Mixed**—A good collection of colors for pots and borders.....Pkt. 10c

Bachelor's Button

40. **Centaurea Cyannus**—Also known as "Ragged Sailor," "Corn Flower" and "Blue Bottle." It is a great beauty, and a favorite in the old country. Unique little plant, forming a dense mass of foliage over which are borne many lovely blossoms, beautifully fringed and serrated. Mixed colors.....Pkt. 10c

Burning Bush

435. The plant grows freely from seed sown in the open ground when the trees are coming out in leaf, and from the earliest stage of growth in the spring until they reach maturity in the fall, the plants are always of globe-like form. The plants branch freely, and the stems are clothed with slender light green leaves. Early in the fall the ends of the shoots are thickly set with small bright-scarlet flowers—the bushy plants resembling balls of fire. The plants are equally showy planted singly to show the round, ball-like form on all sides, or grown in continuous rows or hedges. H. A.....Pkt. 10c

GIANT OSTRICH PLUME ASTER 1

Baby's Breath

475. The flowers are small—star-like and borne in feathery sprays which are highly esteemed for cut flowers, as they end a most graceful effect when combined in bouquets with Sweet Peas. Successive plantings of seed should be made a few weeks apart to furnish a continuous supply of flowers.....Pkt. 10c

Calendula

Or Pot Marigold—One of the best and showiest free-flowering annuals. Will grow in any good garden soil and produce a fine effect in bed and mixed borders. Valuable for pot culture, blooming in the winter and early spring. One foot high.

48. **Fine Mixed**—Many beautiful varieties.....Pkt. 10c

Cockscomb

Magnificent, free-flowering, graceful-growing plants, producing in the greatest profusion their beautiful flowers in combs and feathery spikes. Grown in pots they are one of the most elegant plants for conservatory decorations. Annual.

65. **Carter's Empress**—Most superb strain in cultivation. Height, 1½ feet.....Pkt. 10c

66. **Glasgow Prize**—Immense crimson combs, very fine. Height, 1½ feet.....Pkt. 10c

67. **Dwarf Mixed**—A variety of colors; very handsome. Height, 1 foot.....Pkt. 10c

Plumed Cockscomb

398. **"Thompson's Magnifica"**—A very superior type of the popular Ostrich-Plumed Celosia or Cockscomb, forming pyramidal branching plants 3½ feet high, and bearing unusually large conical plumed heads of either golden-yellow, fiery-scarlet, purple, salmon, etc. The plants are annuals, growing easily and quickly from seed and present a very showy appearance in your garden, lasting long in bloom. Mixed colors.....Pkt. 10c

Carnation

Carnations are general favorites for their delicious fragrance and diversity of color. With the exception of Marguerites, they will very seldom bloom the first season, but with a little protection will stand the winter well and flower profusely the following May or June.

44. Marguerite, Early Flowering—This class excel in all respects. It is the most profuse bloomer of any of the "Pinks". Exquisite in color, showing beautiful shades in white, red, pink, variegated, etc. Large size, perfect form, dwarf habit, compact and robust; flowering in a few months from seed. They can be potted and taken into the house and will flower abundantly throughout the winter. Mixed.....Pkt. 10c

392. Chaubaud's Flowering Giant—These latest, and best creations of Mons. B. Chaubaud, the famous French Carnationist, surpass all the race in richness and variety of coloring, the combinations of which are surprisingly beautiful. Now we have Fancy Pinks flowering continuously after six months from sowing, immense double blossoms perfuming the air with sweetness; of incontestable merit for winter flowering and hardy enough for out-door culture. Mixed colors.....Pkt. 15c

45. Fine Double Mixed—Established favorites. For cut flowers. H. H. P. Height, 1½ feet.....Pkt. 10c

46. Choicest Double Mixed—This collection comprises richly scented, beautifully marked varieties. For cut flowers. Height, 1½ feet.....Pkt. 25c

Candytuft

Everybody knows what Candytuft is, how easily it is grown and how indispensable it is in the flower garden, either for cutting or display for weeks without interruption. H. A. One foot.

49. Empress—The finest pure white variety in cultivation. It is a strong grower and produces several trusses of flowers 5 to 8 inches in length and 2 to 3 inches in diameter.....Pkt. 10c

508. Giant Hyacinth-Flowered—Most desirable for cut-flower purposes, producing a very large, elongated head of quite large, pure white florets. The immense broad heads frequently measure six inches in length.....Pkt. 10c

50. Sweet-Scented—White.....Pkt. 10c

51. Crimson.....Pkt. 10c

52. Fine Mixed—A Choice Mixture.....Pkt. 10c

Calliopsis

Many of our most showy flowers are slighted because they are common and grow anywhere without trouble or care, almost like weeds. One of these is the Calliopsis. Were it a new thing just introduced, it would be considered a novelty of rare excellence.

43. Mixed Colors—Nearly every shade of yellow, orange, crimson, red, brown. H. A.....Pkt. 10c

Canna

Crozy's Cannas are famous for their luxuriant dwarf growth and immense Gladiolus-like flowers of most brilliant colors; their profusion and continuity of bloom under all climes and conditions render them easily the most useful, showy and popular garden plants grown. This seed, sown in the house or hot-bed from January to March, will produce flowering plants by July. Pierce the seed in one spot with a file and soak in luke-warm water for 24 hours before sowing. Named cannas do not come true from seed, so we only offer the seed in mixture.

54. Crozy's Hybrids—New and beautiful varieties. H. H. P. Three to 5 feet.....Pkt. 10c

55. Choice Mixed—Comprises all the best varieties. Height, 3 to 5 feet.....Pkt. 10c

(For Canna Bulbs, see Plant Department.)

Calliopsis

Canterbury Bells

Very ornamental garden plants of easiest culture, flowering the second season from seed; hardy biennial (requiring to be sown every year for flowering the next year), 2½ feet high, producing large bell-shaped flowers of exquisite colors. The "Cup and Saucer" varieties (*Campanula Calycanthema*) produce beautiful single flowers 3 inches in length, saucers 3 to 4 inches across. The plants form perfect pyramids of bloom for weeks during the early summer.

56. **Cup and Saucer**—A beautiful variety, a most desirable and attractive addition to this class of old garden favorites. The bell or trumpet is nearly four inches in diameter; form of cup, hence its name.....Pkt. 10c

57. **Choicest Mixed**—Single or double.....Pkt. 10c

Coreopsis

47. One of the best hardy garden plants. The flowers are large, of a bright golden yellow, freely produced on long stems from June till frost; excellent for cutting; height 3 feet; hardy perennial.....Pkt. 10c

Convolvulus Minor

(Dwarf Morning Glory)—Rich-colored, handsome dwarf, trailing plants, producing in beds and mixed borders an unusually brilliant effect. H. A. One foot.

61. **Tricolor, Mixed**.....Pkt. 10c

Cowslip

The well-known English Cowslip, flowering early in spring.

64. **English Mixed**—Fine colors.....Pkt. 10c

Chrysanthemum

One of the prettiest annuals grown. The colors have the appearance of being laid on with a brush, and for this reason they are frequently called "Painted Daisies," and are indeed very charming. Sow your seed early in open ground and they will bloom profusely in summer.

60. **Fine Mixed**—Certain to produce splendid flowers, 2 feet.....Pkt. 10c

Diamond Flower

76. A dainty little annual with tufts of tiny-foliage and beautiful little white and violet-blue flowers that bloom within a month from time seed is sown. It will grow in the open ground over rock work, or in pots, never exceeding three inches in height and rarely two. The tiny flowers have a glistening sheen that has given them their name of Diamond Flower, and being surrounded by a wreath of bright green foliage, they show to wonderful advantage. For pot culture in winter it is just superb. Sprinkle a few seeds in a small pot or saucer, or in pots where other plants are growing, and within one month you will have the most charming of foliage and flowers covering the surface of the soil—like moss, you ever saw.....Pkt. 10c

Double Daisy

(*Bellis Perennis*)—As an edging for shady borders and as pot plants, these handsome hardy perennials are unsurpassed. The strains we offer are remarkable for their size and doubleness of their flowers, and much superior to those generally offered. P. Half foot.

77. **Longfellow**—Large double pink flowers.....Pkt. 10c

78. **Snowball**—Large and very double snow-white daisy; excellent for cutting.....Pkt. 10c

79. **Double Mixed**.....Pkt. 10c

Dahlia

The Dahlia is well-known, but few are aware that if the seeds are sown early in the spring they will bloom the first year. The seed which we have to offer is of the finest strain, and produces magnificent flowers of large size and richest shades.

68. **Finest Double Mixed**—Every variety color. T. P. Four feet.....Pkt. 10c

70. **Cactus Mixed**—Single and double.....Pkt. 10c

Delphinium

(Perennial Larkspur)—The Perennial Delphiniums are valuable plants; foliage clean and pretty; habit strong and good; flowering branches often four feet high, flower spikes six inches or more in length. Propagated by division of roots and from seed. Strong plants will be produced by fall that will flower next spring.

80. **Finest Double Mixed**.....Pkt. 10c

Digitalis

(Foxglove)—When well grown this is quite a stately plant, with flower stems 3 feet in height. The flowers are thimble spotted. H. P.

75. **Menstrosa Mixed**—Spike of enormous flowers.....Pkt. 10c

Annual Chrysanthemum

DIANTHUS OR PINKS

Dianthus (Pinks)—This genus of plants is one of the most brilliant of our garden flowers, and gives universal satisfaction. Very fragrant and desirable for bouquets.

71. **Chinensis, Fl. Pl. Mixed** (Double Indian Pinks)—A great assortment. Height, 1 foot. **Pkt. 10c**
 72. **Heddergill, Fl. Pl. Mixed** (Double Japan Pinks)—The grandest Pinks. Height, 1 foot. **Pkt. 10c**
 73. **Choicest Mixed**—The above and many others. Height, 1 foot. **Pkt. 10c**

HARDY PERENNIAL PINKS

These hardy varieties are well adapted for beds and borders, delightfully sweet-scented. Should be in every garden where cut flowers are wanted.

74. **Double and Single Mixed**..... **Pkt. 10c**

African Daisy

445. **Golden Orange**—Extremely showy annual. Quite unique in color. The hardy plants of neat branching habit grow only twelve to fifteen inches high, and are exceedingly profuse in flowering. Its Marguerite-like blossoms, $2\frac{1}{2}$ to $2\frac{3}{4}$ inches in diameter, are of a peculiarly rich, glassy orange-gold. Its striking brilliant coloring is rendered even more conspicuous by the dark colored disc surrounded by a black zone. It bears its pretty flowers very early after being planted out in the open ground in sunny situations, and will continue to bloom abundantly during the entire summer. A bed in full bloom is truly a magnificent sight. **Pkt. 10c**

Eschscholtzia

(California Poppies)—Showy summer flowering plants, large saucer-shaped flowers of striking brilliancy in the sunlight. They flower profusely throughout the season.

81. **Finest Single Mixed**—All the best varieties..... **Pkt. 10c**
 509. **Bush Eschscholtzia**—A fine perennial plant; forms a bushy shrub 2 feet high, producing large cup-shaped flowers on stems 12 inches long; of clear jonquil yellow and vivid bright orange stamens, begins to bloom in July from Spring-sown seed. **Pkt. 10c**

Giant Flowering Geranium

Forget-Me-Not

83. **Myosotis**—Popular and charming little plants, bearing delicate blue flowers, which are highly prized for their beauty. **Pkt. 10c**

Gaillardia

(Or Blanket Flower)—These are undoubtedly among the choicest of hardy perennials. The flowers are large, very numerous, excellent for cutting and of the most brilliant shades of orange, crimson, scarlet and vermillion, and a combination of all these colors.

84. **Many Colors Mixed**..... **Pkt. 10c**

Geranium

Yes, you can grow good Geraniums from seed, and as they sprout, the gardener is frequently rewarded by charming new varieties, especially if this new strain of seed is used. They are Giant Flowering. The colors are all shades of crimson, scarlet, salmon, pink, rose, snowy white. They will bloom more quickly if planted in light sandy soil. H. H. P.

85. **Giant Flowering Mixture**..... **Pkt. 10c**

Godetia

Handsome and showy annuals, about 1 foot high, of dwarf compact growth, bearing freely large flowers 3 to 4 inches across.

86. **Choicest Mixed**—Compact habit; contains many kinds..... **Pkt. 10c**

Lobelia

Pretty, profuse blooming plants of great value to the flower garden. Their delicate, drooping habit and the profusion of their charming little flowers render them extremely ornamental. Very fine for hanging baskets. H. H. A.

96. **Erinus Gracilis**—Dark blue, height 2 feet..... **Pkt. 10c**
 97. **Erinus Speciosa**—Blue, with white eye; used at Crystal Palace and other public gardens. Height, 6 inches..... **Pkt. 10c**
 98. **Choice Mixed**—For beds, edgings and pots. All colors. Height, 6 inches to 1 foot..... **Pkt. 10c**

Larkspur

Well known annuals of great beauty and noted for richness of colors.

99. **Dwarf Double Rocket, Mixed**—Improved by culture; for clumps. H. A. Height, 1 foot..... **Pkt. 10c**
 100. **Double Emperor, Mixed**—A new strain obtained by selection. H. A. Height, 1 foot..... **Pkt. 10c**

Marigold

These annuals are old favorites in our garden, but have been greatly improved in size and doubleness of flowers. Effective for massing.

399. **"Lemon Ball"**—The color is a clear canary-yellow; resembles large double yellow dahlias. Flower will measure four inches across; excellent for cutting. As easily grown from seed as the common marigold..... **Pkt. 10c**
 103. **African Double, Mixed**—Fine blossoms; height, 1 to 2 feet..... **Pkt. 10c**
 105. **French Double, Mixed**—A fine mixture; height, 1 to 2 feet..... **Pkt. 10c**

Musk Plant

A well-known and favorite plant, both for outside borders and for pot culture in spring. Cultivated on account of the musky odor of the plant.

110. **Mimulus Moschatus**—H. H. A..... **Pkt. 10c**

Nasturtium

For ease of culture, duration of bloom, brilliancy of coloring and general excellence nothing excels Nasturtiums. All they need is a moderately good soil in a well-drained, sunny position, and within a few weeks from the time they are sown until hard frost comes there is an endless profusion of their gorgeous blossoms. No annual will produce such a lavish profusion of flowers for so long a time, with the same small outlay of time and labor. The maximum of bloom is produced in light or sandy soils and seldom diminishes through the hot weather. The varieties offered below were selected from a very large number of sorts as the best and most distinct. H. A.

DWARF VARIETIES

400. **Giant of California**—Flowers often three inches across; a great variety of colors. The plants form perfect mounds about one foot high by one foot across. Choice colors, mixed..... $\frac{1}{2}$ Oz. 25c, Pkt. 10c
124. **Pearl**—Light cream color, the nearest to a white yet obtained. Height, 1 foot.....Oz. 25c, Pkt. 10c
125. **Spotted**—Orange with chocolate spots; a pleasing contrast to other kinds. Height, 1 foot.....Oz. 25c, Pkt. 10c
126. **Scarlet**—Fine, orange-scarlet, the freest bloomer of all; fine for vases. Height, 1 foot.....Oz. 25c, Pkt. 10c
127. **Crimson**—Fine dark crimson-maroon; a dense bloomer; very effective. Height, 1 foot.....Oz. 25c, Pkt. 10c
129. **Empress of India**—A sensational variety; brilliant crimson. Height, $\frac{3}{4}$ foot.....Oz. 25c, Pkt. 10c
130. **King Theodore**—Remarkable appearance; dark chocolate crimson. Height, $\frac{3}{4}$ foot.....Oz. 25c, Pkt. 10c
133. **Tom Thumb Mixed**—Comprises the above and a great many more varieties. Height, $\frac{3}{4}$ to 1 foot.....Oz. 25c, Pkt. 10c

Ice Plant

91. Pretty trailing plants, with curious succulent leaves and stems. Fine for hanging baskets.....Pkt. 10c

Nicotiana

The plant is literally covered with large white, star-shaped flowers, which, after being cut, will remain perfect for a week. A few plants will perfume the whole yard or garden. H. H. A.

121. **Affinis**.....Pkt. 10c

Petunia

Richness of color, duration of bloom and easy culture will always render them welcome and popular. They will do well sown in open border in the spring or earlier in cold frame or hotbed and transplanted 18 inches. By the latter process they will come into bloom earlier.

146. **Double-Flowered**—Seed is saved from plants grown in pots, carefully hand fertilized and will produce grand flowers. Of course, everybody knows that only a certain percentage of double may be expected from seed, but our mixture will produce from 65 to 70 per cent. of double flowers.....Pkt. 30c

147. **Giants of California**—This strain originated in California flowers ruffled or fringed and measure from 4 to 5 inches across. The great variety of color blotchings, stripings and veinings make fantastic and beautiful combinations, deep throats of yellow, white, black, green or maroon, running off into intricate veins.....Pkt. 20c

149. **Large Flowering, Superb Mixed**—Twice the size of the old sorts; beautiful.....Pkt. 15c

150. **Striped and Blotched**—A fine strain; very large.....Pkt. 15c

151. **Hybrida Mixed**—Contains varieties, all colors, for pot or gardens..... $\frac{1}{4}$ Oz. 25c, Pkt. 10c

Mignonette

111. **Goliath**—Claimed by experts to be the most beautiful Mignonette in existence; giant trusses of flowers borne erect, strong, stiff stalks and surpassing all others in brilliancy of color; especially suited for house culture.....Pkt. 10c

114. **Sweet**—Too well known to need comment, Oz. 25c, Pkt. 10c

115. **Machet**—Richly colored, fine for pots.....Pkt. 10c

116. **Hybrid Spiral**—One of the finest; free bloomer, 1 ft. Pkt. 10c

117. **Large Flowering**—Long spikes, highly scented, 1 ft. Pkt. 10c

118. **Golden Queen**—Golden colored flowers; scented.....Pkt. 10c

119. **Crimson Victoria**—Deep color, exquisitely scented, Pkt. 10c

493. **Mixed Varieties**—All the above and many more.....Pkt. 10c

Marvel of Peru

(Four O'clock)—Flowers open in the afternoon, hence the name "Four O'clock." Old-fashioned, but none the less beautiful. The plant is large and requires 4 feet of space; makes a pretty hedge; flowers are funnel-shaped; very fragrant.

107. **Finé Mixed**.....Pkt. 10c

Giants of California

GIANT FLOWERING PANSIES

The Pansy gives an abundance of bloom until after severe frosts, endures our hard winters with safety, and greets us in the early spring with a profusion of bright blossoms. Pansies are at their best during the cool, moist weather of spring and fall. Seed sown in the open ground in May or June will give fine blossoms in late summer and autumn, and a good crop of flowers the following season if the plants are pinched back in early spring. Seed sown in midsummer, where it can be shaded and watered, will produce plants large enough to winter nicely and come into full bloom in early spring. Young plants give the largest flowers. Old, worn-out plants should be replaced by young, vigorous ones.

135. Steele's Mastodon—A wonderful collection of rich, velvety shades, in great variety and huge in size with fine long stems and containing all Steele's newest and finest types; includes white, dark centre, dark blue centre and light blue centre, pure white, black, burgundy red, lavender, violet, light blue, bronze (new), royal purple (new), rose, cerise red, red with silver rim, mahogany, yellow (new), wine colored, red and gold, lavender and gold, tango red, new, some ruffled types, with a dozen or more variations in each color, in size measuring up to three and seven-eighths inches in diameter. We cannot recommend these too highly for outside or inside cultivation: $\frac{1}{2}$ Pkt. 30c, Pkt 50c, $\frac{1}{4}$ Oz. \$1.00, $\frac{1}{8}$ Oz. \$1.65.

394. Hercules Giant—Enormous flowers are of thick, heavy texture. The coloring and markings are widely varied, some flowers being almost self-colored in the richest tints of purple, carmine and brown, relieved by delicate shading of a brighter or contrasting color; others are boldly margined with white, cream, golden yellow or soft rose; while still others have silvery grounds, blotched at base of petals with a dark rich shade.Pkt. 25c

134. Rainbow Strain—We have boasted for many years past that our Rainbow Strain was unapproachable, that, in fact, no grower has as yet succeeded in producing a Pansy so fine in color, delicate in penciling and so uniformly large in size as our own. After repeated trials with samples from well-known specialists in Pansy-growing, we are satisfied that our Rainbow Strain still retains its superiority above all others. This mixture contains by actual count 60 distinct shades and colors.Pkt. 35c

137. Trimardeau, Mixed—Very large flowers; fine mixed.Pkt. 15c

138. Cassier's Giant, Mixed—Rich and lovely. Pkt. 25c

139. King of Blacks (Dr. Faust)—The blackest Pansy grown; nearly black.Pkt. 15c

143. Very Large Flowering, Mixed—Many colors; self, striped and spotted.Pkt. 15c

144. Finest Mixture—Twenty-five shades and colors from one of the best growers.Pkt. 15c

145. Fine Mixed—Will not produce such large and perfect flowers as No. 144.Pkt. 10c

PHLOX DRUMMONDII

The annual Phlox is a native of Texas, and is known as "Texan Pride". It occupies a first place as a garden annual, being one of the most brilliant and at the same time one of the easiest and most satisfactory plants, which can readily be grown from seed. It will grow and thrive in any kind of soil if given a sunny position, but prefers a light, rich loam. Seed may be sown in the open ground any time after danger from frost is past, and in a few weeks they are a sheet of bloom, remaining so until frost. They may be used in a variety of ways, such as a carpet to beds of Roses, in boxes, vases, etc., but it is when grown in masses, in beds or borders, that they show to best advantage.

172. Star Phlox—This variety must be regarded as decidedly unique. While the petals of all other Phloxes are entire this variety is partly fringed and partly toothed; the central teeth of the petals are five or six times as long as the lateral ones, projecting like little spines, giving the flowers a regular star-like form. The beauty of the flower is enhanced by a white margin which borders the edge of the petals. There are many distinct colors.Pkt. 10c

173. Flora Alba—Large, pure white flowers. Chaste. H. A. One foot.Pkt. 10c

175. Grandiflora Mixed—Large-flowering kind. Height, 1 foot. $\frac{1}{4}$ Oz. 65c, Pkt. 15c

176. Fine Mixed—Sixteen different shades. $\frac{1}{4}$ Oz. 50c, Pkt. 10c

PERENNIAL or Hardy Phlox

The varieties of the Perennial Phlox are among the choicest of flowers for bedding and border plants. They are hardy and need no protection, in deep, rich, rather moist ground.

177. Mixed Colors.Pkt. 15c

Phlox Drummondii

"QUALITY FIRST" IS OUR MOTTO. TRY US.

Polyanthus Portulaca

A pretty plant for borders and rockwork. Succeds well in any garden soil. H P. One foot.
178. **Fine Mixed** Pkt. 10c
(Rose Moss)—There is scarcely any flower in cultivation that makes such a dazzling display of beauty. They are in bloom from about the first of July till killed by the frost in the autumn. H. A. Six inches.

167. **Finest Single Mixed**—Splendid colors, large flowered..... Pkt. 10c
168. **Double Varieties**—These flowers are so full and perfect as to resemble tiny Roses. Toward the close of the season they will increase in size and beauty. As the full, double flowers do not produce seed, it must be saved from the semi-double flowers growing with the full-doubles. The product of that seed will produce many single flowers. As these bloom earlier they can be pulled out like weeds. When the full-doubles appear cuttings can be made from them and the bed extended indefinitely with only full-double flowers. Our strains must not be confused with the ordinary, cheap seed usually sold..... Pkt. 15c

Pentstemon

494. A Giant Gloxinia-flowered type; though perennial, these bloom early the first season from spring-sown seed. The graceful spikes, about 2 feet high, are bedecked with flowers, two inches across, from July until frost. The colors and markings are gorgeously varied from pink to scarlet and maroon, all beautifully blotched and veined with other colors; a large white throat further enlivens and intensifies the surrounding colors. They deserve a prominent place in every garden..... Pkt. 10c

←Hollyhock

Hollyhocks

The plants are stately in appearance, the flowers brilliant in color and delicate in texture. Blooming plants can be raised the first year as easily as plants of Zinnia or Marigold. All that is necessary is to start the seeds in a box in the house in February or March. About May 1st transfer to permanent place in garden, where they will produce elegant spikes of flowers in August and September; blossom freely second year also.

87. **Chater's Superb Mixed**—An unequalled mixture of 17 prize varieties..... Pkt. 10c
88. **Choice Double Mixed**—A fine collection..... Pkt. 10c
421. **Allegheny**—Flowers very large and beautifully fringed. Single and semi-double. Has a long season of bloom, and the plants are taller and less subject to rust than the double varieties. **Mixed Colors**..... Pkt. 10c
389. **Annual Everblooming**—Seeds sown in May will flower in August. Maroon, black, pink, rose, canary, yellow, crimson, apricot with garnet throat, plush with carmine lacings, white, scarlet, magenta, etc. They flower profusely until frost. Remember, these are annuals. Pkt. 10c

Poppy

Having for years been crowded out of our gardens by the swarms of newcomers and forgotten it has, nevertheless, kept pace with the march of improvement, and now comes round and surprises us with its new forms, new sizes, new colors.

154. **Dwarf Shirley**—The seedlings grow into bushy little plants about 18 inches high and all ablaze with innumerable flowers of rose, chamois, scarlet and salmon, some having a distinct light bordering to the petals, all with yellow stamens and all thrown up well above the foliage..... Pkt. 10c
156. **Golden Gate**—Striped, blotched, edged and bordered on both single, semi-double and double flowers. No sight calls forth more expressions of wonder than a large block of these Poppies, with thousands of open flowers, of which seemingly no two are alike..... Pkt. 10c
158. **Daneburg**—Double, red deep, petal marked at base with white blotch..... Pkt. 10c
159. **Carnation Flowered**—Double, of large size, and in great variety of colors. Pkt. 10c
161. **Paeony Flowered**—Size and color are equal to Paeonies. Mixed colors..... Pkt. 10c
162. **Snow Drift**—Pure white, grand..... Pkt. 10c
164. **Grandest Mixed**—An elegant mixture of standard and novel varieties..... Pkt. 10c
382. **Giant Double**—Almost every tint that one can conceive may be found in these brilliant Giant Double Poppies, and when grown in the large masses the floral panorama is of almost unimaginable beauty. They are of earliest possible culture; the seed only needs to be sown thinly in May in the garden or border where the plants are to remain..... Pkt. 10c

165. **Iceland**. (P. Nudicaule)—These are a variety of graceful, neat habit, with bright green fern-like foliage formed tufts, from which issue tender stalks about 12 inches in height, bearing yellow, white or orange scarlet flowers in endless profusion, and most useful for cutting. Mixed colors..... Pkt. 10c

166. **Oriental** (The large Oriental Poppy)—A charming, flowering hardy plant, producing numerous leafy stems about 2½ feet high, with large, deep crimson flowers, having a conspicuous black blotch on each petal, exceedingly showy..... Pkt. 10c

Ricinus

(Castor-Oil Bean)—Semi-tropical plants, grown largely for their picturesque foliage. Plants are surmounted by large spikes of flowers and brilliantly colored seed-pods. Brilliant bronzy red maroon; stalks nearly black.

179. **Borboniensis Arboreus**—Dark green foliage. H.H.A., 15 feet... Oz. 30c, Pkt. 10c
180. **Gibsoni**—Dark purplish red foliage and stem; fine for lawns, 6 feet. Oz. 30c, Pkt. 10c
181. **Campodgensis**—Palm-like leaves of bronzy-red, 6 feet..... Oz. 30c, Pkt. 10c
510. **Zanzibarensis**..... Oz. 30c, Pkt. 10c
182. **Fine Mixed**—Ornamental until destroyed by frost, 6 to 15 feet..... Oz. 30c, Pkt. 10c

Salvia

The Salvia Flowering Sage is a very ornamental plant flowering in spikes of fiery red and continues to blossom in open ground till frost, when the plants can be removed to the greenhouse and continue to bloom a long time. H. H. P. Three feet.

188. **"Bonfire"** (Clare Bedman)—This is one of the finest Salvias ever introduced. It differs from all others, growing in a compact bush about 2 feet high by 2 feet in diameter. Its erect spikes of flowers of brilliant scarlet attract immediate attention in the garden, and it is one of the most effective and gorgeous plants in cultivation.....Pkt. 15c

190. **Splendens** (Scarlet Sage)—Most gorgeous plants, with intensely vivid scarlet flowers. The flower spikes are 10 to 12 inches in length.....Pkt. 10c

191. **Patens**—The brightest and purest of all blue flowered plants. A nice contrast with the scarlet.....Pkt. 15c

193. **Argentea**—Fine, pure, white, comes true from seed.....Pkt. 10c

Scabiosa

(Mourning Bride, Sweet Scabious, Pin-cushion

Flower, etc.)—Firm favorites with many of our customers. Seed can be sown any time in the spring after danger of frost is past. They grow about 2½ feet high, and come into bloom early in July, and continue without interruption until hard frost. The beautiful flowers in exquisite shades are borne on long stems, and when cut keep in perfect condition for the best part of a week. They make effective borders or beds, and no garden is complete without Scabiosas, especially where flowers are wanted for cutting.

195. **Tall Mixed**—A splendid mixture. Height, 2 feet.....Pkt. 10c

196. **Dwarf Mixed**—Free bloomers. Height, 1 foot.....Pkt. 10c

Salpiglossis

(Or Velvet Trumpet)—

One of the most charming annual flowers whose rapidly growing popularity compels us to order larger quantities each year. When in bloom they present a marvelously rare and charming combination of grace and beauty; the mixed varieties are one glorious mass of softly blended colors. No other flowers receive greater praise than this queen of all trumpet-shaped flowers.

183. **Emperor**—A new giant-flowering race of this beautiful annual, mixed colors.....Pkt. 15c

184. **Tall Mixed**.....Pkt. 10c

185. **Dwarf Mixed**.....Pkt. 10c

Bonfire Salvia

Sweet William

Well-known, old-fashioned, sweet-scented perennial for bedding and borders forming

fine clumps in any good garden soil and lasting for several years, although many prefer planting as annuals as they bloom the first year when sown early. Sow outdoors early in the spring in rich mellow soil in rows one foot apart, thin to six inches apart in row. The old clumps may be divided, but it is generally better to grow new vigorous plants every two years.

186. **Finest Double Mixed**—Our strain is the finest.....Pkt. 10c

187. **Auricula-Flowered**—Excites praise wherever grown.....Pkt. 10c

189. **Pink Beauty**—A beautiful salmon-pink.....Pkt. 15c

192. **Scarlet Beauty**.....Pkt. 15c

128. **Carmine Beauty**.....Pkt. 15c

SUNFLOWER

490. **Red Sunflower**—The plants vary in height from five to eight feet and throw out many side branches. The flowers are very numerous, of good form, usually having large long rays and small discs. The heads vary greatly in size—some are only two or three inches across, while others are a foot or more. The color varies greatly—some plants produce flowers of a rich chestnut-red; others red flowers tipped with yellow, others washed with red. This variety in size and color makes a hedge or border of this annual especially interesting and attractive. Some few seeds will produce plants bearing yellow flowers—the bees, doubtless, have crossed some with pollen from the wild yellows. The plants likely to produce yellow flowers have no purple in stem or lead and can be destroyed when seedlings.....Pkt. 15c

212. **"Cut and Come Again"**—Exceedingly popular for display in the garden and for cut flowers; pyramidal bushes 3 to 4 feet high; the perfectly formed single flowers, 3 to 4 inches across, are borne on long stems. They are easily grown, commencing to flower in six weeks from seed.....Pkt. 10c

214. **Globe of Gold**—Unlike all others, but few flowers could be so beautiful. They form erect, well-balanced plants, not exceeding 40 inches in height. Each of the numerous branches produces large densely-double, globe-shaped flowers of deep rich golden yellow color.....Pkt. 10c

216. **Mixed**—The above varieties and others mixed.....Pkt. 10c

Verbenas

Unrivalled as low growing bedding plants. Long season of blooms. Very few plants will

make such a gorgeous display during the summer months as the Verbenas, or furnish more flowers for cutting. Start seed in the house or under glass early in the spring, and transplant after three or four inches of growth. Good healthy plants can be produced readily from seed. They flower in July, and continue strong and healthy until after severe frosts. H. H. A.

386. **Burbank's Mayflower**—Flowers are of extra large size, and more pronouncedly fragrant than in any other strain in cultivation. This strain is fully equal to the best for bedding purposes.....Pkt. 15c

220. **Moss Verbena**—This lovely variety produces a mass of moss-like foliage, spreading over the ground like a carpet, above which are borne heads of purplish blue blossoms in lavish profusion; comes into flower in June and continues until frost. For beds, baskets or rockeries it is highly desirable.....Pkt. 10c

222. **Henderson's Mammoth**—Average trusses measure 9 to 12 inches in circumference. They bloom freely, are vigorous in growth, and our mixture contains all of the beautiful new colors and shades.....Pkt. 15c

223. **Candidissima**—Immense trusses of pure white flowers; splendid bedder. Height, 1 foot.....Pkt. 10c

224. **Defiance**—Scarlet; for bedding or pots. Height, 1 foot.....Pkt. 10c

225. **Hybrida, Finest Mixed**—Superb colors; 1 foot.....Pkt. 15c

226. **Hybrida Mixed**—A very good variety. Height, 1 foot.....Pkt. 10c

Violets

217. **Cornuta Mixed (Butterfly Violet)**—Splendid variety of the "Bedding Pansy". The colors are mauve, yellow, white, lilac, blue, etc., exceedingly lovely. A group in flower looks like a mass of butterflies; easily raised from seed.....Pkt. 10c

218. **Odorata (Sweet Violet)**—Well-known fragrant, early spring blooming plants; thriving best in summer in a shady situation, in a rich, deep soil; seed takes from 3 to 6 months to germinate. Single blue and white mixed.....Pkt. 10c

Virginia Stocks

Beautiful, free-flowering annuals; desirable for beds; baskets or edgings.

219. **Mixed Colors**.....Pkt. 10c

Wallflower

Well-known hardy plant producing fragrant flowers of various colors.

227. **Double Mixed**—Grand flowers, rich colors. Height, 1½ feet.....Pkt. 10c

228. **Single Golden-Yellow**—The old-fashioned, highly perfumed variety; color, rich golden-yellow. Height, 1½ feet.....Pkt. 10c

Rainbow Corn

459. The stalks, including tassel, grow to five and a half feet tall, and are clothed with many variously variegated leaves three inches wide and two feet long. The leaves (both of main stalks and suckers) are all superbly striped with broad bands of crimson, yellow, rose, white and bronze. The small hardy seed can be planted early, and, as it does not ripen until very late, the plants present their rich tropical beauty for a long season. It is the result of long-continued painstaking care on the part of Luther Burbank, who says of it: "Beautiful as most beautiful Dracaenas. This has been on exhibition by the California Development Board during the past season, and has been the admiration of everybody. Nothing like it for decorative purposes, either for garden or for cutting." It is as easily grown as common field corn. Per Pkt. 10c, ½-Oz. 20c, Per Oz. (about 300 seeds), 35c.

STOCKS OR GILLIFLOWER

This Stock is one of the most popular annuals, either for bedding or pot culture; for brilliancy and diversity of color, fragrance, profusion and duration of bloom, it is unsurpassed. Start the seeds in February and March, and as soon as the plants have their second pair of leaves, prick out into shallow boxes and in about four weeks the plants will be ready to pot; from which they should be transferred to the open ground in May or June.

197. **Cut and Come Again**—A fine perpetual blooming stock. Its most valuable feature is that it provides flowers during September and October, when other varieties have faded. Double mixed fragrant blossoms, and is excellent for cutting.....Pkt. 15c

198. **Snowflake Ten-Week**—Large and very double, snow-white flowers, admirably adapted for forcing. H. H. A. Height, 1 foot.....Pkt. 15c

200. **Large Flowering Dwarf Ten-Week**—Mixed improved dwarf variety, increased size of bloom. Height, 1 foot.....Pkt. 15c

201. **Giant Perfection Ten-Week**—Mixed, long spikes, perfect double flowers. Height, 2½ feet.....Pkt. 15c

202. **Fine Double Dwarf Ten-Week**—Mixed, twenty-five colors. Height, 1 foot.....Pkt. 15c

203. **Dwarf Ten-Week**—Mixed. A very good mixture, about 50 per cent. double. Height, 1 foot.....Pkt. 10c

IMPROVED
LARGE FLOWERING ZINNIA

The New Giant White Moonflower

249. *Ipomaea Grandiflora*—This greatly improved variety of the popular Moonflower Vine, produces much larger flowers and in greater profusion. If grown in well enriched soil in a warm sunny location and given sufficient water while making growth, the vine will attain a height of from 30 to 40 feet during the summer season, and be covered with large green heart-shaped leaves, and will be studded from July until frost with immense saucer-shaped flowers 4 to 6 inches across and as glistening white as disks of white satin. They are also softly fragrant. The flowers open about sunset and close the next morning, though on cloudy days they remain open until noon. The effect, particularly on moonlight nights, is entrancingly beautiful. Pkt. 10c

Columbian Climber

239. The most superb of all climbers and used almost exclusively for decorating pillars, etc., at the World's Columbian Exposition, where it was the admiration of all. It is a fine, rapid grower, of easy culture, and always a mass of exquisite green, showing no bare spots. In addition to its most beautiful foliage, it produces large and handsome bell-shaped blossoms in the greatest abundance and of the most varied beauty. You cannot afford to be without this beautiful climber. Although it does grandly outside, it is also a very fine house climber and will do exceptionally well running over windows, etc. It rewards the grower with an abundance of beautiful flowers, green at first but rapidly changing to a beautiful deep violet blue. A well-established plant will run from 30 to 40 feet in a season. It grows and flourishes everywhere, and you should give it a trial, as it will not fail giving you complete satisfaction. Annual. Pkt. (10 Seeds) 10c

Chinese Lantern Plant (Physalis Franchetti)

298. The plant produces numerous large, inflated husks, much the shape of Chinese lanterns, at first a beautiful green color, changing to a yellowish hue and then to brightest scarlet, and as they hang suspended among the green foliage they present a most novel and strikingly beautiful appearance. Autumn frosts do not injure foliage or fruit, and it is a showy plant long after all others are killed. In these husks, or "lanterns," a fruit is borne much like a Winter Cherry or Husk Tomato, except that in color it is deep ruby-red, and is in every way superior to the Winter Cherry, either for cooking, preserving, or eating raw, and keeps well into the winter. Branches of "lanterns" cut and dried retain their rich and brilliant color, and make most beautiful winter bouquets when used with dried grasses or leaves. The plant grows from 1½ to 2 feet in height, clothed with luxuriant foliage, among which is suspended an abundance of bright "lanterns" all the time. An elegant pot plant. Pkt. 10c, 3 for 25c

ZINNIA

(Youth and Old Age)—One of the most brilliant and showy of annuals, and has long been a general favorite. They come in flower early in the Summer, and keep on blooming until hard frost; require little attention and succeed almost anywhere. For perfection of blossom start the seeds in March, and prick out once or twice before transferring to the open border in May or June. Provide the plants with plenty of room, at least 18 inches apart each way, and they soon completely cover the ground.

Culture—Should not be sown in the open ground before latter part of May. The best plan is to start the seeds indoors in a shallow box or in a hot bed, in a temperature of about 65 degrees. Cover the seeds to a depth of four times their size and press the surface firm with a board. Water with a fine spray. Transplant the seedlings after the second leaves form and remove to the garden when the weather is warm and settled.

229. **Improved Large Flowering. Mixed**—This is a mixture of the largest Zinnias yet obtained, plants being of vigorous growth, about three feet high and very profuse of bloom. The flowers are extremely double and very brilliant color. Pkt. 10c

230. **Crested and Curled**—Flowers are large and double, petals being twisted and curved into most graceful forms. Pkt. 10c

231. **Zebra, Mixed**—Hardly two plants produce flowers alike. Height, 2 feet. Pkt. 10c

233. **Dahlia Flowered**—New. Pkt. 15c

234. **Choice Double, Mixed**—Cannot be surpassed. Height, 1½ feet. Pkt. 10c

Chinese Wistaria

PERENNIAL

Will Last For Years

477. A very rapid grower and one of the most beautiful of all climbers. It is perfectly hardy, climbing to a height of fifty feet; when covered with bloom it is magnificent. Desirable for trellises, porches, etc. When well established it blooms perfectly. The light purple and white flowers are very showy, and are produced in long racemes. A large plant in bloom is a beautiful sight. Perfectly hardy. Pkts. 15c each

CLIMBERS

Ampelopsis

"Boston Ivy," or Japanese Ivy, is a most beautiful climber, clinging very firmly to side of a house or wall. H.P.

236. Veitchi.....Pkt. 10c

Canary Bird Flower

237. One of the most beautiful of climbers with delicate foliage and curious bright-yellow flowers, resembling the canary bird in shape and color.....Pkt. 10c

Clematis

Well-known and universally admired climbers, some of the varieties being remarkable for the beauty of their blossoms. Fine for covering arbors, verandahs, etc., as they cling readily to almost any object. Most of the kinds are hardy, herbaceous perennials, but some little protection in northern latitudes through winter is advised.

238. Choice Mixed.....Pkt. 10c

Everlasting Pea

No praise can be too high for this lovely iron-clad vine that blooms constantly from early summer until late autumn, minding neither heat nor cold, rain or drought. Easily grown, perfectly hardy, and so beautiful that we never saw a person who did not admire their cheering flowers and clear green foliage. While lacking the delicious fragrance of the sweet pea, they are equally as beautiful. They live year after year, bearing magnificent clusters of flowers. Perfectly hardy, and grows 8 to 10 feet high.

241. Mixed.....Oz. 60c, Pkt. 10c

Humulus

JAPANESE HOP. 243. Japonicus Variegatus—A strikingly beautiful annual climber of exceedingly rapid and dense growth, attaining a height of 18 to 20 feet in a few weeks' time. Leaves are rich green, blotched and marked with gray. Is fine where a quick growing and densely leaved climber is desired. Valuable for trellis and high places.....Pkt. 10c

244. Japonicus—One of the most rapid climbers grown. Seed can be sown in the open ground in spring and will attain enormous dimensions very quickly. The foliage is luxuriant, and is one of the best plants for covering verandahs and trellises; heat, drought and insects do not trouble it in the least.....Pkt. 10c

"KUDZU."

A Rare and Useful Japanese Vine.

Giant Japanese Imperial Morning Glory

Cobaea

One of the finest of all climbers, and equally good for out-of-door or for house culture. Plant seed edgewise in a moist but not wet soil, cover to prevent evaporation, and do not water again unless soil becomes very dry. When seedlings appear water with great moderation until out of the seed leaf.

240. Scandens—Bluish purple.....Pkt. 10c

Giant Japanese Imperial Morning Glory

251. The robust vines attain a height of from 30 to 50 feet. The foliage is luxuriant, distinct and varied, mostly green, but many leaves are mottled light and dark green, white and gray.

But the surpassing charm of these "Giant Japanese Imperial Morning Glories" lies in the entrancing beauty and large size of the flowers; they measure from 3 to 4 inches across. The colors of the flowers, shadings and markings, are limitless. Some flowers are of deep, rich, velvety colors, others daintily tinted and shaded. There are reds from soft rose to crimson and garnet; daintiest blue to purple; snow-white to silver-gray; new terra-cotta and coffee-colored shades. Some flowers are striped, blotched and spotted; others have magnificent edges and throats.

Mixed Colors.....Oz. 35c, Pkt. 10c

Japanese Kudzu Vine

(Jack and Bean Stalk or Japanese Kudzu Vine)—465.

An ornamental and rapid growing climber. Experience abundantly proves the Kudzu Vine to be a highly interesting novelty. It comes from Japan, the land so productive of curious and ornamental flowers. It is a beautiful climber, remarkable for its great vigor of growth and its handsome flowers. The blossoms are large and in panicles somewhat like wistaria, but larger in size and with better clusters. The color is of a pleasing shade of purple, foliage is luxuriant, somewhat like the leaf of a bean. The vine is rapid and dense in growth, making the Japanese Kudzu Vine of great value where a quickly produced shade is wanted. An eminent horticulturist and prominent landscape designer has it growing over the front of his house, and pronounces it a veritable "Jack and the Bean Stalk" vine. It is perfectly hardy, increasing in size and beauty year after year; fine for arbors, verandahs, etc.....Pkt. 10c

Wild Cucumber

262. A well-known vine, common in many sections, and the quickest climber known for covering verandahs, old trees and houses, never infested with insects and very profuse in bloom. It will sow itself and comes up every year in the same place.....Pkt. 10c

Hyacinth Bean.

Nasturtiums

(TALL OR CLIMBING)—Among the easiest grown and prettiest of climbers for fences, trellises, etc.,

quick running, 6 to 12 feet, thriving well even on poor soil. Fine bloomers, and the green seed pods make excellent pickles.

247. **Madame Gunther's Hybrids**—It is impossible to describe all the different colors, but some of the most striking are as follows: White shaded carmine; white with red blotches; shrimp pink with deep maroon throat, shrimp pink self-color; bright rose; bright yellow; orange, etc. **Oz. 30c, Pkt. 10c**

248. **Tall Chameleon**—This beautiful new variety has the wonderful property of producing flowers of many distinct colorings, upon the same plant. These flowers are variously blotched, splashed, striped and bordered in rich contrasting shades. **Oz. 30c, Pkt. 10c**

250. **"Paramount"**—We call special attention to this mixture. In it will be found all of the choicest colors of the tall Nasturtiums. The flowers are much larger than those of the old-fashioned kind, and in nearly all of them the petals overlap; while the other combinations are simply superb. **1-Lb. 60c, Oz. 30c, Pkt. 10c**

Ornamental Gourds

Queen Anne's Sweet-Scented Pocket Melon. A very curious and useful fruit. It makes a pretty vine and a very showy fruit, which has a delicious perfume; carried in the pocket or laid on the mantel it imparts a delicious fragrance; served with sugar it makes a dainty dessert. **Pkt. 10c**

473. **African Pipe Gourd**—A luxuriant, rapid-growing annual climber, adaptable to all purposes for which climbing plants are made and besides, it produces the Ornamental Gourds from which are made the African Calabash pipes, now so popular on account of their lightness, grace and meerscham coloring qualities. When grown for the production of Pipe Gourds, the vines are usually allowed to grow on the ground like Cucumbers, Pumpkins, etc., so that the fruits, in place of hanging down and growing straight, will take their natural pipe curve. Directions for growing, curing and making pipes from these Gourds are sent with every package of seed. **Pkt. 10c**

256. **Dipper**—Valuable for household purposes makes an excellent dipper. **Pkt. 10c**

257. **Japanese Nest Egg**—Resembling in color, shape and size the eggs of hens; are uninjured by cold or wet and therefore make the best nest eggs. **Pkt. 10c**

260. **Mixed varieties**—Produce all kinds of eccentric fruits. **Pkt. 10c**

Passion Flower

Its color is odd, comprising a combination of blue, pink and white, which is beautiful, very large and showy, of a feathery and velvet-like appearance. Vines begin to throw out blossoms when one or two feet high, followed in the fall by beautiful golden fruit about the size of a hen's egg. Protect in winter. 261. **Mammoth** **Pkt. 10c**

Hyacinth Bean

One of the showiest annual climbers. The vine grows about 10 feet high. The Sweet Pea-like flowers are borne in unusually long clusters, and are of the purest white and brightest purple, changing to darker shades as they age. Some of the flower stems are over a foot long, with blossoms in all stages of maturity. The flowers are followed by bronzy purple seed pods; the whole forming a mass of varied colors and beauty.

469. **"Darkness"**—Deep reddish violet. **Pkt. 10c**

470. **Daylight**—Pure white. **Pkt. 10c**

245. **Mixed**. **Pkt. 10c**

Scarlet Runner Beans

242. A great favorite in England and the Continent of Europe, not only as an ornamental climber, but for the delicious edible beans which succeed the bright scarlet sprays of pea-shaped blossoms grows 10 to 15 feet high. **Lb. 75c, postpaid: 1/4-lb. 25c Pkt. 10c.**

Cypress Vine

A slender climber of quick growth, having small, finely cut dark green leaves. Vines thickly starred with small bright-colored flowers. Very desirable for small ornamental trellises or wire supports. Seed should be sown when the trees are starting out in leaf, or farther north they may be started in boxes in March, to be planted in the garden when the trees are out in leaf. It is also a most desirable climber to plant for growing in pots indoors during winter. The graceful foliage and small, brightly colored flowers produce a charming effect when mingled with other flowering plants.

254. **SCARLET**. Intensely rich scarlet. **Pkt. 10c**

255. **WHITE**. Purest paper-white. **Pkt. 10c.**

258. **MIXED**. **Pkt. 10c; 1/2 Oz. 75c.**

Nasturtium

GIANT SPENCER SWEET PEAS

STANDARD VARIETIES AND NOVELTIES

Sweet Peas, gay and fragrant, are the most universally popular annual flowers cultivated. Inexpensive, easily and quickly grown from seed, thriving in town or country gardens, supplying an abundance of continuous bloom for months—an adornment to garden, house or corsage. Is it any wonder that they are "everybody's flowers," and have been for generations? A few years ago, a paragon type appeared in the famous gardens of Earl Spencer, Northamptonshire, England. This newcomer, extremely beautiful, the fairest-formed and largest Sweet Pea ever grown, was named "Countess Spencer, and from this has sprung the glorified modern race of **Giant Waved "Spencer" or "Orchid-flowered" Sweet Peas.**

The characteristics of the Spencer Sweet Peas, grown under congenial conditions, are: Robust growth, the plants attaining a height of from 6 to 10 feet, requiring for full development to be not less than 6 inches apart; a foot apart is better. The flowers are giants among Sweet Peas, measuring 2 to 2½ inches across. They are beautifully formed and daintily waved. Three and often four or five of these queenly blossoms are borne on long, strong stems.

HOW TO GROW SWEET PEAS

The soil for Sweet Peas should be rich and deep. A good rich loam with plenty of well-rotted manure in it, is the ideal soil for raising good plants that will produce plenty of blooms of good substance. Soils that are at all heavy are best dug in the autumn, and during the winter months a good dressing of hardwood ashes or air-shaken lime should be given it. They should be in a position fully exposed to the sunlight and air on both sides of the row.

Much depends upon the state of the weather as to when the seed may be sown out of doors; but they should be sown as early in the season as the ground can be worked, which is usually between the middle of March and the middle of April in the latitude of London. It is best to make a trench or furrow about six inches deep, in the bottom of which sow the seed. Cover with about an inch of soil, pressing it down firmly. As soon as they are above ground, thin out to two or four inches apart; when planted too close they do not attain their full development. They should be staked up either with branches of brush or stout stakes on which wire netting has been fastened. These should be at least four feet high, and five feet would be better. It is just as well to do the staking at the time of sowing.

During dry weather they should be watered thoroughly and frequently and given an application of liquid manure once a week. A mulch of hay or rakings from the lawn will be found beneficial during hot weather. The flowers should be cut as often as possible, to prevent the plants from running to seed, which would stop them from continuing in bloom.

523. **Illuminator**—A warm orange-rose self or light orange-scarlet. Very large waved flowers.

522. **Irish Belle** (Dream; Dorothy; Annabel Lee; Mrs. Reginald Hill).—Soft lilac on cream flushed pale rosy-mauved.

524. **Margaret Atlee**—Perhaps the finest of the new Spencers; immense flowers of the loveliest coloring; a rich warm salmon-pink over a body color of cream which lights up the whole flower into exquisite beauty.

525. **King Edward**—Deep, rich crimson. A strong and beautiful color—does not fade.

426. **Mrs. C. W. Breadmore**—Buff ground, edged with pink.

527. **Mrs. Hugh Dickson**—A large and fine "cream-pink".

528. **Mrs. Routzahn** (Juliet; Mrs. Henry Bell; Queen Mary)—A favorite "cream-pink"; a blending of straw color, tinted bluish-pink and rose-apricot.

529. **King White**—Remarkable for the glistening purity of its whiteness, and its perfect flowers, of gigantic size. Four flowers on a stem.

415. **Othello** (Anna Lumley; Prince of Asturias; Tom Bolton)—Rich deep maroon; immense waved flowers.

427. **Vermillion Brilliant**—Intense pure scarlet flowers of the largest size.

530. **Orchid** (Burpee's)—The flowers suggest the rich tone found only in the Cattleya orchids; they are of extra-large size, always borne three and four on long, stiff stems. Awarded Certificates.

532. **Primrose Spencer**—The waved standard measures two inches across; the color is a clear primrose.

550. **Thomas Stevenson**—The flowers of largest size and finest Spencer type, are of an intense flaming orange throughout the wide wavy standard, while the wings are rosy carmine, shaded orange.

429. **Helen Lewis** (Anglican Orange; Maggie Stark)—A very large and fine orange-rose; wings orange salmon.

SPENCER GIANT MIXTURE

520. The finest and most desirable mixture possible to put together. The acme of richness and beauty, matchless in combinations of colors and giant sweet scented flowers. Every color of the rainbow and an almost unlimited variety of shades, tones and combinations of colors, striped, splashed, mottled and margined. Nothing seems to have been forgotten. It is made up regardless of expense, the aim being to secure in this mixture the largest flowering sorts and the widest possible range of colors. Without doubt this mixture reaches perfection. It is our aim to constantly improve, when possible, by adding new varieties as they are introduced.

Pkt. 10c, Oz. 45c, ¼-Lb. \$1.40, Lb. \$4.50, postpaid.

517. **America**—The ground color is ivory white, distinctly striped with brilliant crimson red. Very attractive.

414. **Countess Spencer** (Enchantress; Paradise; Pink, Pearl)—A re-selected, improved strain of this grand original "Pink Spencer".

518. **Blue Monarch**—A splendid new dark-blue self, somewhat similar to Blue Jacket. The flowers are slightly larger and rather deeper in color.

519. **Beryl**—A lovely shade of pink, heavily suffused with salmon. The general appearance is a bright salmon pink.

521. **Elfrida Pearson**—The color is a lovely pink throughout, the buds and flowers being tinted with salmon-pink.

531. **Enchantress**—Pure pink, large flowers. One of the best.

Betty Brown Collection Giant Spencer Sweet Peas

TEN OF THE BEST NEW VARIETIES, As Described Below:
Pkt. 15c, Oz. 60c.

533. **Fiery Cross**—The famous Sweet Pea for which the originator received \$417.00 per ounce or \$1.39 per seed.

Fiery Cross has all the appearance of live fire, the color being a scorching fire-red, or scarlet. The beautifully waved and fluted flowers are borne freely in threes and fours, well placed on long, stout stems.

534. **Royal Purple**—A rich royal purple throughout, both banner and wings; the flowers are of splendid size and form.

418. **George Herbert**—Bright carmine-rose; large fine wave flowers.

535. **Constance Hinton**—A fine, large, dark seeded, white, sometimes flushed when opening.

536. **Hercules**—A giant even among the Spencers; immense long-stemmed flowers of rich clear rose-pink; vines vigorous and free-blooming.

537. **R. F. Felton**—A large and distinct lilac-colored flower, wings tinged French grey.

538. **Martha Washington**—Most beautiful; bluish white, veiled with rosy-pink deepening into a contrasting marginal zone of tyrian-rose.

539. **Wedgewood Blue**—A clear light silvery-blue with just a suggestion of mauve in the banner; an improved large flowering strain and the best variety of its color.

540. **King Manoel**—Rich glossy deep maroon, with purplish maroon wings, splendid big wide-open waved flowers.

541. **Rosabelle**—Brilliant carmine-rose colored flowers of the largest size and finest waved form. The best of the "Herbert and Ingram" color class.

One Packet each of the above ten beautiful varieties of Spencer Giant Sweet Peas for \$1.00, postpaid.

546. **BETTY BROWN MIXTURE**. Pkt. 15c, Oz. 50c, ¼-Lb. \$1.60.

GOLD MEDAL MIXED SWEET PEAS

299. All bright colors, in proper proportions, mixed from 30 standard varieties selected from the "cream of the named Sweet Peas," including both American and Eckford's varieties. A row of our mixed Sweet Peas in bloom is bright and varied in coloring and particularly pleasing, and vastly superior to many mixtures sent out. Pkt. 10c, Oz. 40c, 2 Ozs. 75c, ¼-Lb. \$1.25, Lb. \$4.00.

RED, WHITE AND BLUE SPECIAL MIXTURE SWEET PEAS

300. This is a special mixture, composed of equal parts of the best red, the best white, the best blue. The most superior mixture ever offered to the public. Pkt. 10c, Oz. 50c, 2 Ozs. 90, ¼-Lb. \$1.60, Lb. \$4.75, postpaid.

EARLY AND LONG-FLOWERING SPENCER SWEET PEAS

This new type is receiving great attention at the hands of the leading hybridizers, and it will not be long before all colors will be represented. They are already very popular and in great demand by commercial florists for forcing under the glass for Winter and early Spring blooming, but are just as valuable for the amateur for outdoor culture, coming into flower five or six weeks earlier than the regular Spencer type, and if the flowers are kept picked, continue to bloom over a period of nearly four months. We offer the following carefully selected varieties:

560. **THE PRESIDENT**—The most brilliant, rich, dazzling orange scarlet Sweet Pea in existence, equal in color to the Oriental Poppy, a robust grower, producing in abundance, flowers of largest size and best form, perfectly placed on stout stems, 16 to 18 inches long. Pkt. 25c, ½-Oz. 75c, Oz. \$1.25.

"Horticultural Advertiser" says:—"The President was the star of the lot, a glowing orange-scarlet, almost self, plenty of size and substance."

J. B. R., in "Nurseryman and Seedsman," says:—"The President was simply glorious. It is head and shoulders above anything of a similar color."

Alex. Malcolm, the noted Scotch raiser of new Sweet Peas, says:—"One thing is certain, it will be in every garden where Sweet Peas are grown, unless the grower is color-blind."

562. **YARRAWA**—This is a splendid early-flowering Spencer variety, especially valuable for Winter flowering as well as the open ground. The color is rose on first opening, changing as the flower develops to a charming combination of light pink standard and bluish wings; vigorous habit. Pkt. 15c, ½-Oz. 60c, Oz. \$1.00.

564. **ASTA OHN**—Similar to the late flowering variety of the same name, which is a beautiful lavender color and one which is very much in favor. Pkt. 15c, ½-Oz. 60c, Oz. \$1.00.

565. **RED ORCHID**—A clear self-red and a beauty; flowers extra large and three to five on a stem. Pkt. 15c, ½ Oz. 60c, Oz. \$1.00.

566. **VENUS**—White with pink edge of beautiful form, long stiff stems, large flowers and nicely waved. The Sweet Peas with the Orange Blossom fragrance. Pkt. 15c, ½-Oz. 60c, Oz. \$1.00.

567. **WHITE ORCHID**—Large flowers, never less than three to a stem, of a pearly white, beautifully waved. Pkt. 15c, ½-Oz. 60c, Oz. \$1.00.

569. **Robin Red Breast**—Bright orange scarlet, extremely free and early blooming, valuable alike for culture under glass or in the open, as it withstands the sun and weather well. Never fails to attract attention on account of its beautiful color. Pkt. 25c, ½-Oz. \$1.25, Oz. \$2.25.

570. One Packet each of the above seven beautiful Early and Long Flowering Spencer Sweet Peas sent to any address for \$1.00, postpaid.

DOMINION MIXTURE OF EARLY AND LONG-FLOWERING SPENCER SWEET PEAS

571. This mixture contains the ten varieties of this new type described above, and also other colors which we do not offer separately. These Early Varieties will produce Sweet Peas in profusion even in the open ground fully five weeks ahead of the regular Spencer and Grandiflora types. The plants come into flower when only about twelve inches high, and in the open ground never attain a height of more than three to four feet. Pkt. 15c, ½-Oz. 60c, Oz. \$1.00, postpaid.]

SOW GOLD MEDAL MIXED SWEET PEAS. THEY WILL SAY IT WITH FLOWERS.

Helichrysum or Eternal Flower
One Pkt. Each 7 Varieties Everlasting for 50c.

Everlasting Flowers

Flowers of eternal beauty—those which never fade—are offered on this page. They are unsurpassed for winter decorations, and may be made up into bouquets, baskets, vases, etc. Seed to be sown as soon as ground is warm and the weather is settled, in good rich soil, and thinned out or transplanted to 12 inches apart. The flowers should be cut as soon as they come into full bloom, tied in small bunches and dried slowly in the shade, with the heads downward to keep the stems straight. The following varieties are exceptionally beautiful, and you will do well to include them in your order.

Acroclinium

Probably the most beautiful Everlasting known. Flowers, pearly white or an exquisite soft, clear shade of pink, with bright golden centre. Half-hardy annual. Height, 1 foot.

312. **Mixed Colors**—Very fine.....Pkt. 10c

Ammobium

A very useful Everlasting Plant, robust and great bloomer. Flowers pure white and very double. Be sure to cut plenty of buds, as they dry beautifully and are useful to contrast with the full-blown flowers. Hardy annual. Height, 2 feet.

313. **Alatum**.....Pkt. 10c

Gomphrena

(Or **Globe Amaranthus**)—Remove cottony covering before planting. Plants bear great quantities of clover-like blooms, although different from any other variety and very attractive buds as well as full-blown flowers. Tender annual. Height, 2 feet.

314. **Finest Mixed**.....Pkt. 10c

Xeranthemum

Of compact habit, free flowering and of the easiest cultivation. The flowers are covered with a silvery down, and the flowers are of the prettiest colors. Hardy annual. Height, 1 foot.

315. **Choicest Mixed**.....Pkt. 10c

Helichrysum

(Often Called the **Eternal Flower**)—3. One of the most useful of all Everlastings to grow. Very hardy, blooming until late autumn. The white and light colored varieties color easily and are often dyed in shades not otherwise obtainable in Everlastings and used in wreaths, crosses and other emblems. Hardy annual. Grows 6 inches to 2 feet.

316. **Monstrosum**—Brightest colors, very large, mixed.....Pkt. 10c

317. **Double White**—Beautiful pure white.....Pkt. 10c

Rodanthe

One of the finest and most beautiful of the many varieties of Everlastings. Retains its brilliancy of colors for year.

319. **Finest Mixed**.....Pkt. 10c

Dominion Lawn Grass

Our Lawn Grass Seed is a mixture of seven varieties of grasses which our years of study and experiment have proven to be best adapted to growing together. This mixture is made by ourselves from new crop, re-cleaned pure seed of the best varieties, well suited for even and permanent growth, as good as money can buy. It cannot be excelled for producing a rich velvety lawn of beautiful dark green color. The grasses are selected so that from the earliest spring through the hot summer months until winter it will keep its rich green carpet effect. By use of this, our best mixture, your lawn will always look well.

One pound of seed will sow 300 square feet, equal to a plot 15 x 20 feet.

Time to Sow—Lawn Seed can be sown at almost any time from early spring to late in the fall, but the best time is early in the spring, or the month of October, depending somewhat on the condition of the season at the time of sowing.

No. 1.—Sunnymore Mixture—Desirable for all exposed or sunny situations. Lb. 60c, postpaid 75c; 5 Lbs. by express at purchaser's expense, \$2.75.

No. 2. Shadymore Mixture—For shady lawns; adapted for all situations where it is almost impossible to get ordinary grasses to stand. Lb. 70c, postpaid 85c; 5 Lbs. by express at purchaser's expense, \$3.25.

Putting Green Grass Mixture

A very carefully prepared mixture for use on putting greens, croquet lawns, tennis courts, bowling greens, and lawns used for clock golf. This mixture produces a very thick, soft growth, when sown on a well-prepared ground, and mowed short will allow a ball to roll in almost a direct line. We especially recommend this mixture to those who are particular to obtain the very best. Twenty-five pounds will seed a putting green 75 feet square.

Lb. 60c, postpaid 75c; by express, 10 Lbs. \$5.60, 25 Lbs. \$12.75, 100 Lbs. \$50.00.

White Dutch Clover—The Clover for Lawns: ¼-Lb. 30c, Lb. \$1.00, postpaid.

Golf Link Grass Seed. Lb. 60c, postpaid 75c, 100 Lbs. \$45.00.

GIANT DOUBLE POPPY

382. This "**Brilliant Mixture**" of new double annual Poppies is the finest that can be made; the seeds have been selected with great care from exclusively improved giant double-flowering sorts and none but the richest, most brilliant, as well as the daintiest and loveliest shades and colors, are included. The plants are sturdy, luxuriant growers, about 2½ feet high, bearing immense double flowers four to five inches in diameter, or as large as peonies. Some of the flowers have broad round, smooth-edged petals, and are of imposing effect; others have lacinated and fringed edges, which add a charming grace, but the climaxing merit of all is the wonderful variety of coloring, ranging from the most gorgeous crimson-purple to intense dazzling crimson-scarlet down through innumerable shades of carmine, rose, pink, blush, salmon, flesh to purest satin-white; many of the flowers are also striped, blended and edged with other colors. Almost every tint that one can conceive may be found in these brilliant Giant Double Poppies, and when grown in the large masses the floral panorama is almost unimaginable beauty. They are the easiest possible culture; the seed only needs to be sown thinly in May in the garden or border where the plants are to remain. **Brilliant Mixture.** Pkt. 10c.

GREENHOUSE FLOWERS

Many persons take great pleasure in growing plants from seed, and as most of these seeds are small, they require care in sowing. Most of the plants in this department come from warm, moist climates, so we must supply similar conditions artificially. To do this without a greenhouse, sow the seeds in boxes or large pots, make a compost of three parts rotted sod and one part fine sand. This makes a rich soil that will not bake. Sow the seed on the surface, then sift a little fine earth over them and water gently through a fine sprayer; lay a piece of glass over the top and put the boxes or pots where they may have ordinary warmth and light, but no direct sunlight. When the plants are up they must have a little air and sunshine, or they will become mouldy and decay near the surface of the ground. The satisfaction derived from the cultivation of house plants is not alone in seeing them bloom. There is a joy in seeing them grow and develop day by day, and the one who starts a plant from seed and rears it up to bloom gets pleasure in plant culture.

Asparagus 329. **Plumosus Namus**—This graceful climbing Asparagus has foliage finer than the most delicate fern, and will last for weeks after being cut. It is an excellent house plant succeeding under almost any conditions. Pkt. 15c

330. **Sprengeri** (Emerald Feather)—One of the best plants to grow in suspended baskets for greenhouses or for outdoors in the summer. The fronds frequently grow four feet long. Pkt. 15c

Begonias Are among the most beautiful window plants; of exceedingly easy culture, producing a profusion of elegant flowers. The seed is fine and will need great care in sowing. Plants often bloom in six or eight months from time of sowing.

331. **Tuberous Rooted, Single Mixed** Pkt. 35c

332. **Tuberous Rooted, Double Mixed** Pkt. 50c

Don't Fail to
look through

taining House
Plants.

Cyclamen

Cactus Latest craze in flowers. Very curious and odd species of plants which will thrive anywhere with little or no care. But little watering is required. The wonder and attraction of all.

333. **Choicest Mixed** Pkt. 25c

Calceolaria These belong to the showiest of greenhouse plants. Magnificently marked pocket-shaped flowers. T. P. 334. **James' Giant Strain**—The largest grown. Pkt. 50c

Centaurea (Dusty Miller)—Extensively used for margins, beds and vases.

335. **Candidissima**—Silver cut leaves, 1 foot. Pkt. 10c

336. **Gymnocarpa**—Silver gray leaves, 1 foot. Pkt. 10c

Cineraria Magnificent flowering-plant for green-houses or conservatory. Bears large clusters of flowers in shades of white, blue, etc.

337. **James' Giant Prize, Mixed** Pkt. 25c

A Collection of Cactus like this, and also many more odd and novel varieties can be grown from a packet of seed. Pkt. 25c.

Try a Pkt.
of
Cactus Seed

Cyclamen

341. **Persicum** beautifully marked. Pkt. 25c

Coleus

338. **Mammoth Rainbow**—The handsomest foliage plant obtained from seed. These Coleus are quite different from those commonly used in beds and borders, and, in fact, form an entirely new race. The plants reach a height of from two to three feet; the leaves often measure 10 inches in length, and 8 inches in width, heart-shaped and handsomely crimped, toothed and frilled; their color combinations are remarkably rich. H. H. P. Pkt. 25c

Chrysanthemum

Chrysanthemum seed grown in the spring will produce large and vigorous plants in the fall, which will give a profusion of fine flowers, even more than old plants. The great beauty of a collection of seedling Chrysanthemum cannot be appreciated until it is seen.

339. **Finest Show Varieties**—The chrysanthemum of the exhibitions. Pot or borders. Height, 3 feet. H. P. Pkt. 25c

340. **Finest Japanese Variety**—A novel section with large blossoms diffusely formed. Height, 3 feet. H. P. Pkt. 25c

Calceolaria

Charming bulbous rooted plants, with beautiful foliage and rich-colored orchid-like fragrant flowers. Favorites for winter and spring blooming. H. H. P.

Giganteum—Flowers of extraordinary size; foliage, Pkt. 25c

Ferns

Ferns are exquisite for table or drawing room decorations. Wardian vases, hanging basket for rockeries. Spores are very fine and should be surface sown on sifted soil and covered with glass. If sown in shallow pot saucers, necessary moisture can be supplied by placing a saucer of soil inside of a larger saucer that has been filled with tepid water.

342. **Finest Varieties, Mixed**.....Pkt. 20c

Fuchsia

The Fuchsia is as easily grown from seeds as from cuttings. From seed many new varieties are obtained. Flowers freely the first year in the open ground, while plants can be taken in the house in the winter, where they will flower still more freely. The seed offered has been saved from the very finest single and double varieties. H. H. P.

343. **Choicest Mixed, Double and Single**.....Pkt. 20c

Grevillea Robusta

(Or Silk Oak) 344. One of the quickest growing of ornamental house plants. It is easy to manage, grows rapidly from seed, pretty in all its stages of growth. Its long drooping, silky foliage reminds one of a palm or fern.....Pkt. (20 Seeds) 15c

Gloxinia

Lovely pot plant, easy to grow and care for. The handsome, bell-shaped flowers embrace a great variety of the richest and most beautiful colors, ranging from pure white to dark blood-red, pink blush, lavender, indigo blue, marble and spotted. Blooms in 4 or 5 months. Tender perennial.

345. **Large Flowering, Mixed**.....Pkt. 35c

Silk Oak

Fuchsia

Impatiens

One of the prettiest plants for pot culture and also outdoor planting in a half-shaded situation; remarkable for long blooming.

347. **Sultani**—Rosy carmine flowers; distinct and beautiful plants for window culture, splendid in garden.....Pkt. 25c

Lantana

Very rapid growing, with large heads of variously colored flowers, emit a powerful aromatic perfume; continually changing color.

348. **Choice Mixed**—White, rose and yellow; parti-colored blossoms. H.H.P. Pkt. 15c

Smilax

No climbing plant in cultivation surpasses this for graceful beauty of foliage. In cut flowers and for wreaths, etc., it is indispensable to florists. Its hard texture enables it to be kept several days after being cut without wilting.

353. **Boston Smilax**.....Oz. \$1.00, Pkt. 15c

Primroses

GIANT FRINGED CHINESE (*Primula Sinensis Grandiflora Fimbriata*)—Chinese Primroses are among our finest winter and spring blooming pot plants; of healthy sturdy growth, 8 to 12 inches high, and free from insects; while they produce for weeks large trusses of flowers, which, in our new Giant varieties, averages from 4½ to 6 inches in circumference.

350. **Giant Single, Mixed Colors**.....Pkt. 25c

349. **Giant Double, Mixed Colors**.....Pkt. 35c

Primula Obconica Gigantea

351. These "Ever-flowering Primroses" are favorite pot plants for house and conservatory. The Chinese Primroses will have to look to their laurels, for this new giant Obconica race is looming up in size of flowers, many of them measuring 1½ inches across, equalling in dimension those of their Chinese rivals, with the added merit of being easier grown and having a longer duration of bloom. Several colors in mixture, white, crimson, rose, violet, lilac, pink-eyed sorts, etc.....Pkt. 25c

Giant Flowering Heliotrope

466. The flowers are borne in graceful clusters and are very fragrant; blooms the whole season. It grows quickly and easily from seed, doing best in a rich soil. One of the best strains known among heliotropes, bearing flowers of immense size and of richest beauty and fragrance. The colors range through all the shades of blue, from violet to indigo. The great trusses of floral heads are sometimes a foot across, and are magnificent in appearance. In wide favor, both for open air culture and for winter gardening. This strain has become immensely popular.....Pkt. 15c

446. Our School Garden Flower Mixture has now become so well known that it will sell on its merits to all who have tried it and seen it. It has interested thousands and proven a revelation to all who have grown it by the great variety of flowers it contains. It embraces not only all the popular annuals best known in this country, but a great many rare and new sorts gathered specially for this mixture from all parts of the earth. It is no exaggeration to say that it would be impossible to take a \$2.00 bill and buy flower seeds in separate packages representing one-half the real value of the seed contained in this mixture. This mixture, wherever grown, attracts so many inquiries and has proven such a novelty, that for advertising purposes it is worth a good deal to us, and we want to place it as widely as we can. It is of such unprecedented value for the money that every one who receives this catalogue should at least try a package of this school garden flower mixture. Your money back if you write us before January 1st, 1923, that it has not proven all and more than you expected. **TRY IT THIS YEAR. ONLY 25c FOR LARGE PACKAGE.**

APPEALING
TO ALL
LOVERS
OF
BEAUTIFUL
FLOWERS

SPECIAL MIXTURES OF FLOWER SEEDS

Many persons derive pleasure from watching the growth of a varied bed of flowers entirely out of the usual trim garden style, while others desire a much more extended collection than their means will permit. To both of these the following SPECIAL MIXTURES will prove exceptionally desirable.

TALL GROWING ANNUALS

354. This mixture embraces seed of many of the handsomest annuals—all tall growing varieties of superior merit—none less than one foot high and many growing five to six feet high. The pleasing effect and profusion of flowers which this desirable collection will give is indescribable, particularly for back grounds, borders and mass bedding.....**Liberal Pkt. 15c**

MIXTURE OF LONG-STEMMED FLOWERS

355. This mixture is composed of annual flowers that have long stems, being the most suitable varieties for cutting for vases, etc. They also make a brilliant showing in the garden.....**Liberal Pkt. 15c**

LOW GROWING ANNUALS

356. This mixture contains seeds of the greatest number of low-growing annuals ever blended. Few exceed four or six inches in height, and when sown in beds or border present the appearance of rich-colored Turkish rugs, carpeting the ground in their wide range of colorings and forms, so beautifully that nothing more remains to be desired. By all means do not overlook this when making out your order.....**Liberal Pkt. 15c**

MIXTURE OF FRAGRANT ANNUALS

357. Carefully prepared from seeds of fragrant flowers only. A bed of these will really give an unlimited amount of pleasure and perfume throughout the day and evening, while many of them are suitable for cut flower purposes. Try this mixture and you will be repaid many times over for the time and money which you expend on it.....**Liberal Pkt. 15c**

MIXTURE OF CLIMBERS

358. This is a liberally filled packet of seed of many beautiful annual climbers, which will prove most useful for covering outhouses or growing upon trellises.....**Liberal Pkt. 15c**

EVERLASTING AND ORNAMENTAL GRASSES

359. All the annual varieties of each, many of them being really handsome in growth and all of them desirable for house decoration during the winter months.....**Liberal Pkt 15c**

MIXTURES OF BIENNIALS AND PERENNIALS

360. The great variety contained in this mixture will make a grand display the second year, and many of them will bloom year after year.....**Liberal Pkt. 15c**

WILD FLOWER GARDEN MIXTURE

361. These mixed flower seeds embrace more than a hundred varieties of such easy-growing and pretty flowers as are suitable for forming a wild flower garden. They are very useful for woodland walks, roadside, railroad embankments, and for sowing alongside of fences and on any untidy bare spots of ground which are so frequently unsightly, and which if properly cared for and kept free from weeds, can be made to produce a continual display of bloom during the summer.....**Liberal Pkt. 15c**

All of the above mixtures are carefully prepared from choice, fresh seeds, and cannot fail to give satisfaction. The packets are liberally filled, and in no other manner can so many seeds be obtained for such small cost.

IT WILL ALWAYS BE OUR ENDEAVOR TO PLEASE.

The Home Vegetable Garden

The cultivation of a home garden, no matter how small, is of profit in both an economical sense and as a matter of healthfulness and pleasure. In these days when one hears at every turn and meets on every hand the evidence of high living costs, is opportune to turn attention to items on which it is possible to cut expense. Plant a garden. Table necessities such as Beans, Radishes, Spinach, Potatoes, Lettuce, etc., at the cost of a few cents for seed, the expenditure of a little time otherwise wasted, you can produce these things yourself.

CONDITIONS OF SALE—Dominion Seeds, Limited, gives no warranty, expressed or implied, as to description, quality, productiveness, or any other matter, of any seeds, bulbs, plants, etc., they send out, and they will not be in any way responsible for the crop. All seeds bought from them must be accepted on these conditions.

Seeds Prepaid by Mail Please bear in mind that the price in the following list include payment of Parcel Post charges by us on all seeds offered by the packet, ounce, quarter pound, or pound, unless otherwise noted. Thus you have only to send the catalogue price, and we **guarantee safe delivery**. If you wish goods sent by Express or Freight, and will pay charges on arrival, please deduct 10c per pound from post-paid prices.

Order Early Please order as soon after you get this catalogue as possible, and then you will have your seeds at hand when you want them; besides, if you want heavy seeds in large quantities they can be sent by freight very cheaply.

Avoid Mistakes When making out your order for garden seeds, do not be influenced by bulky catalogues, impossible pictures and extravagant description. Common sense is said to be the best manner the gardener can use, and it commences in the selection of seed. Use your common sense and don't be influenced by statements which won't bear the test of the garden.

Market Gardeners Or other planters requiring larger quantities of seeds than are here offered are invited to write for our **SPECIAL LIST**. This list we cannot send to private gardeners even if they apply for it, as it is intended only for those who grow for market. In writing, please state whether you are a market gardener, florist or dealer in seeds.

ASPARAGUS (French—Asperge) **Leviathan** The King of All Asparagus.—It

is superior in every way; larger, earlier, a strong, quick grower, a more prolific and continuous yielder, the stalks large and uniform under ordinary culture, average nearly an inch in diameter, retaining their thickness up to their plump tips. Bunches of 15 shoots measure 13½ inches in circumference and weigh about four pounds. Pkt. 10c, Oz. 25c, 2 Ozs. 40c, ¼-Lb. 65c, Lb. \$2.00.

Columbian Mammoth White Pure white, requires no artificial blanching. Pkt. 10c, Oz. 20c, 2 Ozs. 35c, ¼-Lb. 50c, Lb. \$1.60.

Palmetto Shoots are very large and light green, also tender and very desirable. Pkt. 10c, Oz. 20c, 2 Ozs. 35c, ¼-Lb. 50c, Lb. \$1.60.

ASPARAGUS ROOTS A saving of two or three years is effected by planting roots. Those offered below are select, strong, two-year-old roots, and we are confident they will please you in every way.

Don't be misled by planting one-year-old or inferior roots. **Columbian Mammoth White, Palmetto, Leviathan, Doz. 45c, 25 for 75c, 50 for \$1.35, 100 for \$2.50, postpaid.** Special prices on 1,000 or more on application. By express, per 100, \$2.00.

BRUSSELS SPROUTS (French—Chou de Bruxelles) Plant in rich soil in hills and thin to one plant to the hill. One ounce to 2,000 plants.

"Dalkeith Park" Furnishes a supply of this most delicious of vegetables during fall and early winter, for the plants are hardy and maintain their sprouts even during quite severe weather; in fact, frost greatly improves the quality and flavor. Pkt. 10c, Oz. 60c, 2 Ozs. \$1.10.

Improved Dwarf Pkt. 10c, Oz. 75c, 2 Ozs. \$1.25.

SCOTCH KALE (French—Chou vert frise) Plant the larger sorts in hills two by three feet apart, and thin to one plant to the hill. Select deep rich soil, and cultivate same as cabbage. The tender leaves are used as cabbage. One ounce to about 2,000 plants. **Dwarf Curled** Pkt. 10c, Oz. 50c, 2 Ozs. 90c.

BROCCOLI (French—Chou Broccoli) The Broccoli are closely allied to the cauliflower family; so nearly that the White Cape variety is sometimes classed with cauliflower. They require similar cultivation and treatment. Large and very white. Pkt. 10c, ½-Oz. 90c, 1 Oz. \$1.50.

Improved White Cape Pkt. 10c, ½-Oz. 90c, 1 Oz. \$1.50.

Cress Triple Curled (PEPPER GRASS) Grows very quickly and readily from seed sown thinly in drills during the spring, summer and fall months. The leaves are finely curled and quite ornamental in appearance. The flavor resembles that of mustard. Pkt. 10c, Oz. 20c, ¼-Lb. 50c, Lb. \$1.25, postpaid.

Leviathan Asparagus.

NO ONE CAN GIVE YOU BETTER SEEDS THAN WE CAN.

BEANS---DWARF, SNAP AND BUSH

(French—Haricot Main)

Select light, warm soil, and plant when danger of frost is past in the spring in drills $2\frac{1}{2}$ to 3 feet apart in the drill and covering 1 inch deep. Keep the ground clean and loose by frequent hoeing, but do not draw the earth around the plants. Avoid working among the vines when they are wet, as it will tend to make them rust. One quart to 150 feet of drill. Two pounds of beans to one quart.

We pay postage on beans at price quoted up to 5 pounds. At 10-lb. prices, if wanted by mail, add 60c.

Good as Gold

A prolific and continuous bearer. The first in spring—the last in fall. Absolutely stringless very tender and of delicious flavor.

The crowning merit of this grand Bush Bean is in the rich, golden yellow pods, which are of immense size, thick, broad, extra long, very uniform in shape, solid, meaty, and of high quality, meltingly tender and having a delicious flavor exclusively their own; moreover, the pods are absolutely stringless and entirely free from any tough, membranous lining, not only when young, but this tender "snap brittle" quality is retained even into maturity.

In addition to its many merits as a "snap" bean, one lady draws our attention to the fact that she "finds it is most excellent shelled after it is ripe for winter use."

This variety, while unrivalled in its class for the home garden, will be in great demand among market gardeners, who will find that its handsome appearance and luscious quality "hold their customers." Price: Pkt. 10c, $\frac{1}{4}$ -Lb. 20c, Lb. 60c, postpaid; 5 Lbs. \$2.00, 10 Lbs. \$3.75.

GOOD AS GOLD

HENDERSON'S BOUNTIFUL BEAN

A FLAT GREEN-PODDED BUSH BEAN

A Prolific and Continuous Bearer. The First in Spring, the Last in Fall. Absolutely Stringless. Very Tender.

This superior variety is a distinct improvement in green Bush Beans. The plant is remarkably handsome and of thrifty growth, being practically rust and mildew proof. It is very hardy, extremely early, very prolific and bears continuously for several weeks; it is the first to give pods fit to pick in the spring, and the last to yield edible pods in the fall. But the crowning merit of this grand Bush Bean is in the rich green pods, which are of immense size, thick, broad, extra long, very uniform in shape, solid, meaty and of high quality, meltingly tender and having a delicious flavor exclusively their own. Moreover, the pods are absolutely stringless and entirely free from any tough, membranous lining, not only when young, but this tender "snap brittle" quality is retained even into maturity. We advise leaving a few of the older pods to be used as green shell Beans, in which condition they are most palatable. It is equally valuable as a dry shelled Bean. Pkt. 10c, $\frac{1}{4}$ -Lb. 20c, Lb. 60c, postpaid; 5 Lbs. \$2.00, 10 Lbs. \$3.75.

Wardwell's Kidney Wax A very popular, early, gardener's variety. Pods large, $5\frac{1}{2}$ to 6 inches long, moderately stout, straight and flat, fleshy, brittle, fine-grained and nearly stringless. Of good quality and very attractive. Pkt. 10c, $\frac{1}{4}$ -Lb. 20c, Lb. 60c, 5 Lbs. \$2.00, 10 Lbs. \$3.75.

Pencil Pod Black Wax The best of the dwarf, black wax varieties. Early and productive. Pods large, $5\frac{1}{2}$ to 6 inches long, round, nearly straight and crease-backed; strictly stringless, free from fibre, fleshy and brittle, of highest quality; color, very clear yellow. Pkt. 10c, $\frac{1}{4}$ -Lb. 20c, Lb. 50c, 5 Lbs. \$1.75, 10 Lbs. \$3.25.

Golden Eye Wax Rust proof, very hardy, early and prolific. Pods large, yellow, 5 to 6 inches long, flat and almost straight. Pkt. 10c, $\frac{1}{4}$ -Lb. 20c, Lb. 60c, 5 Lbs. \$2.00, 10 Lbs. \$3.75.

Golden Wax Probably the most popular of the wax varieties and one of the best. Early and productive; pods 5 inches long, very stout, slender, straight and round; very tender, fine-grained, good quality and attractive. Makes an excellent canning sort. Pkt. 10c, $\frac{1}{4}$ -Lb. 20c, Lb. 60c, 5 Lbs. \$2.00, 10 Lbs. \$3.50.

Longfellow A very excellent variety of French origin. Moderately early and productive. Pods dark green, $5\frac{1}{2}$ to $6\frac{1}{2}$ inches long, very slender, straight and round; very tender, fine-grained, good quality and attractive. Makes an excellent canning sort. Pkt. 10c, $\frac{1}{4}$ -Lb. 15c, Lb. 40c, 5 Lbs. \$1.75, 10 Lbs. \$3.25.

POLE OR RUNNING BEANS (French—Haricot a Rames) Set the poles three by three or four feet apart, and plant six to eight beans round each pole, thinning to four healthy plants. They require the same soil and treatment as the dwarf varieties, with the exception that they crave stronger soil and do best in a sheltered location. One quart to 150 poles.

Kentucky Wonder Vine vigorous, climbing well and very productive, bearing its pods in large clusters; blossoms white, pods green, very long, often reaching 9 to 10 inches; nearly round when young and crisp. Has no equal. An early and very profitable sort, with showy pods which are most excellent for snaps. Pkt. 10c, $\frac{1}{4}$ -Lb. 20c, Lb. 60c, postpaid; 5 Lbs. \$2.00.

Scarlet Runners A popular English bean; very ornamental climber and a grand cooker. Pkt. 10c, $\frac{1}{4}$ -Lb. 25c, Lb. 75c, postpaid. 5 Lbs. \$3.50.

"IMPROVED" BUSH LIMA BEANS

The pods are truly enormous in size, borne abundantly and well filled with handsome beans, which are both larger and thicker than those of the Burpee's Bush Lima, and fully eight days earlier. It differs from the best strains of Burpee's Lima in having uniformly much larger pods, producing more beans, while both pods and beans are not only larger in size, but also considerably thicker. The growth is even more vigorous, with heavier foliage. The plants are uniformly upright. Full-grown bushes measure 30 inches in height and 24 inches across the top. The blossom-bearing stalks are thrown well out from the foliage, and the pods are borne frequently in what might be called "clusters" of from five to eight. The pods measure five to six inches long by one and one-quarter inches wide. Even when of full size, the enormous beans are of most luscious flavor; they are thin-skinned and truly delicious. Per Pkt. 10c, $\frac{1}{4}$ -Lb. 25c, $\frac{1}{2}$ -Lb. 45c, Lb. 75c, 5 Lbs. \$3.25.

ENGLISH BROAD BEANS

This class is very hardy and will stand frost. They should be planted as early as possible after the ground is open, in drills two feet apart and four inches apart in the drills. A strong, heavy soil suits them best.

Taylor's Improved Broad Windsor—A splendid, most robust and wonderfully prolific variety, which appears to miss mildew and the attacks of the bean aphid better than any other broad bean now in cultivation. The pods, which are produced in the utmost profusion, are very large and handsome, each containing from six to eight large, thick, and very fleshy beans of the most delicious flavor and of the deepest and most attractive green color when cooked. It is undoubtedly the most valuable variety yet offered. Pkt. 10c, $\frac{1}{4}$ -Lb. 25c, Lb. 75c, 5 Lbs. \$3.25.

WE ISSUE A PRICE LIST FOR MARKET GARDENERS AND FLORISTS. WILL ONLY BE SENT ON APPLICATION.

BEET

(French—Batterave)

Select a deep, rich sandy loam and manure well with decomposed compost. Sow in drills 14 to 16 inches apart and cover one inch deep. When the young plants appear, thin to four or five inches apart. For early use sow as soon as ground can be worked in the spring, for autumn use about the middle of May, and for winter use about the twentieth of June, according to variety, the long varieties requiring more time to mature than the round early kind. One ounce will sow 50 feet of drill. When sown late, increase the quantity of seed. To preserve during winter cover with earth to keep from wilting. When cooking boil new beets one-half hour and old ones two hours or more.

Black Knight The Ideal Table Beet, fine-grained, rich, red flesh, exceedingly tender, remarkably early. Combines more good qualities than any other round beet.

The Black Knight is a thoroughbred in every respect, running remarkably uniform in shape and size, with smooth, dark red skin, small leaves closely set in the centre and a small, slim tap-root. The flesh is fine-grained and tender, free from woddiness and of a delicious sugary flavor; color rich red. The roots remain in fine condition a long time after maturity. We cannot too highly recommend our Black Knight Beet to customers wanting the best extra early beet. Pkt. 10c, Oz. 25c, 2 Ozs. 45c, ¼-Lb. 75c, Lb. \$2.25.

London Market One of the best for general cultivation. It is symmetrical in form with a few fibrous roots and small top. It is larger than Egyptian, age for age, and continues to grow for a long period, making a large beet for autumn or winter use. Only one sowing is necessary to produce early beets for market and a main crop for winter use. Both the inside color and outside color is deep blood red. Pkt. 10c, Oz. 25c, 2 Ozs. 45c, ¼-Lb. 75c, Lb. \$2.25.

Dirigo Turnip A critical comparison between the Dirigo and Crosby's Egyptian, raised side by side, is what customers want, as these two beets are competitors for the early market and altogether a most desirable variety for the market gardeners, combining those most desirable qualities, color, shape, size and earliness. Pkt. 10c, Oz. 20c, 2 Ozs. 35c, ¼-Lb. 60c, Lb. \$1.50.

Extra Early Egyptian.

Black Knight

Detroit One of the very best sorts for home or market garden and for canning purposes. Roots uniformly smooth, of medium size, and globe shaped; skin dark red, flesh solid vermillion red. Our special stock of this variety shows little, if any, white zones. Tops are small, upright, dark green shaded red. Pkt. 10c, Oz. 20c, 2 Ozs. 35c, ¼-Lb. 60c, Lb. \$1.50.

Extra Early Egyptian One of the very earliest, with small top; roots, distinctly flat and moderately thick, very dark red; flesh dark purplish red, zoned a lighter shade. Pkt. 10c, Oz. 20c, 2 Ozs. 35c, ¼-Lb. 60c, Lb. \$1.50.

Crimson Globe A late or main crop variety, medium in size, globe shaped; flesh deep purple, slightly zoned; foliage small, dark bronze. Pkt. 10c, Oz. 20c, 2 Ozs. 35c, ¼-Lb. 60c, Lb. \$1.50.

Crosby's Egyptian We have an unequalled strain of this superb, extra early sort. Roots a flattened globeshape; skin very dark red, flesh a trifle lighter in color and lightly zoned; tops small. Pkt. 10c, Oz. 20c, 2 Ozs. 35c, ¼-Lb. 60c, Lb. \$1.50.

Eclipse An early variety with small tops and medium-sized, round bright, deep red roots; flesh bright red, zoned pinkish-white. Pkt. 10c, Oz. 15c, 2 Ozs. 25c, ¼-Lb. 45c, Lb. \$1.35.

ASPARAGUS BEET or Summer Spinach

A distinct vegetable and much superior to the common beet for greens and equal to spinach. Sown early in the spring in rows 16 inches apart, and the seedlings afterwards thinned out to 6 inches in the row, it makes rapid growth of leaves and is fit for use for greens sooner than any other variety. For summer use we consider it much superior to spinach, because it can be cut throughout the entire summer and fall, when no spinach is to be had. It is of almost the same flavor and is much easier to wash and prepare for the table, a fact which every housewife knows how to appreciate. Later the leaves grow very large, with broad, flat, beautiful, white, wax-like stems and mid-ribs, which may be cooked like asparagus, or made into most attractive pickles. Pkt. 10c, Oz. 20c, 2 Ozs. 35c, ¼-Lb. 60c, Lb. \$1.75.

SPINACH BEET

Giant Lucullus The stalks are as thick and broad as rhubarb. The plants grow to a height of from 2 to 2½ feet and the stalks are from 10 to 12 inches long below the leaf. These stalks are delicious when cooked, and should be served in the same manner as stewed celery and asparagus. The leafy portion of the "Giant Lucullus" is heavily crumpled or savored and is very crisp and tender. The leafy portion of the foliage is cooked and served in the same manner as spinach. Price, Pkt. 10c, Oz. 25c, 2 Ozs. 45c, ¼-Lb. 70c, Lb. \$2.00.

Spinach Beet

TEACH THE CHILDREN TO LOVE NATURE BY GIVING THEM A FLOWER GARDEN THIS YEAR.

Danish Ball-Head

Early Winnigstadt One of the best for early or late use; heads fine, hard-grained, cone-shaped. Pkt. 10c, Oz. 60c, 2 Ozs. \$1.00, ¼-Lb. \$1.75.

Mammoth Red Rock The best, largest and surest heading red Cabbage. Used mostly for pickling. The plant is large, with several spreading leaves. The head is large, round, very solid and of deep red color, averaging from ten to twelve pounds in weight. Pkt. 10c, Oz. 60c, 2 Ozs. \$1.00, ¼-Lb. \$1.75.

Danish Ball-Head, or Hollander, Short Stem It is the most solid and compact-headed Cabbage we have ever grown. Its keeping qualities are something wonderful, coming out of the pit in April as solid and clean as when put away in the fall. It has been selected and perfected for more than fifty years by the Danish gardeners. They prize it so highly that they grow it almost exclusively for winter cabbage, annually export large quantities to London, Paris and other cities. It will stand long journeys and keep far into the spring, and is of a most mild and rich taste. Heads round as a ball, of good size, solid and very fine-grained. Has but few outer leaves, thus admitting to close planting. Medium-size and hardest of all, tender and crisp, with but little waste heart. Pkt. 10c, Oz. 75c, 2 Ozs. \$1.25, ¼-Lb. \$2.00.

Improved Large Drumhead Savoy The best variety of Savoy or crumpled leaf Cabbage. The plant is vigorous, with short stem, has densely crumpled leaves and when touched by frost is sweet, delicate and delicious. The head is large and very solid. Pkt. 10c, Oz. 50c, 2 Ozs. 90c, ¼-Lb. \$1.60.

Glory Large, early, white, solid. For two seasons at our Glen Maple Gardens, this new cabbage from Holland attracted the favorable comment of every visitor by its absolutely uniformly, large, solid heads. It is very early, but at the same time making fine large, ball-shaped heads, particularly attractive for market purposes. Owing to its very rapid growth, the leaves are very tender, thin-ribbed and fine-grained. The centre is white with very few outer leaves. Pkt. 10c, Oz. 80c, 2 Ozs. \$1.50, ¼-Lb. \$2.50.

Early Stonehead The large solid head is of a very distinct growth and appearance. It is exceptionally robust and hardy—well-adapted both for an early summer crop and for late planting for fall and winter. The heads, each "solid as a stone," are particularly valuable for shipping. Pkt. 10c, Oz. 60c, 2 Ozs. \$1.00, ¼-Lb. \$1.75.

Autumn King, or World Beater Probably the largest of the cabbage family; late, flat and requires good, strong soil to head well. Pkt. 10c, Oz. 60c, 2 Ozs. \$1.00, ¼-Lb. \$1.75.

Charleston, Large Wakefield About one week later than Early Jersey Wakefield, but the pointed heads are fully one-half larger. Pkt. 10c, Oz. 60c, 2 Ozs. \$1.00, ¼-Lb. \$1.75.

Danish "Red Eclipse" This grand novelty is the third distinct variety of cabbage that we have introduced from Denmark. It produces round or ball-shaped heads of great solidity and intensely deep rich coloring. The plant is of strong, compact growth. The heads are perfectly round from 6 to 8 inches in diameter. The leaves composing the head are of an unusually deep purplish red; this rich coloring extends to the centre of the head, showing only a small portion of white when cutting across the veins and tissue. The extra dark coloring, remarkable hardness and large size of heads make it an excellent market type, as well as most desirable for the housewife in slicing for slaw, salads, etc. Pkt. 10c, Oz. 75c, 2 Ozs. \$1.40, ¼-Lb. \$2.50.

CELERY Sow the seed (which is slow to germinate) from about February 20 to April 20 in shallow boxes indoors or sow in a finely prepared seed bed out of doors in April in straight rows so that the small plants may be kept free from weeds. See to it that the seed is not covered too deep and that the bed is kept moist, almost wet, until the seeds germinate, as plenty of moisture is essential to get a satisfactory growth. The seeds will not germinate well if planted in a hotbed or where subjected to a temperature above 60F. When the plants are one to two inches high, thin out and transplant.

Golden Self-Blanching (Paris Golden Yellow) This is the best celery for early use. It is in condition as early in the fall as any and we have yet to find an extra early sort equal in quality and appearance to our stock of Golden Self-Blanching. Critical gardeners generally depend upon our stock to produce their finest early celery. Plants of medium size, compact and stocky, with yellowish green foliage. It has handsome color, crispness, tenderness, freedom from stringiness, and fine nutty flavor. Our seed of this is selected French-grown. Pkt. 25c, ¼-Oz. 60c, ½-Oz. \$1.00, Oz. \$1.75.

Giant Golden Heart Constitutes the great bulk of main crop celery that is produced in all sections of Canada. Of a waxy, golden-yellow color; the stalks are cylindrical in shape and most solid and crisp in quality. Pkt. 10c, Oz. 75c, 2 Ozs. \$1.25.

Selected White Plume By tying or simply drawing the soil up against the plants and pressing it together, the work of blanching is completed. Early, of good flavor and fine texture; adapted to fall and early winter use; a good keeper up to the holiday season. Pkt. 10c, ¼-Oz. 45c, Oz. 75c, 2 Ozs. \$1.25.

CABBAGE (French—Pomme de Chou)

The early sorts bear planting from 18 inches to 2 feet apart in the rows, with rows from 2 to 2½ feet apart; the large varieties to be from 2 to 4 feet apart in the rows, with the rows from 2½ to 4 feet apart, but the largest varieties can be planted at the last distance named and do well. One ounce to about 2,000 plants.

Jumbo (Private Stock)—We dispose of an immense quantity of this excellent cabbage, and from the multitude of testimonials we have received regarding this variety, we are led to believe that our efforts in introducing this grandest of all varieties are truly appreciated. It is grand—simply eclipsing everything of its kind in the market—999 out 1,000 plants will produce marketable heads which are of mammoth size (often reaching the sensational weight of 60 pounds), sound, solid, and of the most delicious flavor, crisp and white. It never bursts; has but few outside leaves, and is the best winter keeper. We control the complete stock of this variety. Pkt. 10c, Oz. 75c, 2 Ozs. \$1.25, ¼-Lb. \$2.25.

Early Spring Extra early, round flat head with few outside leaves, permits planting close. Pkt. 10c, Oz. 60c, 2 Ozs. \$1.00, ¼-Lb. \$1.75.

Early Summer Heads large, round and very compact; ten days later than Jersey Wakefield; one of the earliest large heading varieties. Pkt. 10c, Oz. 60c, 2 Ozs. \$1.00, ¼-Lb. \$1.75.

Early Jersey Wakefield The most widely known and popular early variety; heads cone-shaped and very solid. Pkt. 10c, Oz. 60c, 2 Ozs. \$1.00, ¼-Lb. \$1.75.

Golden Self-Blanching

GOLDEN SELF-BLANCHING (PARIS GOLDEN YELLOW) CELERY IS AHEAD OF ALL OTHERS.

CAULIFLOWER

CULTURE—For spring and early summer crop sow in March or early in April in hotbed, and transplant to cold frame when sufficiently large, and to open ground as soon as hard freezing is over. The soil should be like that for cabbage.

Snowball Our stock of this is grown especially for us and there is no better strain offered, no matter under what name or how high in price. It is the heaviest header, and is compact and solid.

The nearest to perfection in Cauliflower that has been yet attained. The surest header of them all. Its dwarf habit and short outside leaves allow planting very close together—you can get more heads off a given space than any other variety. It is early and well adapted for forcing. It is also valuable when grown for later use. The best for the Market Gardener.

Pkts. 25c, ¼-Oz. \$1.50, ½-Oz. \$2.50, 1 Oz. \$4.50, and 2 Ozs. \$8.00.

Danish Giant

Or Dry Weather

The heads are extra large in size, pure white and very solid. It is about ten days later than the Snowball, but has proven much more desirable for growing in the open ground and does well in dry seasons when other varieties show failure, keeping plump and fresh during the hottest, driest weather. Pkt. 25c, ¼-Oz. \$1.50, ½-Oz. \$2.50, Oz. \$4.50.

"Best of All" Although no surer to head than Giant White Pearl, it is earlier, which is a great advantage, especially to the market gardener. It keeps solid and crisp a long time after being cut. Pkt. 25c, ¼-Oz. \$1.50, ½-Oz. \$2.50, Oz. \$4.50.

Giant White Pearl (Private Stock)—One of the best early, large growing kind—forms a large head which is solid, crisp and tender, and will form heads under conditions more unfavorable than any other sort. Pkt. 25c, ¼-Oz. \$1.50, ½ Oz. \$2.50, Oz. \$4.50.

Extra Early Paris Similar to Paris Forcing, but larger and later. Pkt. 10c, Oz. \$2.50.

CUCUMBERS

The vines require a warm location. Plant after the ground has become warm in hills, three feet apart for the smaller varieties and five feet for the large sorts. Manure with ashes, guano, or some well-rotted compost, working the manure just under the surface. Sprinkle the vines with plaster or air-slacked lime to protect from bugs. The frame cucumber can be successfully grown in the open air in this country by giving them a well-sheltered location, plenty of manure, and having hills six by six. One ounce for fifty hills. Two or three pounds per acre in drills.

The following varieties, postage paid, at Pkt. 10c, Oz. 25c, 2 Ozs. 45c, ¼-Lb. 75c, Lb. \$2.25.

Satisfaction Twelve to fourteen inches long; very solid, smooth and early; a gem as a slicer. This is a stock of cucumber upon which we have spent much time. The seed we offer is our very own growing and the selection is from the finest types only. The value of it to market gardeners and greenhouse men who desire a uniform, deep green, extra long cucumber will be appreciated as soon as tried. It is a beauty in color, a rich dark green extending from tip to tip, and holding its own for weeks after the cucumber has reached its growth. Very symmetrical in shape, good size from 12 to 14 inches in length, while many specimens grow larger, its beautiful solid fruit (with hardly any seed cavities), makes it a perfect gem as a slicer, and in its earlier stages of growth it is an ideal pickler. While picking it, the remark was often made by the pickers, "There is some satisfaction in picking these."

Klondike This valuable variety is one of the best for slicing. The color is rich dark green, and the fruits grow to a uniform size, measuring about seven inches in length and two inches thick when in good condition for use.

Extra Early Siberian This has proved to be the earliest in cultivation, producing climbers 5 inches long in fifty-five days.

Japanese Climbing While all other cucumbers are running vines, yet this variety is much more creeping or climbing in its habit; so much so that it quickly climbs on poles or trellises in the same manner as the Pole Lima Bean. It is entirely distinct. The quality is splendid. It is well adapted for pickling as well as for salads. The great advantage of having a cucumber which can be trained on a pole or a fence will be apparent to all.

Parisian Prolific Pickling Decidedly the best of all in quality for pickling. The fruit is of an unusually dark green color, so deep that no coloring matter is necessary in preparing them for the pickling market. Very crisp and tender.

Extra Early

Green Prolific

This fine cucumber grows from 12 to 16 inches or more in length, and is of superior quality. The young fruits are very largely used for pickling; one of the most productive varieties in cultivation; has for many years been decidedly popular with thousands of our customers.

IXL Improved

Long Green

Our stock produces very handsome dark-colored cucumbers, which excel in crispness and flavor all others. A peculiar feature of this strain is the evenness of size, form and color of the cucumbers throughout the entire crop; they sell at fancy prices in the market early in the season. We annually supply many of the largest growers of cucumbers in Canada with this seed.

Arlington White-Spined

Our stock produces very handsome dark-colored cucumbers, which excel in crispness and flavor all others. A peculiar feature of this strain is the evenness of size, form and color of the cucumbers throughout the entire crop; they sell at fancy prices in the market early in the season. We annually supply many of the largest growers of cucumbers in Canada with this seed.

English Forcing Cucumbers

We wish it distinctly understood that the following varieties are only for forcing, viz.: Grown under glass, either in hotbeds or greenhouses. Being very expensive, the packages contain but very few seeds.

Lockie's Perfection A remarkably productive variety, bearing fruit 15 inches in length, perfect models in shape, high quality, Pkt. 25c.

Improved Telegraph Will produce perfect fruit; nine days in advance of all others; of good color, handsome form and fine flavor. Pkt. 25c.

Snowball Cauliflower

CARROT

CULTURE—For the best results the soil should be well worked to a good depth. For early use sow seed in rows 15 inches apart as early in the Spring as the soil can be worked, sowing about 4 pounds of seed per acre and cover the same with $\frac{1}{2}$ -inch of soil; but for main crop, sow about corn planting time, using 3 pounds of seed per acre and the seed should be covered with nearly an inch of soil. One ounce of seed will sow 100 feet of drill. Make the rows two feet apart to allow for horse cultivation. Keep free from weeds and cultivate occasionally until the roots are large enough for table use, and if grown for commercial purposes they may be cultivated with profit throughout the season.

When the plants are 3 ins. high, thin to 3 ins. apart in the row.

Rubicon Half-Long The best in shape, and its deep, orange-colored flesh the finest in quality of all. The strain was selected and perfected by a well-known market gardener and attain such uniform shape that they are almost exact duplicates of each other. Pkt. 10c, Oz. 25c, 2 Ozs. 40c, $\frac{1}{4}$ -Lb. 75c, Lb. \$2.25.

Peer of All (Private Stock).—This is certainly the best main crop carrot. It is one of the most uniform in shape, core small and very tender, and there is no indication of woody character at any stage of its growth. It is also entirely free from any coarse, rank flavor, so common with many sorts, invaluable to market gardeners. Pkt. 10c, Oz. 25c, 2 Ozs. 45c, $\frac{1}{4}$ -Lb. 75c, Lb. \$2.25.

Rubicon Half Long

Chantenay

Peer of All

Oxheart or Guerande

Chantenay Half Long

Excellent medium early half-long stump-rooted variety; roots about 6 inches long, very thick, smooth and of a deep orange-red color. Pkt. 10c, Oz. 20c, 2 Ozs. 35c, $\frac{1}{4}$ -Lb. 60c, Lb. \$2.00.

Danvers Half Long

The best-known second early, half long sort; roots 6 to 8 inches long, tapering to a blunt point; flesh deep orange, tender and good quality. Pkt. 10c, Oz.

20c, 2 Ozs. 35c, $\frac{1}{4}$ -Lb. 60c, Lb. \$2.00.

Oxheart or Guerande Mature Roots $4\frac{1}{2}$ to 5 inches long, very stout and thick, ending in an abrupt, small tap root; small top. Pkt. 10c, Oz. 20c, 2 Ozs. 35c, $\frac{1}{4}$ -Lb. 60c, Lb. \$2.00.

CELERIAC or Turnip-Rooted Celery

CULTURE—Sow the seed at the same season and give the same treatment as common celery. Transplant the young plants to moist, rich soil, in rows 2 feet apart and 6 inches apart in the row. Give thorough culture. As the roots are the edible portion of

this vegetable, it is not necessary to earth up or handle it. After the roots have attained a diameter of 2 inches or over, they will be fit for use. To keep through the winter, pack in damp earth or sand and put in cellar or leave out of doors, covering with earth and straw, like beets or carrots.

Large, Smooth Prague An improved form of turnip-rooted celery, producing large and smooth roots, which are almost round and with very few side roots. Plants vigorous; with large, deep green foliage. Pkt. 10c, Oz. 60c, 2 Ozs. \$1.00.

EGG PLANT

Plant the seed in March in a hot bed, or for family use in flower pots in a warm window. (French—Aubergine). Transplant in open ground after the weather has become warm and settled, in rows 2 feet apart each way. They require a rich soil and as favorable a locality for warmth as the garden will afford. One ounce to fifteen hundred plants.

Black Beauty

The earliest and best of all large fruited egg plants. Pkt. 15c, $\frac{1}{4}$ Oz. 50c, Oz. \$1.75.

New York Improved Purple

Best in cultivation, early and a fine quality. Pkt. 10c, $\frac{1}{4}$ -Oz. 40c, Oz. \$1.50.

CORN

Do not plant before the ground has become warm—nothing is gained by it. Drill cultivation is more profitable than hill cultivation. The smaller varieties may be planted with the drills $2\frac{1}{2}$ feet apart and the stalks thinned to 10 inches apart; the larger sorts should have the drills 3 to 4 feet apart and the stalks a foot apart in the rows. Use some rich manure in the drills. Frequently stir the earth around the roots by hoe or cultivator, but do not draw it up about the stalks. One pound for 100 hills, 4 or 5 grains to each hill, 10 pounds to the acre.

NOTE—When comparing prices on Sweet Corn, Beans and Garden Peas, please remember we pay the postage up to 5 pounds.

DeLue's Golden Giant

THE SWEETEST SWEET CORN ON EARTH

DeLue's Golden Giant excels all other early varieties in size, productiveness and quality, and all of the late varieties in quality and early maturity. It is the one corn for the market gardener who wants the greatest amount of the highest quality corn in the shortest period of time from the smallest piece of land. It is because of the extreme tenderness, combined with the exquisite rich sugary flavor, that the Golden Giant has become the standard of perfection for sugar corn, and when you consider that its admirers report that it is **one or two weeks earlier and two or three times as large** as its own parent, the Golden Bantam, of **better quality, deeper color and more productive**, you may be sure that it has well earned the title of "The New Master of the Fields."

No other variety needed—if you want the best, and only the best, all you have to do for early, medium and late sweet corn, is to plant DeLue's Golden Giant every week or ten days from the time when both the air and ground become warm until within sixty-five or seventy days of killing frost.

Prices: 2 Ozs. 25c, 4 Ozs. 40c, 8 Ozs. 65c, 1 Lb. \$1.00, 5 Lbs. \$4.00, 10 Lbs. \$7.00. The following varieties, postage paid, at Pkt. 10c, $\frac{1}{4}$ -Lb. 20c, Lb. 50c, 5 Lbs. \$2.25, 10 Lbs. (by express) \$3.25.

Golden Bantam Customers say it is the finest extra-early sweet corn they have ever grown. Although the dry grain is entirely free from any flinty glaze, it is exceptionally hard and firm; hence can be planted earlier than any other true sweet corn. The ears, 5 to 7 inches in length, have eight rows of broad grains, extending to the extreme rounded tip.

"First of All" (Private Stock)—Earlier than the Cory. Thousands of our customers speak in the highest terms of this incomparable sweet corn. From three days to a week earlier than Cory; an essential boon to market gardeners. An excellent feature is both its white cob and white kernel, while all other so-called "First-of-All" have red kernel and white cob. The quality is most superior, very excellent, and surpassingly sweet. You cannot help being pleased.

Mammoth White Cory The earliest and best of all extra early sweet corn. Ears 12 to 14 rowed, 6 to 7 inches long, very sweet, tender and white. Stalks about 4 feet high, usually producing two large handsome ears on each stalk.

Black Mexican A medium early, highly esteemed by many on account of its remarkable sweetness. Ears, large, well-filled with eight rows of large grains, which are a deep bluish-purple.

Stowell's Evergreen (Private Stock)—There was never, and we believe there never will be a better late sweet corn than Stowell's Evergreen. It really needs no description, as the "oldest inhabitant" has either grown a crop or has made a meal on this old favorite.

Early Evergreen A valuable sort, maturing a few days earlier than Stowell's. Ears nearly as large, about 7 inches long, 14 to 16-rowed; grains somewhat narrower than Stowell's; very productive and high quality.

Special Prices on Larger Quantities on Application.

POP-CORN, Leading Varieties

POP-CORN should be found in every garden, especially if there are children to enjoy it during the long winter evenings, which bring young people together for social amusements. It is a fact not generally known that pop-corn pops best when more than one year old, and that when well popped it becomes twenty times its natural size; thus, a pound will make nearly a bushel of popped corn. Did you ever try to pop corn as a money-maker?

Black Beauty Fine variety. The stalks average 3 to 4 ears each, from 5 to 6 inches long; kernels blue black. Pkt. 10c, $\frac{1}{4}$ -Lb. 15c, Lb. 40c.

Mapledale Prolific Prof. R. L. Wetherell states, "I selected on my Mapledale Fruit Farm this year 10 stalks with 121 ears or an average of 12 ears to a stalk." Pkt. 10c, $\frac{1}{4}$ -Lb. 15c, Lb. 40c.

One Packet each of above two Pop-Corns for 15c.

Hulless Pop-Corn—See Page 6 Novelty List.

KOHL RABI or Turnip-Rooted Cabbage

(French—Chau Rave)

Prepare ground as for cabbage, then plant about the first of June, in rows 2 feet apart, thinning plants to 12 inches in the row. To preserve over winter, treat as turnips. When young, their flesh is tender and resembles a fine Rutabaga, with less of the turnip flavor to which many object. One ounce to 2,000 plants.

Early White Vienna The earliest and best Kohl Rabi. Pkt. 10c, Oz. 60c, 2 Ozs. \$1.00.

Purple Goliath The largest of all; fine for table or feeding stock. Pkt. 10c, Oz. 60c, 2 Ozs. \$1.00.

CITRON

Red-Seeded (For Preserving)—Striped and marbled with light green. Pkt. 10c, Oz. 25c, 2 Ozs. 40c, $\frac{1}{4}$ -Lb. 75c, Lb. \$2.00.

Colorado (For preserving)—Very large, often weighing 25 pounds each; flesh firm and solid; color pale green. Pkt. 10c, Oz. 25c, 2 Ozs. 40c, $\frac{1}{4}$ -Lb. 75c, Lb. \$2.00.

LETTUCE

(French—Laitue)

Lettuce covets a rich and rather moist soil. The rows should be about twelve inches apart, and the plants thinned from eight to ten inches apart. for the heading varieties. When heads are not desired it may be grown in a mass. The more rapid the growth the better the quality. Some varieties are peculiarly adapted for early culture, others for summer growth. One ounce for three thousand plants.

Immensity This grand lettuce is claimed to be without exception the very largest lettuce in cultivation. Notwithstanding its great size it is tender, sweet and crisp. It produces a fine large, solid head, often 12 inches in diameter. It has great heat resisting qualities, being slow to run to seed, so that it is very reliable for a late crop when many other sorts are unfit for use. Do not be prejudiced on account of the great size of Immensity, as it is not coarse, even the outer leaves being tender. Pkt. 10c, Oz. 50c, 2 Ozs. 90c.

Iceberg A large, crisp cabbage heading variety; head, very firm and hard and well-blanching; leaves unusually broad and somewhat blistered and crumpled; color light green with faint brown tracing on the border. Pkt. 10c, Oz. 30c, 2 Ozs. 50c, ¼-Lb. 90c.

Improved Hanson One of the most reliable, sure-heading sorts; heads globular, large and late; leaves large and very broad, fairly blistered and crumpled, borders fine frilled; hot season better than most sorts and is

Immensity

color clear light green; quality good. A fine variety for midsummer planting outside, as it withstands the a slow seeder. Pkt. 10c, Oz. 30c, 2 Ozs. 50c, ¼-Lb. 80c.

Grand Rapids (Selected Stock). The favorite loose-leaved forcing lettuce. Leaves short, spatulate in shape, excessively blistered and crumpled, and the border heavily fringed; color very light green with no trace of brown. A most handsome and attractive lettuce of good quality. Our stock of Grand Rapids is unsurpassed. Pkt. 10c, Oz. 35c, 2 Ozs. 60c, ¼-Lb. 85c.

Black-Seeded Simpson The most popular sort of all the non-heading varieties. One of the best for use under glass, as well as for early outdoor planting. The plants form large, loose heads, outer leaves a light yellowish green, with inner leaves blanching almost white. Resists the heat. Pkt. 10c, Oz. 30c, 2 Ozs. 55c, ¼-Lb. 75c.

Mammoth White Cos. The immense heart is crisp, tender and excellent in flavor; habit, quite self-folding. It might, however, be well to tie it, as they sometimes do in England, making it heart and blanch. Pkt. 10c, Oz. 35c, 2 Ozs. 65c.

ENDIVE Also called Winter Lettuce—For early use sow as soon as the ground can be worked in the spring, in drills 15 inches apart and thin plants six or eight inches in the row.

Any common garden soil will do, but a rather moist situation is preferable. To blanch the leaves, gather them carefully together when perfectly dry, and tie with matting or any soft fibrous material. Another method is to invert flower pots over the plants. The leaves are very highly esteemed for use as salads. One ounce for three thousand plants.

Green Curled The hardest variety grown; beautifully curled, tender and crisp. Pkt. 10c, Oz. 25c, 2 Ozs. 40c, ¼-Lb. 60c.

CHICORY (French—Chicoree) Pursue the same manner of cultivation as for carrot. If to be used as a salad, blanch the leaves by covering so as to exclude the light. If raised for its root, dig about the same time as carrots, wash the roots then, slice either way, and dry thoroughly by artificial heat.

Large Rooted or Coffee. Used as a substitute for coffee. Pkt. 10c, Oz. 50c, ¼-Lb. \$1.50.

Pure Culture Mushroom Spawn A very superior article, made in this country from carefully selected spawn, which we know is much more vigorous than the imported article, and will produce Mushrooms of a very superior quality and flavor.

GROWING MUSHROOMS IS NOT DIFFICULT—Get Reliable Spawn, Start Right and the Results are Certain and Profitable.

No expensive equipment is, or ever will be, necessary for the propagation in money-making quantities. Professional growers have had much to do with spreading the idea that process and equipment are both costly. The plain fact is that anyone who starts right can grow Mushrooms successfully. An abandoned outhouse, or waste space in one, a shed, a basement or a cellar can be used for growing Mushrooms.

Mushrooms can be grown in tubs, in flats, but the culture requires careful attention and the temperature of the room must be kept at an unhealthy degree. A city man, however, can dig a "dug-out" on the north side of his house, roof it over with rough boards and grow enough Mushrooms for home use. If he wants to roof over a part of an old deserted quarry he can grow Mushrooms for the market. Contrary to popular belief, the culture of Mushrooms in a cellar is healthful. They absorb all the moisture and keep the cellar dry and the air pure.

Standard Bricks Inoculated from a pure culture transfer. Per brick, 50c, postpaid; 3 bricks \$1.25, postpaid. By express at purchaser's expense, doz. \$3.50.

Direct Bricks Inoculated direct from the pure culture as raised in the laboratory without intermediate transfer. Per brick 60c, postpaid; 3 bricks \$1.50. By express at purchaser's expense, per doz. \$4.00.

Pamphlet on Mushroom Culture free with each order for one brick.

THE BEST SEEDS ARE NONE TOO GOOD FOR OUR CUSTOMERS.

MUSK MELON

Select warm and light soil; a poor warm soil is better than a cold rich one. Thoroughly work the soil; manure with a rich compost, having hills six feet apart for musk and eight or nine for water melons.

Do not excavate the hills, but work the manure just under the surface, as the roots of all vines naturally seek warmth. Pinch the more vigorous vines from time to time, and work in manure or fertilizer between the rows. Plant a dozen or more seeds in each hill, but do not leave over two or three plants. One ounce to 100 hills, 3 pounds to acre.

Extra Early Knight An extremely early medium-sized melon of the Acme type. Fruit oblong, skin deep green, turning to golden at maturity, well covered with a close gray netting and distinctly ribbed; flesh fairly thick and very sweet, color medium green blending to light pink near the centre. The earliest high quality melon for the north and a good shipper. Pkt. 10c, Oz. 30c, 2 Ozs. 50c, $\frac{1}{4}$ Lb. 75c.

Osage, or Miller's Cream A rather large, main crop, oval melon of very superior quality; fruit dark green, slightly ribbed and well covered with a shallow, gray netting; flesh rich orange-salmon, exceedingly thick, with a small seed cavity. One of the very best melons we grow. Pkt. 10c, Oz. 30c, 2 Ozs. 50c, $\frac{1}{4}$ Lb. 75c, Lb. \$2.00.

Extra Early Hackensack Produces melons two weeks earlier than the well-known Hackensack; heavily netted, and has light green flesh of most delicious flavor; will keep in good condition for several days after picking. Large, fine form; grown for the home and garden very extensively. Pkt. 10c, Oz. 30c, 2 Ozs. 50c, $\frac{1}{4}$ Lb. 75c, Lb. \$2.00.

Pollock's Solid Rock It has the heaviest, thickest flesh and the smallest seed cavity of all the Rocky Ford Musk Melons. It is a wonderful producer and a profitable market sort. Our seed is direct from headquarters, grown in Rocky Ford, Colorado. Pkt. 10c, Oz. 30c, 2 Ozs. 50c, $\frac{1}{4}$ Lb. 75c.

Tip Top (Melody)—In shape varies from round to slightly oblong; rather large in size and somewhat late in maturing. Skin pale green, slightly ribbed and lightly netted; flesh rich, deep salmon, sweet and spicy. Pkt. 10c, Oz. 30c, 2 Ozs. 50c, $\frac{1}{4}$ Lb. 75c, Lb. \$2.00.

Defender The fruit is medium-sized, oval in shape, slightly ribbed. The flesh is firm, fine-grained, rich, deep yellow. Vines are vigorous and very productive. The fruit, because of the hard, firm rind, keeps and bears shipment remarkably well. Pkt. 10c, Oz. 30c, 2 Ozs. 50c, $\frac{1}{4}$ Lb. 75c, Lb. \$2.00.

Mixed Varieties Best varieties of green, salmon and yellow-fleshed. Pkt. 10c, Oz. 25c, 2 Ozs. 45c, $\frac{1}{4}$ Lb. 65c, Lb. \$2.00.

HONEY DEW MUSK MELON

THE GREATEST MELON SENSATION IN YEARS
Flesh Two or Three Inches Thick, Highly Flavored, Sweet as Honey, Edible to the Rind.

This new melon has caused a sensation among dealers in fancy fruits and vegetables, and the demand for it during the past season has been exceedingly heavy, melons selling readily at a price of fifty to seventy-five cents each. It is unlike the ordinary musk melon or canteloupe, both in appearance and flavor, the outer skin being smooth and hard, nearly white, turning to a lemon tint when fully ripe. The melons are large, weighing from eight to ten pounds each, round to oval in shape, extremely thick meat and have a very small seed cavity; flesh is light green, very solid and of a rich honey-like flavor, luscious and juicy, much more so than any variety of musk melon. The vines grow coarse and heavy, withstanding weather conditions better than the ordinary musk melon and are very productive. It is also an excellent keeping melon, and fruits may be laid away for use late in the fall when they will be greatly appreciated not only for their delightful flavor, but because the other varieties of melons are gone. Pkt. 10c, $\frac{1}{2}$ Oz. 25c, Oz. 40c, 2 Ozs. 70c, $\frac{1}{4}$ Lb. \$1.20, Lb. \$3.50.

WATER MELON

The following varieties: Pkt. 10c, Oz. 25c, 2 Ozs. 40c, $\frac{1}{4}$ Lb. 75c, Lb. \$2.25.

Cultural directions same as Musk Melons. If very large fruit is required, pick off all but one melon. One ounce will plant about forty hills; five to six pounds to the acre.

Black Boulder Enormously productive, reaching a mammoth size, melons weighing from 75 to 90 pounds are frequent; almost black skin. Flesh bright red and firm. It cuts equal to any market melon and is fast becoming one of the leading melons.

Halbert Honey Shape oblong, well filled to the ends, skin very dark green, showing a faint tracing or indentation in the rind; medium early and fairly large; flesh crimson and very sweet. Kleckley's Sweets is quite similar, though more pear-shaped.

Monte Cristo Medium to large in size, medium early and exceedingly sweet; oblong in form, slightly tapering towards the stem end; rind very dark green; flesh very bright rich red and ripens nearly to the rind; white seeded.

Hungarian Honey A superb early variety, uniformly globe-shaped and of a solid, dark green color; flesh brilliant red, ripening clear to the rind and of the highest quality; seeds brown and very small.

Fordhook Early An extra early variety of fine quality and fair size; form round to oblong; skin dark green mottled with a darker shade; flesh bright red; seeds white.

Gilbert's Success Medium early, very productive, uniformly large; flesh bright red, firm and sweet. Time for ripening 90 days, average weight 35 to 40 pounds.

Cole's Early One of the finest for the amateur and the home market. It is not only the earliest variety in cultivation, but continues to bear enormously throughout the season. Flesh, deep red and of extremely delicate texture, sweet, juicy and delicious.

Mixed Varieties This mixture contains some of the best varieties in cultivation, averaging as high as 30 to 35 pounds in weight.

Prices for more than one pound will be quoted on application.

MUSTARD White London, Pkt. 10c, Oz. 20c, 2 Ozs. 35c, $\frac{1}{4}$ Lb. 60c, Lb. \$1.75.

RELIABLE ONION SEED

(French—Oignon)

"ONION CULTURE,"
By Greiner.

Price, 85 cents.

ONION SEED

Shorter in supply than for the past 15 years. European Onion Seed of American varieties is of No Use for Canada. Good, first-class onion seed cannot be sold at less than our price, and we don't believe our customers want to trust European-grown Onion Seed. Cheap Onion Seed is dear at any price.

OUR UP-TO-DATE YELLOW GLOBE DANVERS. Its Equal has never been grown.

Large onions can easily be grown the first year from the seed by obtaining our seed, which is grown by ourselves or by competent growers especially for us, and is all new crop. It won't pay you to use the cheap, imported grown seeds, which produces a large portion of scullions and onions that will not keep well. Poor seed, even as a gift, is the dearest the planter can use. We want you to try our seed, and have, therefore, put the price down to as low a rate as good, reliable seed can be sold for. Onions do best on a rich loam, previously cultivated for two years. Stiff clay and light sand are equally unfavorable. The land should be highly fertilized with well-rotted manure, complete fertilizers, etc. Fresh stable manure has a tendency to produce soft onions. Drill in 4 to 5 pounds of seed per acre, one-half inch deep. Six bushels of our Rosedale, or ten bushels ordinary sets will plant an acre. See page 45 for description and price. Fine marketable size onions (according to variety planted) are easily produced the first year from early, spring sown seed. Culture should be frequent though shallow. The same ground may be used for onions season after season if well fertilized annually. Bone meal is an excellent fertilizer. Winter storage demands dryness and protection from sudden changes.

Dominion Up-to-Date Yellow Globe Danvers

This is the most perfect type of the globe-shaped onions ever offered. We have been years in perfecting this strain carefully, selecting the most perfect type of bulbs for seed stock, so we have an onion entirely different from the ordinary Yellow Globe Danvers. It ripens early, has a very small neck, the entire crop dying down at one time. It is an immense cropper and will yield more marketable onions to the acre than any strain we are acquainted with. Of symmetrical shape, large size, average specimens weighing from one to two pounds each. The bulbs are very choice, fine-grained, exceptionally mild and very early. It is a grand, magnificent keeper. In many sections it will find ready sale at much higher prices than any other variety. This strain is now as near perfection as an onion can be brought, and as it costs us twice as much to produce this seed as we can buy ordinary eastern-grown seed for, we cannot sell it as cheap as ordinary stock. We have a good thing in onion seed, and we know it; if you buy some you will know it. Pkt. 10c, Oz. 30c, 2 Ozs. 50c, ¼-Lb. 90c, Lb. \$3.25; by express or freight at purchaser's expense, 4 Lbs. or more, \$3.00 per Lb.

Selected Yellow Globe Danvers

With the exception of our "Up-to-Date," this is the finest all-round onion grown. The enormous quantities annually shipped to market prove its popularity, and it is more largely grown than any other variety. We take unusual precautions to maintain the highest degree of perfection in our stock, and can confidently claim superiority for it. The shape is round, a little depressed at top and bottom. The color is a rich, brownish yellow, making a most attractive bulb. It is medium-sized, but remarkably solid and heavy, producing an immense weight per acre. It can be used to great advantage from the earliest date to the last, and it is one of the surest keepers and is delicious, even in its youngest stage. Pkt. 10c, Oz. 25c, 2 Ozs. 45c, ¼-Lb. 80c, Lb. \$2.75.

Southport

Yellow Globe

The bulbs are a true deep globe, having a small neck and a heavy, thick skin which makes it an excellent storage sort; the color is a deep yellow. The flesh is white. Pkt. 10c, Oz. 30c, 2 Ozs. 50c, ¼-Lb. 95c, Lb. \$3.25.

Southport Large Red Globe

The finest type and most popular of the red onions. The bulbs are distinctly globe-shaped with a small neck, and are excellent keepers; color a deep purplish red. We have an unequalled strain of this variety. Pkt. 10c, Oz. 35c, 2 Ozs. 60c, ¼-Lb. \$1.00, Lb. \$3.75.

Try White Bunch Onion if you are fond of early green onions

Extra Large

Red Weathersfield

A magnificent strain, far surpassing the ordinary Red Weathersfield in size, productiveness and keeping qualities. Of the finest form, skin deep purplish red. Pkt. 10c, Oz. 30c, 2 Ozs. 50c, ¼-Lb. 90c, Lb. \$3.15; 4 Lbs. or more by express at \$3.00 per Lb.

Extra Early Barletta

This distinct variety is the earliest onion in cultivation; very mild and delicate in flavor; its extreme earliness makes it very valuable for early table use, as well as bunch onions for the market. Exceedingly valuable for pickling purposes. Pkt. 10c, Oz. 40c, 2 Ozs. 75c, ¼-Lb. \$1.25, Lb. \$4.00.

True Paris Silver-skin Pickling

Without doubt the best of all the varieties for pickling purposes. It grows rapidly but remains small, and is of the mildest possible flavor, making the most desirable of all onions for this purpose. Pkt. 10c, Oz. 40c, 2 Ozs. 75c, ¼-Lb. \$1.40, Lb. \$4.50.

White Bunch Onion

Mr. Greiner, the great horticultural writer, had this to say about this bunch onion: "We put about ten stalks to the bundle, or twice as many as found in the average bunch in the market. We could have disposed of a good many more than we did, even in our local market. Where the plants stood fairly thick in the row (as thick as we should aim to have them,) and as we can get them by sowing 6 to 8 pounds of seed to the acre, on rich ground, we made four dozen bunches from six feet of row, being 14 inches apart. When a spot of ground 14 inches wide by 6 feet long brings one dollar, you can easily figure out that the acre rate is fully \$6,000, less than one-tenth of which goes for labor in preparing (cleaning and bunching) the product for market." Pkt. 10c, Oz. 35c, 2 Ozs. 65c, ¼-Lb. \$1.20, Lb. \$3.50.

Growers who grow Onions in large quantities had better ask us for special prices, mentioning kinds and quantities of seed wanted

Foreign or Italian Onions

Milder in flavor than the American varieties and well adapted for market or home use. In order to get very large onions the first season, start the seed in February, either in the greenhouse, hotbed or in the house in boxes and transplant in the open ground as early as they can be planted out. Put out about six inches apart in rows.

Spanish King Or Prize-Taker

The handsomest Yellow Globe Onion. This is the large beautiful onion that is seen every fall on sale at the fruit and grocers' stores in the large cities. The outer skin is a rich yellow color, while the flesh is white, sweet, mild and tender. The Prize-Taker grows always to a perfect globe shape. The necks are very small, and the onions always ripen up hard. The flavor is mild and delicate, making it a favorite for slicing for salads. It is of immense size, measuring from 12 to 16 inches in circumference, while under special cultivation specimen bulbs have been raised to weigh from 4 to 6 pounds each. In order to get the largest onions and the best results, the seed should be sown very early in the house or hotbed and transplanted out in the open ground. We do not dispute of their being grown 4 to 5 pounds each the first season from the seed in some localities (as advertised by some house), but our own repeated trials prove conclusively to us that it cannot be done in this part of the country unless sown as directed above. The same applies to all sorts of Italian onions. Genuine Prize-Taker cannot be offered at less than the following: **Pkt. 10c, Oz. 25c, 2 Ozs. 45c, ¼-Lb. 85c, Lb. \$3.00.**

Ailsa Craig

Flavor mild; size immense; solid and heavy, beautiful yellow color; flesh snow-white, solid to the core. Twelve bulbs have been grown to weigh 42½ pounds. While attaining an immense size, from 1½ to 2½ pounds at maturity, it is solid to the core—one of the most desirable points in large varieties. Another year's experience with Ailsa Craig Onion convinces us that its good qualities have not been over-estimated. **Pkt. (sufficient to sow 25 feet) 10c, Oz. 45c, 2 Ozs. 80c, ¼-Lb. \$1.50, Lb. \$5.00.**

Mammoth Silver King

Attractive form, flattened, thick but through. Single bulbs often attain weight of 2½ to 4 pounds each. The skin and flesh are white and of a particularly mild and pleasant flavor. Matures early and is of uniformly large size and perfect form, and will bring a large price in the market. **Pkt. 10c, Oz. 30c, 2 Ozs. 55c, ¼-Lb. \$1.00, Lb. \$3.75.**

One Packet each of above three Giant Italian Onions for 25c.

ONION SETS

London and its immediate vicinity produce probably nine-tenths of the Onion Sets grown in the country. Because of our direct seed selling relations with the growers we are in a position to supply the very best possible at the lowest market price, and we carry in our warehouse a good supply of the following varieties:

ROSEDALE YELLOW DUTCH SETS

English Multipliers Or Potato Onion—For green onions: ½-Lb. 20c, Lb. 35c, 2 Lbs. 60c, 5 Lbs. \$1.40, postpaid. **Market Gardeners and Others Requiring One Bushel or More, Please Ask for Prices.**

WHY PLANT ONION SETS? Because they produce directly an onion ready for market or the household from Four to Six Weeks Earlier than can be done by the sowing of the seed and the product of the set is identical with that of the seed.

This gives the market gardener ample time to sell his entire crop at a high price, besides enabling him to sow for another crop the same year.

ONION SETS are subject to market changes, and while we shall try to maintain these prices, we cannot guarantee them to last throughout the season, and advise early orders. "By express or freight" always means the purchaser pays the transportation charges.

Rosedale Strain (Yellow Dutch Sets)—This strain is our own proprietary stock, and have maintained their reputation as the best-shaped, best colored sets handled by any Seed House. This strain, for the past fifteen years, has had to compete against very unfair competition, but always came out with flying colors. They are of excellent color, good shape, good keepers, and produce quickly young onions of fine flavor, which, if allowed to grow on, mature a handsome yellow onion of best table quality. The best evidence of their popularity is the fact that we dispose of them to market gardeners, year after year, who pronounce one bushel equal to two bushels of ordinary Dutch Sets. Order early, stock limited: ½-Lb. 20c, Lb. 35c, 2 Lbs. 65c, 5 Lbs. \$1.50, postpaid. Peck, by express, \$2.00.

Shallots Used for pulling early: ½-Lb. 20c, Lb. 35c, 2 Lbs. 60c, 5 Lbs. \$1.40.

Egyptian or Perennial Sets Perfectly hardy, stays in the ground all winter. Produces green onions every spring long before any other variety is on the market. A bed will last for years. We send these out in August and September—the proper time to plant them: ½-Lb. 20c, Lb. 35c, 2 Lbs. 65c, 5 Lbs. \$1.40, postpaid.

DID YOU EVER GROW SPANISH KING ONIONS?—TRY THEM.

PARSNIPS

(French—Panaio)

Give the deepest and richest soil to parsnips. Make the soil very fine and plant the seed very early in rows 18 inches apart, thinning plants to 3 to 5 inches in the rows. The seeds should be planted half-inch deep. One ounce to 150 feet of drill.

Magnum Bonum This is a highly improved type of the well-known Hollow-Crowned, producing uniformly large and handsome roots of stocky form, heavy at the shoulder, well rounded, gradually tapering to the base, so that they are easily dug. The flesh is white, of fine texture, free from core and stringless, and especially fine flavored; cooking tender, sweet and rich, rendering it one of the finest table vegetables for winter use. This parsnip is the heaviest cropper of all. We recommend it for garden and fine culture. **Pkt. 10c, Oz. 25c, 2 Ozs. 45c, ¼-Lb. 75c, Lb. \$2.00.**

PARSNIP—Magnum Bonum

Improved Hollow Crown
¼-Lb. 60c, Lb. \$1.50.

A great cropper; fine flavored and considered one of the best for general cultivation. **Pkt. 10c, Oz. 20c,**

PUMPKIN

(French—Potiron)

All vines delight in warmth and rich soil. Prepare the ground by thoroughly pulverizing. Manure thoroughly, working just under the surface. Plant in hills 9 to 10 feet apart; work some rich, fine manure into each hill. Leave two or three plants to the hill. Keep well sprinkled with Slug Shot in early stages of growth. Cultivate frequently. One ounce to 25 hills; two to three pounds to an acre.

The Enormous A first-class keeper, having been kept until April without showing any signs of decay. Skin and flesh of a bright golden yellow color. Although of enormous size, it is firm-fleshed, fine-grained, and one of the best pie pumpkins we ever grew. The largest pumpkin at the Western Fair was exhibited by us, and it weighed 350 pounds. **Pkt. 10c, 3 for 25c, in Pkt only.**

Full and complete directions "How to Grow Big Pumpkins and Squashes," sent with every purchase of one packet or more of Enormous Pumpkin.

Sandwich Island A very fine new and productive variety, growing oblong to a length of 16 to 18 inches, and 7 to 8 inches in diameter, comes from a remote part of the Sandwich Islands. Remarkably distinct in every way. Of fine size, very prolific bearer and delicious flesh. A deep golden color when ripe. Flesh rich yellow, very sweet, dry and excellent for pies. An excellent keeper. **Pkt. 10c, Oz. 30c, 2 Ozs. 55c, ¼-Lb. \$1.00.**

King of the Mammoths The flesh and skin are of a bright golden color, fine-grained and of excellent quality; it grows to an enormous size, 3 feet or more in diameter, and 100 to 200 pounds or more in weight. **Pkt. 10c, Oz. 40c, 2 Ozs. 70c, ¼-Lb. \$1.25, Lb. \$3.00.**

The Enormous Pumpkin.

Sweet of Sugar (New England Pie)—Fruits small, round, flattened at the ends, and slightly ribbed; skin and flesh deep orange-yellow, flesh very thick and of high quality. **Pkt. 10c, Oz. 25c, 2 Ozs. 40c, ¼-Lb. 75c.**

Large Sweet Cheese A very early, large-sized pumpkin, often measures 15 inches across top; flat, like a cheese and very productive. It is an excellent keeper, and is of the finest flavor. Splendid for the table as well as for stock-feeding; also largely used for canning. The skin is orange-red. **Pkt. 10c, Oz. 25c, 2 Ozs. 40c, ¼-Lb. 75c.**

Big Tom More tons of pumpkins can be grown per acre of the Big Tom, whether with corn or by themselves, than any other variety. Skin and flesh are of a deep, rich orange color, of excellent flavor for pies, etc., cooking soft and tender. For table use and stock feeding no more profitable or better variety can be grown. **Pkt. 10c, Oz. 20c, 2 Ozs. 35c, ¼-Lb. 60c, Lb. \$1.50, postpaid.**

Connecticut Field Generally used for planting in corn for stock feeding, and also for making pies; fruit rather oblong, flattened at the ends, often 15 inches in diameter; smooth, hard, reddish-orange skin with rich, orange-yellow flesh. **Pkt. 10c, Oz. 15c, 2 Ozs. 25c, ¼-Lb. 40c, Lb. \$1.00.**

Common Yellow Field Standard Yellow Field Variety, used for pies and also for stock. **Oz. 15c, 2 Ozs. 25c, ¼-Lb. 45c, Pint, 65c.**

Mixed Varieties All the well-known varieties. **Pkt. 10c, Oz. 25c, 2 Ozs. 40c, ¼-Lb. 65c.**

RHUBARB (French—Rhubarb) Sow the seeds in drills 18 inches apart, and cover half-inch deep. Thin the plants to a foot apart. When the plants are one year old prepare the ground for the final bed by trenching two feet deep, mixing a liberal quantity of manure with the soil. Set the plants five feet apart each way. Do not cut until the second year, and give a dressing of manure every fall. If it is desired at any time to increase the bed, take up the roots and divide.

Johnson's St. Martin The earliest of all; requires less sugar than any other; delicate pink color. **Pkt. 10c, Oz. 35c, 2 Ozs. 60c, ¼-Lb. \$1.00.**

Victoria, or Giant Fine flavor, a well-known variety. **Pkt. 10c, Oz. 35c, 2 Ozs. 60c, ¼-Lb. \$1.00.**

Mixed Varieties **Pkt. 10c, Oz. 35c, 2 Ozs. 60c, ¼-Lb. \$1.00.**

RHUBARB ROOTS

A saving of from two to three years is made by planting the roots. We have well-established roots of the above varieties. Price, by mail, postpaid, 35c Each, 3 for \$1.00, \$3.50 a Dozen. By express or freight at purchaser's expense, \$2.00 a dozen, 100 for \$10.00.

NO MATTER HOW SMALL YOUR ORDER MAY BE, WE WILL APPRECIATE IT. SEND IT TO US.

Thomas Laxton

***Improved Stratagem** The pods are of immense size and uniformly filled with very large dark green peas of the finest quality. Vine medium height, but very stocky.

***Prince of Wales** A long-known standard and popular sort. Hardy, vigorous and upright in habit; pods produced abundantly in pairs near the top of the vine. Peas of first quality. Height, 2½ feet.

***Yorkshire Hero** Fine main crop; prolific and fine flavor; 2¼ feet.

PARSLEY (French—Parcil)

Select rich soil and sow the seed in drills one foot apart, covering one-eighth of an inch deep. The seed is usually from fifteen to twenty days vegetating. Thin plants to four inches apart when two inches high. The beauty of the plant may be increased by several successive transplantings.

The Emerald This is a very distinct and handsome variety of quick, robust growth, forming compact ornamental plants, densely furnished with strong-stemmed giant leaves, finely cut, most beautifully curled and crimped and of that brilliant deep emerald green color so highly attractive when used for garnishing. The flavor of the leaves is also unusually rich and aromatic, either when fresh or dried. Pkt. 10c, Oz. 25c, 2 Ozs. 40c, ¼-Lb. 75c, Lb. \$2.00.

Champion Moss Curled The leaves are a uniform deep green color, very finely cut and so closely curled as to resemble bunches of moss; one of the most useful and decorative sorts. Pkt. 10c, Oz. 20c, 2 Ozs. 40c, ¼-Lb. 75c, Lb. \$2.00.

PEANUTS BOOK—"PEANUT PLANT—ITS CULTIVATION."

—Price 60c, postpaid.

The Savitilla Every boy, every girl, and almost every person likes peanuts. They are nutritious, palatable and pleasant eating, and if rightly understood, can be raised as easily as cabbage or potatoes, much more productive than the common variety, but more easily raised, ripen earlier and far better for eating purposes. The Savitilla Peanut is a beautiful red variety; strong, hardy and vigorous growing, vines standing up straight and nut contains three to four kernels of a rich and pleasant flavor. A few short rows planted in the garden or field will produce nuts enough to supply a family all winter. Directions for growing will be printed on each packet. Large Pkt. 10c, ¼-Lb. 25c, Lb. 75c, postpaid, 3 Pkts. for 20c.

PEAS (French—Pois)

While the tall sort will run too much to vine if liberally manured, the dwarf varieties, on the contrary, need liberal manuring. Have the dwarfs that grow not over fifteen inches high in rows two and one-half feet apart; those attaining to the height of from two to three feet, in rows three feet apart.

EXTRA EARLY VARIETIES

The following varieties: Pkt. 10c, ¼-Lb. 20c, Lb. 60c, 5 Lbs. \$2.75, postpaid. By freight or express at purchaser's expense, 10 Lbs. \$4.00.

***Blue Bantam** Extremely early, very productive. A splendid large-podded dwarf variety. Height, 15 inches. Vine and foliage stout and healthy, medium dark green; pointed pods deep green, 4 inches long, broad and straight, containing 6 to 8 deep green peas of superb quality.

LAXTONIAN (Fifteen inches.) A handsome dwarf pea similar to Gradus, but maturing slightly earlier. Vines medium dark green and productive with pods almost 4 inches long. A good pea for both the home and market garden.

***Thomas Laxton** A very early wrinkled variety of great merit. Vine vigorous, of medium height, about three feet, similar to that of Gradus, but darker in color, hardier and more productive. Pods large, often four inches long, with square ends, similar to but larger, longer and darker than those of **Champion of England**, and as uniformly well filled. The green peas are very large, of fine deep color and unsurpassed in quality.

***Little Giant** (Private Stock).—This is one of the best quality, it has every feature which makes a wrinkled pea more sweet, tender and delicious than a smooth pea. Little Giant is frequently ready for the table in forty-eight days from the sowing of the seed. The pods, which average 3 inches in length and square and chunky, containing from 7 to 9 large peas, packed so closely that they are more nearly square than round. The peas are at all times tender and of fine flavor. The vines grow to a uniform height of about one foot.

***Gradus of Prosperity** Large, handsome pods, resembling telephone in size, well-filled with large peas, ripening with the earliest. Habit very vigorous, very quick to germinate, to push to maturity; foliage large, pale green in color; pods long, straight, slightly rounded at the point. Seed large and wrinkled.

***American Wonder** Extra early, productive, of fine flavor.

***Carter's Premium, or Improved Little Gem** (Private Stock).—Pods long and well-filled; finest flavor.

***Potlatch** has become one of our most popular sorts, the demand for this excellent variety among our market gardener friends being enormous; it is not only a favorite sort with them but is equally popular for the home garden. Potlatch is Chenook Indian for Big Dinner, hence the name Potlatch. The vines are vigorous, growing 20 to 24 inches high, with unusually dark green foliage, which can be distinguished from that of other peas a quarter of a mile away. The long pods are a rich dark green in color, often measuring 6 inches or more, with 9 to 11 enormous peas in a pod. The growth of vine is sturdy, and pods are borne in pairs; it is a wonder in productiveness, and the way the peas shell out is astonishing. No variety known will produce more pods, shell better, or contain more tender and delicious peas to the pod.

Mammoth Podded Sugar The peas are not shelled, but the pod is eaten like a snap bean. The pods are stringless and in flavor, brittleness and succulence are unexcelled. The vines are very tall, reaching a height of 5 to 6 feet and requiring support. The full-grown pods are 6 to 7 inches long and 1½ inches broad, and are produced continuously for a considerable period. The pods are sometimes sliced for cooking, because of their size, and may be served with butter or white sauce. They can be made ready for the table in 10 or 15 minutes, and are good even when quite old. Excellent also for pickles. Pkt. 10c, ¼-Lb. 25c, Lb. 75c, 2 Lbs. \$1.25, postpaid.

WE WANT YOUR ORDER, BE IT EVER SO SMALL. TRY US THIS SEASON.

RADISH

(French—Redis et Rare)

For early use, sow in spring as soon as the ground can be worked, in drills six to ten inches apart, covering seed half an inch deep. Thin plants to an inch apart in the row. As the roots are more succulent and tender when grown quickly a rich light soil should be preferred, and frequent watering in dry weather will be found beneficial. For a succession sow every two weeks. French-grown seed. One ounce for 100 feet of drill.

Long Scarlet

Half Long Deep Scarlet (Red Rocket)—Roots are half long, somewhat tapering at the point, and of a deep, rich red color; of quick growth and seldom pithy. Pkt. 10c, Oz. 25c, 2 Ozs. 40c, ¼-Lb. 65c, Lb. \$2.00.

WINTER VARIETIES

The following varieties: Pkt. 10c, Oz. 25c, 2 Ozs. 45c, ¼-Lb. 65c, Lb. \$2.00.

White Chinese or Celestial This is a fine, long, white radish—admittedly the best of the winter sorts. It is of Chinese origin, but is now thoroughly Americanized. Continued selection has made it perfect in shape, size, quality and flavor. It resembles California Mammoth Winter, but is superior to that or any other variety with which we are acquainted, as it lacks no qualities desirable in a winter radish. It will grow to a very large size, 8 to 15 inches in length and even larger, according to fertility of soil.

Black Spanish Winter A large, black-skinned radish, with firm white flesh of pungent flavor. It is a good keeper, lasting easily until Spring.

China Rose Winter Also called Scarlet Winter. A popular favorite, with rose-colored skin. It is a large, fine-shaped radish, growing partly above the ground, 3 to 4½ inches long. Flesh pure white, flavor mild. A splendid keeper.

Scarlet Conical (Private Stock) —This very excellent strain is far superior to any other. In color it is a brilliant scarlet, in flavor it is mild, crisp, juicy and tender. It forms a small top and will stand a great amount of heat without becoming pithy. For forcing in greenhouses, hotbeds or cold frames, and for sowing early out-of-doors, there is no other variety that will pay better. Pkt. 10c, Oz. 25c, 2 Ozs. 45c, ¼-Lb. 65c, Lb. \$2.00.

Long Scarlet Short Top

This superb radish originated in the vicinity of London, England, and has been continually used by the gardeners there for more than thirty years. It grows perfectly straight and smooth, six to seven inches in length. Their attractive scarlet-colored skin is very thin, and the flesh crisp, brittle and of delightful flavor. The finest long, red radish in existence, and outsells all others in any market, remaining, as it does, a long time in perfect condition for the table after it is first ready for gathering. Pkt. 10c, Oz. 20c, 2 Ozs. 35c, ¼-Lb. 60c, Lb. \$1.60.

Crimson Giant An early turnip radish, double the size of any of the early turnip-shaped type. This variety develops to six and often seven inches in circumference, weighing about four times weight of similar sorts; but, notwithstanding its immense size, does not get hollow or pithy, the flesh remaining sparkling white, solid, crisp and juicy, and of mildest flavor. Pkt. 10c, Oz. 25c, 2 Ozs. 45c, ¼-Lb. 65c, Lb. \$2.00.

Long Icicle Gets its name from the almost transparent whiteness of the root, which has no comparison among all cultivated radishes. It is of the best flavor, very crisp and brittle. It vies in earliness with the earliest forcing sorts, producing nice roots in 22 days from date of sowing. Pkt. 10c, Oz. 25c, 2 Ozs. 45c, ¼-Lb. 65c, Lb. \$2.00.

Sparkler White Tipped Quite similar to Scarlet White Tipped as to size and time of maturity. The white, however, extends further up on the radish, and on this account is more popular in some markets. Pkt. 10c, Oz. 25c, 2 Ozs. 45c, ¼-Lb. 65c, Lb. \$2.00.

Fire Ball Round rather than turnip shaped; bright scarlet and of medium size. Small top; very early, and one of the best forcing varieties, following Scarlet Button in three to four days. Pkt. 10c, Oz. 25c, 2 Ozs. 45c, ¼-Lb. 60c, Lb. \$2.00.

Scarlet Button This radish is quite desirable as an early sort, and particularly adapted for forcing. The color is a vivid scarlet. The flesh is white, crisp, solid and mild. Pkt. 10c, Oz. 25c, 2 Ozs. 45c, ¼-Lb. 65c, Lb. \$2.00.

Rosy Gem A great favorite in many large markets; for early planting outdoors. Color very dark scarlet with white tip. Pkt. 10c, Oz. 25c, 2 Ozs. 45c, ¼-Lb. 65c, Lb. \$2.00.

Improved French Breakfast A medium-sized radish, olive-shaped, small, of quick growth, very crisp, and tender, a beautiful scarlet color, except the tip, which is pure white. Pkt. 10c, Oz. 25c, 2 Ozs. 45c, ¼-Lb. 65c, Lb. \$2.00.

Brightest Long Scarlet or Cardinal

The handsomest and earliest long radish. This new sort resembles the Early Long Scarlet in shape, and is fit for use in 25 days after sowing. Its color is the brightest scarlet we have ever seen in any radish; tails tipped white. Pkt. 10c, Oz. 25c, 2 Ozs. 45c, ¼-Lb. 65c, Lb. \$2.00.

Crimson Giant

China Rose Winter

IF YOU ARE INTERESTED IN SMALL FRUITS, WE HAVE THE BEST. SEE PAGE 68.

SQUASH

All vines delight in warm, rich soil. Prepare the ground by thoroughly pulverizing. Manure thoroughly, working in just under the surface. Plant in hills nine to ten feet apart for running varieties, and five to six feet apart for bush sorts; work some rich, fine manure into each hill. Leave two or three plants to the hill. Keep well sprinkled with Slug Shot in early stages of growth. Cultivate frequently. Summer varieties one ounce to 25 hills, two to three pounds to the acre.

Chicago Warty Hubbard Our strain of the above will produce mainly the type shown in our photo-engraving, which we consider the **Ideal Hubbard** for home or for market. For thirty or forty years this squash has ranked first for a winter keeper. It is shipped thousands of miles in carload lots from west to east every year. With the growing of it, in a large way, it was found that the largest, heaviest, dark rough-skinned specimens are most valuable and most salable. Because of this, our selection of Chicago Warty Hubbard has been made. **Pkt. 10c, Oz. 30c, 2 Ozs. 50c, ¼-Lb. 90c, Lb. \$2.75.**

Red or Golden Hubbard A perfect type of the Green Hubbard, except in color, which is a bright, deep-orange yellow, very showy and attractive. Flesh deep golden-yellow, much richer in color than Hubbard, fine grained, cooks very dry, and is of excellent flavor. Its keeping qualities are fully equal to, while in productiveness it far excels, the green variety. **Pkt. 10c, Oz. 30c, 2 Ozs. 50c, ¼-Lb. 90c, Lb. \$2.75.**

Mammoth Whale This is the best "truly mammoth" squash. The squashes often grow three feet long, of a dark slate color, and sometimes weigh more than 100 pounds. Its greater diameter is near the blossom end, and tapers from there to each end; this peculiar form, together with its immense size, doubtless suggested the name **Mammoth Whale**. It is very prolific; the vines are robust and hardy. The flesh is solid, of a beautiful orange-yellow color, and excellent quality. It is also an excellent keeper. **Pkt. 10c, Oz. 35c, 2 Ozs. 65c, ¼-Lb. \$1.00, Lb. \$3.25.**

LONG CREAM An English sort of superior quality. **Pkt. 10c, Oz. 30c, 2 Ozs. 50c, ¼-Lb. 90c, Lb. \$2.75.**

VEGETABLE MARROW (Private Stock)—Color deep orange; rich flavored, fine grained. **Pkt. 10c, Oz. 30c, 2 Ozs. 50c, ¼-Lb. 90c, Lb. \$2.75.**

EXTRA EARLY Orange Marrow One of the best flavored; a good keepin winter variety. **Pkt. 10c, Oz. 30c, 2 Ozs. 50c, ¼-Lb. 90c, Lb. \$2.60.**

Essex Hybrid This is a mixture of the best summer, fall and winter varieties. **Pkt. 10c, Oz. 30c, 2 Ozs. 50c, ¼-Lb. 85c, Lb. \$2.00.**

Perfect Gem Is a strong grower, as many as twenty-four squashes having been produced on a single vine. Squashes are from 4 to 6 inches in diameter; of a creamy white, with thin, smooth shell, slightly ribbed. Flesh when cooked is dry, sweet and rich in flavor. It is a splendid keeper. **Pkt. 10c, Oz. 30c, 2 Ozs. 50c, ¼-Lb. 90c, Lb. \$2.75.**

Bush Fordhook Being of "bush growth," the plants can be grown close together. The fruits are rather shorter and thicker than those of the running type; they are also thicker-fleshed and have a smaller seed cavity. Fruits oblong in form, 8 to 10 inches in length, slightly ridged; smooth, thin, yellowish skin; flesh very thick and of a light straw-yellow. If gathered young for cooking, no other Squash approaches it in flavor, while if allowed to ripen on the vine they can be stored and will keep in excellent condition until late the following June. Either for baking like sweet potatoes or making pies during the winter, the quality is unsurpassed. **Per Pkt. 10c, Oz. 30c, 2 Ozs. 50c, ¼-Lb. 90c, Lb. \$2.75.**

SPINACH

(French—Spinard)

For summer use sow early in the spring, in drills eight inches to one foot apart, covering the seed one inch deep. Select rich soil and manure very liberally. A succession may be obtained by sowing at intervals of two weeks through the season. For very early spring use, sow in August. The plants are sometimes protected through the winter by a covering of straw.

Spinach is used principally as greens for boiling, and is very highly esteemed for this purpose. Ounce to 100 feet of drill; 5 pounds to the acre. The following varieties: **Pkt. 10c, Oz. 15c, 2 Ozs. 20c, ¼-Lb. 30c, Lb. 75c.**

Long Season The best variety to be sown in the spring and at monthly intervals for a succession of summer supply. It forms a dense rosette of thick, tender, succulent, crumpled leaves of intensely dark green color, their great substance and short-leaf stalks enabling them to stand up in hot weather, retaining their freshness for a long period after cutting. While we recommend it also for fall seedlings.

Victoria This new variety is distinguished by its exceeding dark black-green color, and also for its very long-standing qualities, being from two to three weeks later than the ordinary long-standing.

Catillon Long-Standing It has thick, broad leaves of a fine green color; stands longer than any other.

Giant Thick-Leaved (Private Stock)—One of the best market sorts; long-standing.

OYSTER PLANT OR SALSIFY

(French—Salsafis)

Sow in early spring, in light, rich soil, in drills fourteen inches apart, and thin the plants to three inches in the row. The roots will be ready for use in October. When cooked, the flavor somewhat resembles the oyster.

Mammoth Sandwich Island One of the most delicious of winter vegetables, and also one of the most nutritious. The flavor is sweet and highly esteemed, whether served boiled with butter or other suitable sauce, or sliced and fried, or used in soup. This new variety, where known, is entirely superseding the old type; as it produces roots nearly double the size and weight, and of equally good quality. Seed sown in the spring produces large, fine roots that may be dug and stored in sand or earth in November, thus keeping them plump and sweet, to be used as desired during the winter. **Pkt. 10c, Oz. 40c, 2 Ozs. 70c, ¼-Lb. \$1.00, Lb. \$3.50.**

OUR SEED IS
ABSOLUTELY
THE BEST IT IS
POSSIBLE TO
PRODUCE

Dengate's
Daisy

TOMATO

DENGATE'S
DAISY

Extremely Early—Heavy Yielder
Beautiful Color—Best Flavor

The Tomato for the Private Planter and a Money-Maker for the Market-Gardener.

A grand Tomato of local introduction, being brought to its present stage of perfection by Mr. R. Dengate, one of London's well-known Market Gardeners. This magnificent variety possesses every point going to make up a perfect Tomato.

It is extra early, of a bright scarlet color, medium in size (large enough for any use), wonderful firmness, finest flavor and exceptionally productive for such an early variety.

The seed cells are small and the centre without the hard core which is such an objectionable feature in so many varieties.

The vine is somewhat of the type of the well-known Spark's Earliana, bearing bunches of eight and ten beautiful perfect fruit, many bunches having twice this number. Pkt. 15c, ¼-Oz. 75c, ½-Oz. \$1.25, 1 Oz. \$2.00.

Byron Pink

The form is perfect, uniform, large and attractive. The flesh is very firm. A robust grower, with short joints, setting its clusters closer together than most varieties, and, it therefore follows, a very heavy cropper. The fruits are usually very deep from stem to blossom end. Ripens evenly, does not crack about the stem, and the flavor is all that can be desired. We have tested it for several years, as well as or forcing in greenhouses, and we believe it to be entirely unequalled for such purposes; but there is more money in growing it for early market than any other known variety, because it has about four clusters of fruit where others have only three. (Originator's Stock.) Pkt. 15c, ½-Oz. 50c, 1 Oz. 90c, 2 Ozs. \$1.60.

The following varieties: Pkt. 10c, Oz. 60c, 2 Ozs. \$1.00 ¼-Lb. \$1.75.

Bonny Best

An early and very productive variety, fruits are smooth, round, nearly globe-shaped and are produced in abundance. Its color is an intense glowing scarlet, ripening to the stem without a crack; a good forcing tomato.

Spark's Earliana

The earliest, smooth, bright red tomato of good size and flavor now in cultivation. The tomatoes are deep scarlet, averaging two and a half inches in diameter; they are smooth and solid quite thick through.

PONDEROSA

Largest of all Tomatoes. Single specimens often grow to weigh from one and one-half to two pounds. Good flavor.

Matchless

Large, handsome tomato, of a rich cardinal-red, remarkably solid and smooth, free from core and uniformly of the finest flavor. The tomatoes are always of the largest size, always perfectly smooth, firm and handsome, long keeping and we say without fear of contradiction that there is no scarlet-fruited tomato the equal of Matchless.

Chalk's Early Jewel

The most valuable extreme early and "all-purpose" bright-red tomato. Matures only a week or ten days after Spark's Earliana, and in some soils equally as early, while the fruits are larger, heavier, more handsome and produced even more abundantly and continuously.

Pink Monstrous

Is undoubtedly the largest, meatiest and finest flavored tomato in cultivation. The plants are healthy and luxuriant, free from blight, and prodigious and continuous bearers. They seem independent of droughts—during an unprecedented dry spell a few years ago, without once watering the plants, we had tomatoes weighing a pound and over, almost all solid meat, of the most delicious flavor.

Red Monstrous

A scarlet "sport" from Pink Monstrous and resembles the original stock in nearly all respects, but the color is brilliantly crimson-scarlet. It bears a prodigious crop of perfectly shaped fruits of enormous size that ripen clear to the stem, while its rich color is sustained throughout the entire fruit.

Golden Monstrous

A splendid novelty. Equals its famous parent, the Red Monstrous, in every respect but color. It possesses its large size, heavy, meaty, luscious quality, and in addition is of a striking rich golden yellow color.

Mixed Varieties

All kinds, early and late, large and small, yellow, red and purple.

Preserving Tomatoes

The following small-fruited varieties are used for making preserves, and are also quite ornamental. Pkt. 10c, ¼-Oz. 30c, Oz. \$1.00.

RED PEAR, YELLOW PEAR, RED PLUM, YELLOW PLUM.

FOR CLIMBING VINES SEE PAGE 27.

PEPPER

(French—Pimet)

Peppers should be started in a cold frame or hot-bed. Transplant the young plants into the open ground towards the close of May, having the rows sixteen inches apart and the plants one foot apart in the row.

Chinese Giant Double the size of Ruby King, and equally as mild. This is the largest and finest mild red pepper. Gardeners planting for market will find the Chinese Giant the most profitable variety they ever handled. Not only is it early in ripening and immensely productive for so large a pepper, but its enormous size will cause it to sell most readily. The monstrous fruit are of thick, blocky form, and of most brilliant glossy scarlet. They grow 4 to 5 inches broad at the top and are of equal length divided into four or more large ridges. When ripe they are indented at the blossom end. All are uniformly of most "enormous size". The flesh is unusually thick and extremely mild; as sweet as an apple. It makes an excellent salad sliced and served like tomatoes. The enormous fruit yield so little seed that the genuine seed must be always high. Pkt. 10c, ½-Oz. 70c, Oz. \$1.25.

Long Red Long, tapering, sharp-pointed fruit, 6 inches long, and is of a deep, glossy scarlet color. Fruit is very fine, and is superior as flavoring for chow-chow, etc. Pkt. 10c, ½-Oz. 60c, Oz. \$1.00.

Ruby King An improved American sort, reaching the largest size, yet retaining the symmetrical shape of the smaller sorts. It is very bright colored, temptingly sweet and mild flavored. Pkt. 10c, ½-Oz. 60c, 1 Oz. \$1.00.

Long Red Cayenne A long, slim, pointed pod, and when ripe of a bright red color. Strong and pungent. Pkt. 10c, ½-Oz. 60c, Oz. \$1.00.

Large Bell or Bull Nose A very large sort, of inverted shape, suitable for filling or for mixed pickles. Flesh thick and less pungent than most other sorts. Pkt. 10c, ½-Oz. 60c, Oz. \$1.00.

Fine Mixed The above and many other valuable peppers in choicest mixture. Pkt. 10c, ½-Oz. 60c, Oz. \$1.00.

HERBS---Pot, Sweet and Medicinal

A few pot and sweet herbs, for flavoring soups, meats, etc., are indispensable to every garden, while some of the medicinal herbs will also be found useful. Herbs in general love a mellow and free soil, and care should be taken in harvesting them in a dry state. Cut them on a dry day when not quite in full bloom, and dry quickly in the shade, and when dry pack them in close boxes, entirely excluded from the air. The varieties marked * are Perennial, and when obtained in the garden may be preserved for years with but little care.

		Peppermint.....	10c

Another splendid novelty of late introduction, very striking in color, most wonderful yielder. Vines are somewhat smaller than the musk melon vine though requiring same cultivation. Fruit is about the size of an orange; orange shape and bright orange color somewhat russeted. For sweet pickles, pies or preserving they are splendid. In the West and Northwest, where fruit is scarce, they are rapidly becoming popular, as they are easily

cultivated, enormously productive and can be used in every way as the peach, except that they are not quite as sweet. You will certainly be pleased with it. Pkt. 10c, Oz. 30c.

TOBACCO

(One Ounce will sow a bed of fifty square yards)

The seed should be sown as early as possible after danger of frost is over. When the plants are about six inches high, transplant into rows four or five feet apart each way.

Connecticut Seedleaf This variety is grown in the Middle and Northern States, being comparatively hardy Pkt. 10c, Oz. \$1.00 2 Ozs. \$1.75.

White Burley Most extensively grown in Kent and Essex Counties. Pkt. 10c, Oz. \$1.00, 2 Ozs. \$1.75.

Havana Matures far north, of superior flavor and fine texture, grown from seed imported from Vuelto de Abajo. Pkt. 10c, Oz. \$1.00, 2 Ozs. \$1.75.

FULL and COMPLETE INSTRUCTIONS FROM SOWING OF SEED TO MARKETING OF CROP Free to all Purchasers of One Packet or More.

Certainly one of the greatest novelties of recent introduction. Resembles vine peach in manner of growth, but is distinct in that the unripe fruit is striped with very dark green spots, nearly black, and when ripe is not russeted like the vine peach. Fruit a trifle smaller than vine peach. Has a finer flesh and most desirable acid flavor, thus dispensing with sliced lemon, which is so important in putting up the vine peach. Unexcelled for general canning purposes. Pkt. 10c, Oz. 30c.

RECIPES FOR PRESERVING WILL BE SENT WITH EACH PURCHASE OF VINE PEACH AND GARDEN LEMON

LEEK Select good onion soil, manure liberally, and plant in April in drills made 6 to 8 inches deep (French—Poireau) and 18 inches apart and thin to 9 inches apart in the drill. Gradually draw the earth around the plants until the drills are filled level with the surface. Draw for use in October. To be used in soups. One ounce to 1,000 plants. Broadflag, or London, Pkt. 10c, Oz. 40c 2 Ozs. 70c, ¼-Lb. \$1.25.

RELIABLE COLLECTION OF VEGETABLE AND FLOWER SEEDS

TURNIPS (French—Navet)

The following varieties: Pkt. 10c, Oz. 20c, 2 Ozs. 30c, ¼-Lb. 50c, Lb. \$1.50.

Canadian Gem (Swede)—The best Swede Turnip grown for table use.

Red Top White Globe (Private Stock)—This is one of the handsomest and most suitable turnips we know of. As a profitable sort for market gardeners it is unsurpassed. For the home garden it is always desirable. It is a large, rapid-growing sort, with globular-shaped roots. Flesh is pure white, of high quality and excellent flavor. The skin is white and purple. Will outyield any other sort.

Purple Top Strap-Leaved Popular favorite with all. Will do well to sow either broadcast or in drills, and will form good-sized bulbs in seven or eight weeks. Rather flat and of medium size. Color, purple above ground, white below; flesh white, fine grained, and tender.

Golden Ball A superior table turnip of bright yellow color; in flavor it is rich and sweet. A rapid grower; good keeper.

Superb Mixture of Turnips This mixture contains all the leading varieties of both early and late; a continuous supply may be had throughout the season.

WE PAY POSTAGE ON ALL SEEDS QUOTED BY THE PKT., OZ., 2 OZS., ¼-Lb., ½-Lb., AND LB.

SWEDE TURNIP IXL CANADIAN GEM

The great popularity of this Swede has, we regret to say, induced some seedsmen to put up and offer a variety as Canadian Gem, but all who purchased it the past season were sadly disappointed. Ask for I X L Canadian Gem, and take no other.

Short neck, small top, firm flesh, symmetrical shape, united with high feeding value, great productiveness, hardness and long-keeping qualities, describes the perfect Swede. Every root of I X L Canadian Gem more nearly approaches this ideal than any other known strain of Swede Turnip.

After selling this variety for the past ten years, it is not necessary for us to dwell very long on its qualities.

It is now so well known it needs no lengthy introduction. Its short neck, compact, small top and perfect shape shows to the critical Swede grower that it is all turnip. With the above excellent points it has the other fine qualities, such as fine flesh, hardness to resist extremes of weather, and long-keeping, is sufficient to recommend it. Pkt. 10c, Oz. 15c, ¼-Lb. 35c, ½-Lb. 60c, Lb. \$1.10, 5 Lbs. \$5.00, postpaid.

This Swede has carried off the highest honors at all the large exhibitions, also township shows, and is used exclusively in the large turnip-growing sections, from which they are shipped by the hundreds of cars to the United States and sold as "Canada Turnips," commanding the very highest price.

If you are offered a Canadian Gem Swede at less than the price we ask, it is not the Genuine I X L Canadian Gem.

Fall and Early Winter Feeding Turnips

IXL Purple Top Mammoth White

The Heaviest Yielder

The Best For Green Manure

The Best For Early Feeding

The Best Main Crop Variety

The Best For Sowing in Corn

The Best Keeping White Turnip

"JUMBO" Bronze Top Swede Also Called Elephant and Monarch

Of tankard or half-long shape.

Rich yellow flesh, beautiful bronze top.

Can be grown closer in the row than most varieties.

Hardy constitution, resisting severe weather.

Good keeper and extra heavy cropper.

The root of this variety is tankard shaped, with a beautiful bronze top, the yellow flesh of rich quality, much relished by stock.

The root, being long shaped, will stand somewhat closer in the row than most Swedes.

It is of exceeding hardy constitution, standing well during severe weather, and will keep sound and good until spring.

It is one of the best varieties we know of for cold soils, and is an extra heavy cropper. Oz. 15c, ¼-Lb. 35c, ½-Lb. 60c, Lb. \$1.00, 5 Lbs. \$4.50.

Fall and Early Winter Feeding Turnips

Undoubtedly the finest stock of White Turnip in existence, perfect in form, with clear, smooth skin. The best White Turnip for general crop, quick in growth, and the high crown will not allow water to lodge.

The handsome shape and nutritive qualities of our Purple-top Mammoth have made it popular both for feeding purposes and as a competitive crop. Oz. 15c, ¼-Lb. 30c, Lb. \$1.00, 5 Lbs. \$4.00, postpaid.

The following varieties at the uniform price of:—Oz. 15c, ¼-Lb. 30c, Lb. 90c, 5 Lbs. \$4.00, postpaid.

White Globe—Large, fine quality, useful for late spring.

Devonshire Greystone—Very popular sort, growing to a good size, early, excellent quality.

Purple-top Yellow Aberdeen—An excellent variety for winter feeding.

BEST MANGELS

Colossal White
Sugar Beet

Giant Long Yellow

Taber's
Gatepost

Canadian Giant

Canadian Giant Long Red

LONG RED—Private Stock—Without doubt the greatest creation in Mangels ever placed before the public. The largest, heaviest and most profitable Mangel offered. **GIGANTIC APPEARANCE—UNIFORM SHAPE—ENORMOUS WEIGHT PER ACRE.**

Mr. Farmer, do you want to grow the biggest crop of Mangels you ever did in your life? Then sow Canadian Giant Mangel Seed.

This is enormously, wonderfully productive. Its yield is exceedingly fabulous; 1,500 to 1,800 bushels per acre is nothing uncommon on good soil, and many experimental stations and trial tests the past year have produced at the rate of 2,000 to 2,500 bushels per acre. We took many hundreds of specimens from our customers' fields weighing over 60 pounds each; and many reaching the sensational weight of 75 pounds or over. Could anything be more marvelous than this truly wonderful mangel? In length, Canadian Giant is about the same as Mammoth Long Red Mangel, but it is particularly remarkable for its handsome shape and broad shoulders, its diameter being greater and its weight very much heavier. The flesh is red, of very fine texture and quality, containing less water and more sugar than any other roots, except it be the Colossal Sugar Beet, making it more nutritious and milk-producing. Sheep and other stock thrive better when fed on it, picking out pieces of it in preference to other kinds.

Prominent mangel authorities consider Canadian Giant by far the most valuable and profitable of all stock-feeding mangels. Please remember that we own and control the entire stock of this grand variety. It is such a shy seeder that the seed cannot be grown as cheaply as other mangels, yet, being desirous of placing this grand mangel at prices within reach of all, we offer it at the following exceptionally low values: **Oz. 10c, ¼-Lb. 25c, Lb. 75c, 2 Lbs. \$1.40, 5 Lbs. \$3.25, postpaid.**

Champion Red Globe

We think this is one of the best varieties for stock feeding. It is very productive and an excellent keeper when stored in heaps for winter use. It has an exceedingly small size neck, uniformly globe-shaped, having a very small top and few side roots; color of skin deep and flesh a deep red shade and of excellent quality. The roots grow almost entirely above ground, making them admirably well adapted to shallow ground, and very easy to harvest. **Oz. 10c, ¼-Lb. 25c, ½-Lb. 40c, Lb. 75c, 2 Lbs. or more at 75c Lb., 8 Lbs. \$3.00, postpaid.**

Giant Long Yellow

Similar to Mammoth Long Red, except in color. Attains the enormous weight of 50 to 60 pounds. Very nutritious. A grand milk producer.

Our attention was first called to this prodigious variety three years ago, when we saw hundreds of specimens taken from the field, weighing from 50 to 60 pounds each, while whole crops averaged 38 to 40 pounds per root. The length is but little shorter than Mammoth Long Red, but it is remarkable for its handsome, thick, uniform shape and very broad shoulder, its diameter being greater and its weight very much heavier. The flesh is of a very fine texture and quality, containing less water and more sugar than any other mangel, making it more nutritious and milk-producing. Sheep also thrive better when fed on it, picking out pieces of it in preference to other kinds. The tops are smaller, and it is such a shy seeder that the seed cannot be grown as cheaply as other mangels. **Oz. 10c, ¼-Lb. 25c, Lb. 35c, 2 Lbs. \$1.60, 5 Lbs. \$3.50, postpaid.**

Taber's Gatepost

Selected Giant Yellow Intermediate, the Dairy Farmers' Mangel, will grow 30 to 50 pounds in weight, 2,000 to 2,500 bushels to the acre. The easiest harvested and best-feeding Mangel.

This variety originated by Mr. Taber, the prominent English seed grower, has since being introduced in England a few years ago rapidly popularized itself and is pronounced by leading English farmers the most useful Mangel that can be grown. Its handsome clean roots are very heavy, often weighing 40 pounds or over, and producing 2,000 to 2,500 bushels to the acre. The best yellow Mangel known.

We strongly recommend this variety for sharp gravels, shallow and light soils, or others not adapted to the growth of the Long Red Mangel, as it penetrates to but a moderate depth. Special attention is called to our new selection of this Mangel, which is by far the best of the intermediate varieties; its girth shoulder and base being about equal: it is between oval and cylindrical in form, capable of being grown closely in rows, thus producing an exceedingly heavy crop of splendid bulbs. Remarkable for feeding properties and hardness. **Oz. 10c, ¼-Lb. 25c, ½-Lb. 40c, Lb. 75c, 2 Lbs. \$1.40, 5 Lbs. \$3.25, postpaid.**

IF YOU KEEP POULTRY YOU SHOULD HAVE AN INCUBATOR. SEND FOR OUR POULTRY SUPPLY CATALOGUE.

MANGEL

Golden King Globe

Private Stock

This splendid Mangel, which has been raised and carefully selected by us, possesses all the fine breeding qualities of our Giant Long Yellow, and it is also similar to that well-known variety in color—a rich golden yellow. The bulbs are globular in shape, large, very handsome appearance. Hardy in constitution, and even under ordinary cultivation produces a great weight of roots per acre. It is also a remarkably clean grower and pulls well. Strongly recommended as a heavy cropper of most nutritious quality. Oz. 10c, $\frac{1}{4}$ -Lb. 25c, $\frac{1}{2}$ -Lb. 40c, Lb. 75c, 2 Lbs. \$1.40, 5 Lbs. \$3.25, postpaid.

GOLDEN KING
YELLOW
GLOBE
MANGEL

SUGAR BEETS

Colossal White

Private Stock

It has a clear white skin and flesh excepting a small portion at the top of the root, which is green. The roots are of a very uniform size, many of them

weighing 20 to 25 pounds, and some going even more. The top is small and easily trimmed. A very noticeable point in this variety is that it was more easily pulled than any of the other varieties in our plot. The shape of the root is very uniform from top to bottom, and as it grows about two-thirds of its length out of the ground, making it very easy to harvest.

The quality is of the best, being very rich in sugar-making. It is more profitable root than Mangels. This variety, we can say without fear of contradiction, is the heaviest cropper of all known varieties, having produced the enormous yield of 1,500 to 2,000 bushels to the acre under ordinary cultivation. We strongly urge our farmer friends who are root growers to try this excellent variety, and we feel satisfied they will not be disappointed. Try it. Stock limited this year. Sold only in sealed packages. Oz. 10c, $\frac{1}{4}$ -Lb. 25c, $\frac{1}{2}$ -Lb. 40c, Lb. 75c, 2 Lbs. \$1.40, 5 Lbs. \$3.25, postpaid.

SUGAR BEET---Royal Giant

The flesh is tender, solid and of purest white; the outside color is a pale rose below ground, shading to a darker rose above and gradually running to a beautiful green at the top. The roots are half long, wide at the shoulder, gradually tapering, and stand nearly all out of the ground; easily pulled and have a very small top. Have no fibrous or prongy roots if grown on good loamy or rich sandy land. In comparative trials with Lane's Improved Sugar the new Royal Giant has yielded 60 tons to the acre, where Lane's Improved has produced only 30 tons. This of itself is a sufficient recommendation to induce every grower of mangels and sugar beets to give it a trial. Royal Giant is of French origin and a grand article. Oz. 10c, $\frac{1}{4}$ -Lb. 25c, $\frac{1}{2}$ -Lb. 40c, 1 Lb. 75c, 2 Lbs. \$1.40, 5 Lbs. \$3.25, postpaid.

Royal Giant

CARROT

Improved Half-Long White

SHORT and EASILY HARVESTED—AN IMMENSE CROPPER—A GRAND KEEPER.

We want to urge one thing on every farmer who receives this book. It is this, try our WHITE CARROT. There may be room for a difference of opinion regarding many varieties of seeds, but there cannot be room for difference of opinion as to which is the best crop carrot.

HALF-LONG WHITE CARROT is the heaviest cropping carrot grown, yielding more tons to the acre than any other sort. The flesh is white, crisp, solid and very sweet in flavor. It is a vast improvement on the white Belgian sorts which have been favorites in the past, as it is not only much more productive, but vastly easier to handle. The roots are short and very heavy at the shoulder, rendering them easily harvested. An important feature also is that they do not easily break in pulling or storing. Too much can scarcely be said of their size and great productiveness. The roots frequently measure fifteen to twenty inches in circumference and eighteen to twenty-five tons to the acre is not an extravagant statement as to yield. Oz. 15c, $\frac{1}{4}$ -Lb. 35c, $\frac{1}{2}$ -Lb. 60c, Lb. \$1.00, postpaid.

CARROT Giant Yellow Intermediate

This is the largest and unquestionably the heaviest cropping and most nutritious yellow variety in cultivation. It is the largest and best formed orange or yellow carrot known. The roots are remarkably fine, very symmetrical and of excellent quality, possessing big feeding properties. It is a heavy cropper on all soils, but especially adapted to strong or rich land. It grows fully half as much weight again per acre as the ordinary varieties and as the roots grow above the ground, it is much easier to gather the crop. This grand variety is sure to suit everyone who grows it. Oz. 15c, $\frac{1}{4}$ -Lb. 40c, $\frac{1}{2}$ -Lb. 75c, Lb. \$1.25, postpaid.

DID YOU EVER GROW MAND'S WONDER? SEE PAGE 58.

Improved Half-Long White

Send for Price List of Corn, Grain, Clover and Grass Seed—Ready February 15th, 1922

Subject to Market Fluctuations. Write for Prices of Corn by Peck and Bushel.

CORN

Gold Nugget

This corn is the largest-eared and most productive of all the early Flint varieties. The ears are immense, 12 to 14 inches long, with eight rows of kernels. It will ripen in 95 to 100 days.

The stalks usually have two ears, and will produce an enormous yield of stalks and ears.
Lb. 35c, 3 Lbs. \$1.00, postpaid.

Silver Triumph

This is the finest thoroughbred White Flint Corn, and the best extra early corn that can be grown. White in color, maturing in from 75 to 85 days. Ears average about 13 inches in length; two to a stalk; excellent ensilage or fodder corn. Lb. 35c, 3 Lbs. \$1.00, postpaid.

DENT VARIETIES

Lb. 30c, 3 Lbs. 70c, Postpaid.

Wisconsin No. 7—Silver King

The Corn that has made Essex County, Canada, famous. In appearance this Corn is a beauty. Ears just the right length, averaging 8 to 10 inches, always filled out clear to the tips, and very uniform in size and type. The corn is pure snow-white in color, with good length kernels set compactly in straight rows.

Improved Leaming

It ripens in 100 to 110 days. For several years past our sales of this variety have been enormous, much of it being used for fodder and ensilage.

Mammoth Yellow Cuban

For the central part of Ontario this is one of the best, according to the Guelph College report.

Early Butler Yellow Dent

The ears grow to a good size; 70 pounds of ears have shelled out 64½ pounds of shelled corn, leaving only 5½ pounds for the cobs.

Whitecap Yellow Dent

Its great merit lies in its strong, rank growth, with a good many suckers. It will grow more bushels on poor, thin land than any other kind.

Genuine Mammoth Southern Sweet

Our celebrated M. S. S. (Mammoth Southern Sweet) has given better and more generous satisfaction than any other variety of fodder and ensilage corn. The stalks are very full of sugar (syrup having been made from them), and if planted in hills or drills, 3 to 3½ feet in rows, will develop ears fit for roasting.

Eureka (White)

For many years we have used great care in the selection of our seed, which will give a large amount of fodder, 3 or 4 long, slender ears of Corn to the stalk. Grows to a height of 15 feet. It is a very rapid grower and can be grown with wonderful success. Growers should not miss planting this special variety.

EARLIEST RIPE FODDER CORN, See Page 9.

FLINT VARIETIES

Lb. 30c, 3 Lbs. 70c, postpaid.

Salzer's North Dakota

A magnificent variety of Early White Flint Corn with large ears, often 14 inches in length, solid kernels with 8 rows to the cob.

Sanford White

It is very early, has abundance of leaves, and is suitable alike for green fodder or ensilage purposes. We recommend it.

Longfellow

An eight-rowed Early Yellow Flint variety, with ears 10 to 15 inches long, cob small, kernels quite broad, good ensilage and fodder corn, sappy green stalk, very leafy, with fine long ears.

One Hundred Day or Angel of Midnight

This is, without exception, the earliest eight-rowed yellow Flint Corn in cultivation; ears long, perfect in shape.

Compton's Early

Especially valuable for the quantity and quality of ears produced, and makes a rich, palatable food when cured as ensilage. Its extreme earliness adapts it to eastern and northern Ontario, where it is a favorite sort. Yields an average of 3.32 tons of ears per acre.

OATS

The Sparkler (New)

The name was suggested from the fact that they sparkle in the field like diamonds. Originated in Ohio four years ago. We have the entire stock, an exceptionally heavy yielder, have a stiff straw light hull. Weigh 38 to 40 pounds to measured bushel. The heads are large and are loaded with big, plump thin hulled, bright grains. We are convinced that every grower will be pleased with them.
Lb. 35c, 3 Lbs. \$1.00, postpaid.

O. A. C. No. 72

In length of straw, freedom from rust, heavy yield, feeding quality, adaptability to all kinds of soils and conditions, it is superior to other well-known varieties. No up-to-date farmer should miss the opportunity of investing in at least a few bushels. Our stock was grown for us by one of the best farmers in Middlesex County.
Selected Stock—Lb. 30c, 3 Lbs. 65c, postpaid.

O. A. C. No. 3

One of the best for sowing with barley for a mixed crop. It ripens a few days earlier than Daubeney, with straw about the same length, but the grain is much thinner hulled and heavier yielder to the acre. Lb. 35c, 3 Lbs. \$1.00, postpaid.

Barley

O. A. C. No. 21

Has made the best record of 83 selected varieties at the Ontario Agricultural College. It has actually given better results than the Mandscheuri variety in yield of grain, in freedom from rusts, and in both length and strength of straw in the experiment at the College. Price, Lb. 30c, 5 Lbs. \$1.00, postpaid.

Buckwheat

Japanese

The Best Variety—Very Early. Yields Double That of Other Sorts. Makes the finest Buckwheat Flour. Grown from Imported Seed. This variety is now more generally grown than any other. Does not need to be sown so thickly as other kinds. For bees it is of the greatest value, and for this purpose has displaced all other varieties. Lb. 30c, postpaid; 5 Lbs. \$1.00, postpaid; Bush, ask for price.

Common Gray

Per Bushel, ask for price.

Field Peas

Canadian Beauty

A comparatively new White Field Pea; grain large, bright, clear color; of the white marrowfat type. The straw is of fine quality. Lb. 30c, 5 Lbs. \$1.00. Also such well-known varieties as Golden Vine, Sippinaw and White Marrow-fats. Ask for Prices. By peck or bushel.

American Banner, Early Surprise and Early Daubeney. Write for Prices of Oats by Bushel or Over.

Send for Grain, Clover and Grass Seed Price List. Ready February 15th.

WHITE HULLESS BARLEY

White Hulless Barley

ITS VALUABLE PROPERTIES:

- It is **HULLESS**. It is **BEARDLESS**. It is **EARLY**.
- It **WEIGHS OVER 60 POUNDS** to the **MEASURED BUSHEL**.
- It **YIELDS WELL** on **POOR LAND**.
- It **YIELDS ENORMOUSLY** on **GOOD LAND**.
- It makes **BETTER PORK** than **CORN**.
- It makes **EXCELLENT FLOUR**.
- The **Straw** makes **GOOD HAY**.
- It is of **INESTIMABLE VALUE** TO **EVERY ONE WHO FEEDS STOCK**.

Has grown 60 bushels to the acre, and it is the best grain to sow for hay that grows. Sow early and you can cut two crops from the same sowing. As fattening feed for hogs it has no equal. It makes sweeter meat and richer lard by far than corn. Twenty hogs fattened with it make a gain of 106 pounds to the hog in five weeks. The best way is to grind it and feed dry, with clear cold water in another trough for them to drink out of. It grows very quickly on all kinds of soil. You can sow it after all other grain is sown and harvest it then before wheat and oats are ready. Sown as late as the 18th of June made a good grain crop. Stock will eat the straw in preference to "slough" hay. The straw is small, with very heavy leaves, stools wonderfully. Once used for hay for work horses, you won't have any other. For flour it discounts buckwheat. For grain, sow 1 bushel to the acre; for hay, 1½ bushels. **Lb. 30c, 5 Lbs. \$1.00, postpaid; by express or freight, Peck 80c, bushel \$3.00, Cotton Bags 40c each.**

Spring Rye Distinct from the winter rye, grain of finer quality and more productive; can be successfully grown in any latitude, and is now being largely sown in very many sections in place of oats. The straw is equally as valuable as that of the fall or winter rye, standing stiff seven to eight feet high. Produces 30 to 40 bushels of grain per acre. As it does not stool like winter rye, not less than two bushels to the acre should be sown. Ask for prices.

Millet Japanese For green fodder sow at the rate of 12 to 15 pounds per acre. The leaves are larger than those of either Hungarian or Golden and the crop very much heavier. Either as a hay product or as a source of abundant green fodder, this millet is a great acquisition to the agriculture of the country. **Lb. 30c, 5 Lbs. \$1.00, postpaid.**

Siberian or Russian Makes the grandest fodder imaginable, and for hay or seed it cannot be equalled. It beats anything to stool you ever saw. If your land is clean, one-half peck per acre is an abundance. **Lb. 30c, 5 Lbs. \$1.00, postpaid.**

Hog or Broom Corn Yield of seed 60 to 70 bushels to the acre, used for fattening swine and other stock, in sections where corn cannot be safely or cheaply grown. Seed also makes very fine feed for poultry and young chicks. **Lb. 30c, 5 Lbs. \$1.00.**

Golden Wonder Is now one of the most popular forage grasses as a substitute for hay. May be sown after hay is cut and will mature the same season. **Lb. 35c, 5 Lbs. \$1.25, postpaid.**

Dakota This is an excellent variety; a very strong grower, producing a large amount of foliage. Grows to a good height; stands up well; yielding 5 to 8 tons to the acre. **Lb. 30c, postpaid, 5 Lbs. \$1.00. Ask for prices of Millet by bushel or more.**

Kale Thousand-Headed Just the thing for sheep, for cattle, for hogs, for poultry, in fact for any animal that will eat green feed. It is impossible to overvalue the variety as a crop for sheep. The best way is to plant it with a garden drill dropping the seeds about 8 inches apart. One pound in this way will be sufficient for an acre. You will be astonished and delighted at the great amount of good food an acre of **Thousand-Headed Kale** will bring. **Oz. 15c, ¼-Lb. 35c, ½-Lb. 60c, Lb. \$1.00, postpaid.**

WHEAT

Marquis The King of All Spring Wheats. Combines all the qualities so earnestly sought after by the cerealist and devotedly hoped for by the grain growers of the Northwest. It is a week to ten days earlier; produces five to ten bushels more per acre; has a higher milling and baking quality than any other hard spring wheat known to-day. Has outyielded all other spring wheats grown under the same conditions of soil, cultivation and climate. **Ask for price, stating quantity wanted.**

Wild Goose The attractive appearance of the seed has induced a great many to buy it, and later they were unable to find a market for the product. Now, however, we have it on authority of the Minister of Agriculture, that there is a difficulty in supplying the demand for this wheat to macaroni factories. For Hog Feed there is nothing to equal it—being a good substitute for Peas. **Ask for Price, stating quantity wanted.**

Rape Dwarf Victoria When rape is sown broadcast, 5 pounds of seed per acre will suffice. When sown in rows, say 30 inches apart, and cultivated, from 1 to 2 pounds will be enough. Grown extensively as a pasture for swine. Millions of sheep and lambs fattened on it. **Lb. 35c, postpaid; by express or freight, 10 to 20 Lbs., 22c; 25 Lbs. or over at 20c a Lb.; Cotton Bags, 40c each.**

Dwarf Essex This is the variety of Rape sold by Seedsmen in this country; and is highly recommended by agriculturists, both in Europe and America, but it is always behind in yield, in bushy, leafy quality and in vigor of growth and hardiness to our splendid—yes wonderful Dwarf Victoria Rape. Prices: **Lb. 30c, postpaid; by express or freight, 10 to 20 Lbs., at 17c Lb.; 25 Lbs. or over at 15c. Cotton Bag for Rape in quantity, 40c each.**

Prices on Oats, Wheat, Barley, Corn, Peas and Other Field Grains are Liable to Change. Ask us for Prices When Ready to Buy

THE MAMMOTH RUSSIAN

THE GIANT OF ALL SUNFLOWERS

Poultry Lay More Eggs if Fed the Seed—Horses Do More Work With Less Fatigue—Cattle, Sheep and Swine Fatten Thereon—The Oil Burns Well—Twenty Barrels Can Be Made Per Acre—The Leaves Make Splendid Fodder—The Stalks Make Grand Fuel—Absolutely No Waste to the Sunflower

PRODUCES 75 TO 100 BUSHELS TO THE ACRE

Growing to double the size of the common sunflower, and the yield of seed is twice as great—125 bushels have been grown at a less expense than corn. Highly recommended for poultry—the best egg-producing food known. This makes a splendid fodder, much relished by all kinds of stock. The seed is good feed for horses, and yields a fine quality of oil. The strong thick stalks are used for fuel; in fact, there is no waste in its production. **Oz. 10c, ¼-Lb. 15c, Lb. 40c, 3 Lbs. \$1.00, postpaid; 25 Lbs. \$4.00, 100 Lbs. \$12.00, by express or freight.**

WHY EVERY FARMER SHOULD GROW SUNFLOWERS

In a recent publication of an Eastern Agricultural Monthly, the following appears:
"About four miles from this place lives a German farmer, who each year devotes one acre to the cultivation of Sunflowers. He says one acre yields 75 to 100 bushels of seed, which he uses as feed for his chickens, and which horses and cows relish when mixed with grain. He also uses the seed to manufacture an oil or liniment, which he says will cure a scratch, bruise or callous sore on man or beast. To prepare this oil he simply crushes the seed, securing a thick, gummy oil, to which he adds a quantity of turpentine. After his harvest of the seeds he houses the stalks, and uses them as fuel in the winter. The sunflower is a very thrifty plant, and should be more generally grown, as it will flourish in any climate. It grows riotously everywhere in Canada."

MAND'S WONDER

FORAGE PLANT

Grows 12 to 14 feet high. Heads 12 to 20 inches long. Excellent either green or dry. Looks like Giant Timothy. If you keep a Cow, Horse or Hog, you should grow this.

A wonderful forage plant of great value to all stock farmers. It is unexcelled, if equalled, for its quick growth, immense size and splendid quality. The seed is small, about one-eighth the size of a grain of wheat; it should be planted about the first of June, and will grow and stool or tiller out surprisingly fast, our illustration showing a plant grown from one seed which has 43 stalks. Its growth is truly luxuriant, the broad foliage resembles corn leaves, and if allowed to develop will attain a height of 12 to 14 feet, and bears cylindrical heads from 12 to 20 inches long, closer set with thousands of tiny seeds which are greatly relished by poultry. A crop of this when nearing maturity looks like a field of giant timothy 12 to 15 feet high. The usual way of growing it, however, is to mow the crop when three to six feet high, and it will immediately start again and can be mowed four to six times during the season. If allowed to grow until the flower heads begin to develop before cutting, it will yield the heaviest harvest crop of any fodder plant we know of, and it is greatly relished by all kinds of stock either in its green or dry state. Sow seed very thinly in drills 24 to 36 inches apart. Every farmer, and, in fact, everyone who keeps a cow, horse, or hogs, should try it if they wish to grow an immense crop of fodder, cheaply on a small amount of ground. **Oz. 10c, ¼-Lb. 20c, Lb. 65c, postpaid, 2 Lbs. (sufficient for one acre), \$1.20 postpaid. Must be sown each year.**

ARTICHOKES

The Great Bonanza They are an acknowledged preventative of cholera and other hog diseases, also an excellent food for cattle, sheep and horses. Well adapted to any soil where corn and potatoes can be grown. Three bushels will seed an acre. In planting, cut the same as potatoes, one eye to cut being sufficient. Rows three feet apart and the seed one to two feet apart in rows. Cover two inches deep, as they are not insured by freezing, the better way is to plant them where you can allow them to remain and turn the hogs in on them, and they will help themselves by rooting. Not only will they grow fat, but they will build up large, healthy frames, with plenty of bone and muscle. One acre will keep from 20 to 30 head in fine condition from October until April except when the ground is frozen too hard for them to root. Strong tubers. **Lb. 35c, 3 Lbs. \$1.00, postpaid; Peck, 60c; Bushel, \$2.00; 3 Bushels (enough to plant one acre) \$5.00. Bags, 15c.** One peck or more purchaser must pay express or freight charges.

Mand's Wonder

WE WILL GIVE YOU GOOD VALUE FOR YOUR MONEY IN EVERY INSTANCE

White Wonder Bean

WHITE WONDER BEAN

1,000 Beans to One Vine—40 to 60 Bushels to the Acre—Excellent for Cooking and Baking—No Other Beans Sell Like It.

The grandest bean for a farm crop we have ever seen. Side by side with any bean known to us, it outyields it by fully one-third to one-half, placing it as a marvellous cropper. The pods are large and filled with small-sized pure white beans. Extremely early and sells just at the time when beans are high. We consider it absolutely the finest, largest-yielding, best-selling field bean known. Excellent for cooking and baking. Habit dwarf, very bushy and wonderfully full of pods. Just figure the profit on an acre yielding 40 to 60 bushels. If you don't grow for market, get a pound or two of the best beans for house use during the winter. It's the yield; nothing like it. No bean approaches it in yield, quality and readiness to find sale in the market. That's the universal verdict. It's a healthy and quick seller in all markets. Pkt. 10c, ¼-Lb. 15c, Lb. 40c, 5 Lbs. \$1.75, postpaid. By express or freight at purchaser's expense, Peck \$1.50; Bushel \$5.00. Cotton Bags, 40c each.

Sudan Grass

A New Forage Crop of Immense Value

Sudan Grass is strictly an annual, and dies each year like Millet, and must be seeded again each spring. Height, seven to nine feet. The stems are very small; plant stools wonderfully and produces under favorable conditions, as many as 100 stalks from a single root. Yields a good crop of first-class hay. All stock relish the hay and thrive on it; much superior to Millet hay, and equal to Timothy hay. The haying process is much the same as that of millet or any other hay grass. After cutting, it renews its growth promptly, and in about 40 days another cutting is ready. Ordinarily two or three cuttings may be expected. Price: ¼-Lb. 20c, Lb. 40c, 2 Lbs. 75c, 5 Lbs. \$1.75, postpaid; 25 Lbs. \$6.25, by express or freight at purchasers' expense; Cotton Bags, 40c each.

SEEDING—Sudan Grass should not be sown until soil has become warm in the spring. Planting in cold soil only delays germination and dwarfs the early growth. It can be sown any time during the summer as a catch crop so long as 70 to 80 days intervene before the date of the first expected frost. Sudan Grass can be sown in rows 18 to 42 inches apart and cultivated like corn, or it can be drilled in with a grain drill or sown broadcast by hand. The rows should be as close together as the tools available for cultivation will permit. Seeded in rows 36 to 42 inches apart, 2 to 3 pounds per acre of seed are sufficient. In rows 18 to 24 pounds per acre are required.

TARES or VETCHES

to hay or is expensive, or pasture is poor and costly, it will pay you to grow Vetches as a forage crop. They are sown at the rate of half bushel to the acre, with about one quart of oats to hold them up. Write for price.

SAND or HAIRY VETCH

ceeds well on nearly all soils and thrives surprisingly on poor, light land, and will endure extremes of drought, heat and cold. It improves the soil, being a great nitrogen gatherer. It may be sown either in the spring or fall with about a peck of rye or oats for support; 25 to 30 pounds of seed required to the acre. Lb. 45c, postpaid; 3 Lbs. \$1.20; by express or freight, 10 Lbs., 25c Lb.; 100 Lbs. for \$25.00. Cotton bags, 40c each.

Did you ever grow Big Tom Pumpkins. See Page 60

Sorghum

OR

Sugar Cane

FOR HAY OR FODDER

Only within the last few years has the great value of Sorghum, or Sugar Cane, for hay and fodder become known. It is now rapidly coming into favor. A good authority says it will produce six times the weight of corn fodder per acre, and as it contains a much larger amount of sugar, it is more valuable. If sown thick it can be cut and cured like hay and will produce a very heavy yield of fine material that is greatly relished by cows, sheep and even horses. If sown thin in drills and cultivated once or twice, it will produce a large amount of seed which is as valuable as corn for feeding, and also a heavy yield of fodder which is much finer and more readily eaten by stock than corn fodder. The seed should be sown about the time corn is planted.

AS A PASTURE AND FODDER PLANT it is extremely profitable for this purpose, as the cane can be cut and partly cured, and in this way will yield 40 to 50 tons of magnificent fodder to the acre. For fodder, cut as soon as the blossoms come out on the head. Leave two or three days on the ground, then put in shocks of about one load each. It can be cut repeatedly, and springs up repeatedly again. As a food supply it seems to be magnificent. Cattle and swine eat it with great relish. Treat in feeding like clover.

CULTURE OF SORGHUM CANE—About 30 pounds of seed is required per acre. Use a wheat drill set to a bushel, stopping every other hole. When plants are about 8 inches high, harrow them with a two horse harrow. When about 2½ feet high the first crop can be cut if desired for green fodder. They will spring up quickly. If thought desirable to sow in drills, 30 inches apart, and cultivate same as corn, 5 pounds will be sufficient. If in hills, same distance each way as above, 3 pounds of seed is ample.

Price: Lb. 30c, postpaid; 3 Lbs. 75c, postpaid; by express or freight, 10 Lbs. \$1.50, 30 Lbs. (sufficient to sow one acre broadcast) \$2.50, 100 Lbs. \$7.00. Cotton Bags, 40c each.

For Spring Sowing are grown for a forage crop. They can be cheaply raised, fed green, cured or ensilaged. In Scotland and England they are grown largely for this purpose, and where land is not adapted to hay or is expensive, or pasture is poor and costly, it will pay you to grow Vetches as a forage crop. They are sown at the rate of half bushel to the acre, with about one quart of oats to hold them up. Write for price.

(Vicia Vilosa)—Sometimes called Hairy Vetch. It is very hardy, is valuable as a winter cover crop to prevent leaching, and for forage and fertilizing purposes. It succ

Irish Cobbler

ALL OUR POTATOES ARE GROWN IN NORTHERN ONTARIO

Irish Cobbler The Heaviest Cropping Early Variety—The tubers are a beautiful creamy white. Eyes strong, well developed, and but slightly indented. Flesh white and skin often netted—and here let us say, this netted skin on a potato is Nature's mark of fine quality. Each tuber is distinctly marked with the small white specks peculiar to that very earliest class Ohio Junior, Early Market and Six Weeks. In a field test we found the Cobbler ripened a few days earlier than the Early Ohio, and in quality it was equal to that variety. Any of our customers who grow potatoes for early market will make no mistake in securing some of this extra early and most valuable variety, the **Irish Cobbler**. It outdid all previous records this season, and is a leader. Resisted the rot better than any other variety the past season. Place your orders for these early.

Price of All Potatoes: Lb. 40c, 5 Lbs. \$1.50, postpaid. Write for price of potatoes by peck and bag.

BIG TOM PUMPKIN

Big Tom Pumpkin

Northern Grown SEED POTATOES

IT PAYS TO CHANGE
SEED EVERY YEAR

EARLY ORDERS—Everything points in the direction of a lively demand for Choice Seed Potatoes the coming season, and we would advise customers to send in orders early.

PLEASE NOTE

The prices of Seed Potatoes are subject to market changes and stock unsold. Write for prices stating quantity wanted.

Improved Green Mountain A reliable medium late Potato which is rapidly increasing in popularity—in fact, in some sections it has superseded all other main crop varieties. It seems to thrive in all soils and in all localities, making heavy, healthy vines, and yielding big crops of large, smooth, white skinned tubers of handsome flattish oval form. It cooks white, dry and mealy, and has a desirable flavor exclusively its own. It keeps well, and is not liable to scab or decay.

Pure Early Rose Every farmer and gardener knows the old Early Rose potato, and nothing need be said in its favor. It has no faults. We have been at great pains to get a true, strong strain.

Red River Early Ohio Early Ohio is, without doubt, the most popular early potato in the country. We have more calls for it always than for any other early. Everyone knows that it can be relied on for an early market. Our Red River stock has a reputation all over the country.

This variety of Pumpkin was obtained from a large canner in Ohio, who prefers them to all others. He has for years been improving the strain by careful systematic selection, until, he says, they have reached a degree of perfection for large size, thick meat and heavy weight unequalled by any others. He also says, "More tons of pumpkins can be grown per acre of the Big Tom, whether with corn or by themselves, than any other variety."

Skin and flesh are of a deep, rich orange color, of excellent flavor for pies, etc., cooking soft and tender. For table use and stock feeding, no more profitable or better variety can be grown. In comparison with the Connecticut Field, which is the standard field variety, it will produce twice as many pumpkins to the acre, and each individual pumpkin will weigh half as much again. **Pkt. 10c, Oz. 20c, 2 Ozs. 35c, ¼-Lb. 60c, Lb. \$1.75, postpaid.**

Write for Price List of Clovers and Grasses, Per Bushel and Over—Ready February 15th

RE-CLEANED CLOVER SEED

ALFALFA CLOVER (Canadian Grown).—Alfalfa produces from 3 to 7 tons to the acre. It has as much protein as wheat bran. It does not exhaust the soil; it enriches the soil. It will grow 3 to 5 crops a year. Alfalfa in money value is worth 45 per cent. more than other clovers and 60 per cent. more than timothy. A lamb will winter and thrive on three pounds a day. Sheep fed on Alfalfa will gain eight to fifteen pounds in 75 days, and will double with small grain ration added. **Lb. 60c, 5 Lbs. \$2.75, prepaid.**

ALSIKE—Very hardy and yields abundantly on rich, moist soils; also excellent for pasture. **Lb. 55c, 5 Lbs. \$2.50, postpaid.**

WHITE DUTCH—Highly esteemed for permanent pastures and lawns. **Lb. \$1.00, postpaid.**

MEDIUM RED—Too well-known to need any description. Prices variable. **Lb. 60c, 5 Lbs. \$2.75, postpaid.**

SWEET CLOVER---ALFALFA'S TWIN SISTER

WHITE BLOSSOM OR BOKHARA (Melilotus Alba)—Sweet clover is grown for bees, for hay, for green forage; for its value as a pasture plant and as a soil fertilizer and restorer. It gives promise of becoming a rival of alfalfa on many soils. Its real value is beginning to be appreciated.

It is a biennial plant and bears close resemblance to alfalfa, but it is larger and coarser in growth. It will grow on soils in which

alfalfa cannot thrive and will make excellent growth on lands so hard and barren that they will sustain scarcely any other vegetation. It is the first plant to grow in the spring and furnishes an abundance succulent pasturage equal in quality and value with alfalfa.

We recommend the cultivation of sweet clover for pasture, for hay and for renewing worn-out lands. If handled properly, it will well reward the grower. **Lb. 60c, 5 Lbs. \$2.50, postpaid.**

Permanent Pasture and Other GRASS SEED

Write for prices of Grass Seeds in quantity.

ITALIAN RYE GRASS—Arrives early at maturity, has a great abundance of delicious foliage of a lovely green color. Thrives easily Sow 20 pounds per acre. **Lb. 45c, postpaid.**

ORCHARD GRASS (Rough Cocksfoot)—Exceptional value on account of its earliness and its rapidity of growth. Weight, 14 pounds per bushel. **Lb. 60c, postpaid.**

PERENNIAL RYE GRASS (Lolium Perenne)—A nutritious permanent grass for pastures and meadows. Sow three bushels to acre; 22 pounds to bushel. **Lb. 45c, postpaid.**

PERMANENT PASTURE MIXTURE—Made of grasses and clovers, according to formula from Ontario Agricultural College,

Guelph. Twenty-five pounds required to seed an acre. Write for price, stating quantity.

TIMOTHY—Well-known variety. **Lb. 40c, 5 Lbs. \$1.75, postpaid.**

KENTUCKY BLUE GRASS (Poa Pretensis)—Fancy, extra clean. This grass yields at a very early period of the season. **Lb. 90c, postpaid; 5 Lbs. \$4.25.**

RED TOP GRASS (Agrotis Vulgaris)—Used for lawns, meadows and pastures. **Lb. 65c, 5 Lbs. \$3.00.**

CANADIAN BLUE GRASS (Poa Compress)—Its creeping roots stalks from a fine turf. It thrives well on dry and poor soils. **Lb. 75c, postpaid; 5 Lbs. \$3.50.**

Hubam Clover

(Annual White Sweet Clover)

Wonderful New Clover That Will Revolutionize Agriculture

This is the wonderful new clover that has caused such a sensation throughout the country. It does in one year all that other clovers do in two years. It reaches three to seven feet in height in from four to seven months after planting. It has grown successfully in every state and in most foreign countries. It is the greatest fertilizing plant known, a wonderful hay and pasture crop, and unsurpassed as a honey producer.

At Iowa Experiment Station, after the harvesting of the small grain crop, it produced six times the growth of medium red clover and Mammoth clover, when seeded with the small grain. The drought resistant qualities of this clover are remarkable; without irrigation and with less than one inch rainfall after seeding it has made a growth of seven feet. Fifty thousand sample packages of Hubam seed have been sent out for trial, and it has succeeded in every state and many foreign countries. Its value to agriculture cannot be measured.

Hubam was discovered by Prof. Hughes of Iowa Agricultural Experiment Station. In 1916 there were only 22 plants. The seed has been carefully multiplied, but there was enough seed to plant only a few hundred acres in 1921. It will take years to multiply the seed until the demand can be supplied. There will be great profit in growing Hubam for seed for years to come, as there is a great demand for it from all over the world. Six hundred pounds of seed per acre has been produced. Last year seed sold for \$10.00 per pound. As long as the supply lasts we will furnish it as follows: **\$2.50 per Lb., \$20.00 for 10 Lbs. ORDER NOW.**

PLANT DEPARTMENT

NOTE—We will replace any plants not in good condition when received if we are notified of their condition within one week of receipt of same, but will not be responsible for plants dying afterwards, from any cause.
Ten cents must be added for packing, etc., on plant orders, for less than \$1.00.

GLEN MAPLE GREENHOUSES—The Home of Flowers

The success that has attended our efforts in the large and increased number of orders received in this department obliged us in the fall of 1917 to erect a large range of Greenhouses where every plant we offer on this and the following pages is shown, packed and despatched to thousands of customers all over the Dominion.

We know, with proper care on arrival, every plant should grow and give entire satisfaction.

THE WONDERFUL PONDEROSA LEMON

A Fine Pot Plant For the House.

Nothing that has ever been brought to our notice in the plant line has caused half the commotion that this wonderful Lemon has. It is the true ever-bearing variety. On a plant six feet high, no less than eighty-nine of the ponderous Lemons were growing at one time. It was a beautiful sight to see. The tree was blooming, and at the same time had fruit in all stages of development, from the size of a pea up to the ripe fruit showing it to be a true ever-bearer. Fruit has been taken from this tree weighing over four pounds. The Lemons have very thin rind for such large fruit. It is the juiciest of all Lemons, makes delicious lemonade, and for culinary purposes cannot be excelled. No budding or grafting necessary. Ponderosa Lemon is sure to become popular when it is known. It fruits when quite small, and makes a lovely house plant. Everybody can grow his own Lemons; it will fruit freely each year. Each 60c, 2 for \$1.00.

TRAILING BEAUTY COLEUS

This Coleus is an entirely new break. It is the only one that trails. The foliage is most glorious, having a large, distinct centre of bright pink or red, with a broad border of emerald-green. No plant is more suitable and showy for hanging baskets, window boxes, vases or for pot culture than this one, as its graceful branches hang in lovely festoons, two to three feet in length. Several plants in a basket make a lovely sight. Each, 25c; 2 for 40c.

SHOWER OF GOLD (Genista)

A beautiful yellow flowering plant that grows and flowers freely with ordinary care, covering the plant literally with its rich golden-yellow blooms when well grown. A very popular plant for Easter decorations, at which time it is usually a mass of bloom. 25c each; 2 for 40c.

CUPHEA PLATYCENTRA (Cigar Plant)

Pretty, half-hardy perennial with bright scarlet tube-shaped flowers with black and white lip; excellent for garden or pot culture. Each, 15c.

Ponderosa Lemon

Lady Washington Geranium

The grandest of all flowering plants; do not resemble the common Geraniums in any particular, neither in foliage nor flower; more beautiful in every way. Is of the easiest growth, and literally covered with flowers all the time; and as it requires little or no attention, it is invaluable as a window plant. The coloring and markings of the flowers are most extraordinary—light pink, white, dark purple, black, etc., almost rivalling the Pansy in uniqueness of flower. Each 35c, 3 for \$1.00. NOTE—We cannot supply in any particular color.

FERNS

Boston—The original type with long, graceful fronds, a rapid grower and wonderfully healthy. Mailing sizes, 60c and \$1.00. Large plants by express, \$2.00, \$3.00 and \$4.00.

Roosevelt—Wavy Boston fern, 60c and \$1.00 each.

Whitmani—Beautiful cut leaves, 60c and \$1.00 each.

Maiden Hair Fern—Fine plants, 50c and 80c each.

Asparagus Plumosis—30c, 50c and 75c each.

Asparagus Sprengeri—30c, 50c and 75c each.

Holly Fern—Very durable, 30c and 50c each.

FERNS FOR FERN DISHES

We can supply the most desirable varieties for this purpose. Each 15c, 3 for 40c, \$1.50 per dozen.

Lady Washington Geranium

WE HAVE BEDDING PLANTS OF ALL KINDS. WRITE FOR PRICES.

HARDY PERENNIAL FLOWERING PLANTS

For Permanent Planting in Borders or Beds

The price, in every case, is for strong 1-year old plants, postpaid, and with proper care they cannot fail to grow. Six of any one variety at dozen rate.

Paeonies The old-fashioned Paeony in our grandmother's garden has been eclipsed by the wonderfully improved sorts introduced in recent years. They are the "Queen of Spring Flowers," and are well adapted for massing in beds, and particularly valuable for planting in groups throughout the perennial or shrubbery border, where their brilliant hues add attraction to all around. Their requirements are so simple—a good, rich deep soil and a liberal supply of water during their growing season being sufficient to give an abundance and wealth of flowers. They are perfectly hardy, requiring no protection whatever, even in the most severe climate, and once planted increase in beauty each year.

We can supply any of the following colors of paeonies: Rose, pure white; crimson, pink and pink with cream centre. Each, 60c; dozen, \$5.00.

Aquilegia Columbine—The distinct, clear-cut foliage and delicate arrangement of colors in the flowers of Columbine, make it one of the showiest and most desirable of the hardy garden plants.

Long-Spurred Hybrids—This is the most admired type of Columbines. They have been produced from the strains of several famous hybridizers and are much superior to the usual grade. The plants are of strong, thrifty growth. The flowers of largest size vary in color through charming tones of cream, pink, lavender, blue, white, red, etc., hardly any two being exactly alike. We offer them in mixed colors only. Each 25c, per dozen \$2.50.

Canterbury Bells Cup and Saucer —A fine type of this old favorite, differing from ordinary Canterbury Bells in having a large calyx below the bell, giving the flower a cup and saucer appearance. Each 20c, doz. \$2.00.

Medium—The well-known "Canterbury Bells." Bloom in July; height, 2 to 3 feet. Each 20c, dozen \$2.00.

Dielytra Bleeding Heart —The pink and white heart-shaped flowers are borne on long graceful stems, making the plant, with its finely cut foliage, very attractive. The plants increase in size from year to year and are beautiful, even when not in bloom. Each 25c, dozen \$2.50.

Digitalis Fox-glove—Furnishes a grand display of thimble-shaped flowers in immense spikes during July and August.

Gloxiniaeflora Mixed—Beautiful strain of finely spotted varieties. Each 20c, dozen \$2.00.

Shasta Daisy One of the most valuable perennials, blossoms all summer, producing showy blooms of the purest white. Each 25c, dozen \$2.50.

Coreopsis Lanceolata One of the best of all the hardy plants for cut flowers. From June until frost it displays a profusion of golden blossoms uplifted on long graceful stems. Each 20c, dozen \$2.00.

Delphinium Perennial Larkspur—Long, showy spikes of flowers from June until frost, which furnish the most satisfactory blues. Each 20c, dozen \$2.00.

Delphinium

Gypsophila Baby's Breath — Small white flowers on branched stems so thick as to give the plants a lace-like effect. This is already a favorite with florists for use with other cut flowers. Each 20c, doz. \$2.00.

Gaillardia Blanket Flower—Makes one of the most gorgeous and prodigal displays of all perennials. Flowers often measure 3 inches in diameter, on clean 2-foot stems. A hard centre of deep maroon is thickly bordered by petals of orange and yellow, strikingly ringed by circles of crimson red and maroon. Poor soil will do, and a constant show is assured from June till frost. Each 20c, dozen \$2.00.

Hollyhock Indispensable plants, possessing a character peculiar to themselves which renders them especially valuable to break up any set effect in lawn planting, with their towering spikes of showy flowers. As usually treated, the Hollyhock is biennial, but if planted in rich loam where the water will not settle around the crown in the Winter they become very satisfactory perennials.

Double—Very double, rosette blossoms. Your choice, white, rose, red, maroon, pink, salmon, crimson or yellow. Each 25c, dozen \$2.50.

Hardy Garden Pinks Old favorites, bearing their sweet, clove-scented flowers in the greatest profusion during May and June. They are indispensable for the edge of the hardy border and for cutting; 1 foot. Each 20c, dozen \$2.00.

Iris Mixed colors. Each 20c, doz. \$2.00.

Papaver Poppy—These varieties are handsome both in flower and foliage. They are hardy and perennial.

Nudicaule—(Iceland Poppy)—One foot, June. Flowers are beautiful bright yellow, white or orange, each on a long clean stem, very fine for cutting. The foliage is pretty and the constant succession of bloom makes it desirable as a border. One of the earliest to blossom. Your choice of the following colors: Orange-scarlet, bright scarlet, white or yellow. Each 20c, dozen \$2.00.

Orientalis—(Oriental Poppy)—12-18 in. One of the very showiest flowers in the hardy class. The foliage is deeply cut and fern-like and of a beautiful dark green. The flowers are extremely large and of a gorgeous color, shaded to black at the centre. They are borne on long stems and are beautiful flowers for the vase. Should be found in every collection. Each 25c, dozen \$2.50.

Perennial Phlox Everyone succeeds with it and whoever likes cut flowers appreciates the many showy heads borne on long stiff stems.

Phlox plants grow larger year after year. As the plants become stronger the blossoms increase in number and size, reaching their highest development about the third or fourth year.

Your choice of the following colors: White, red, pink, scarlet, lavender and pearly white with pink eye, all named. Each 25c, dozen \$2.50.

Sweet William A fine old garden favorite, biennial, but one which perpetuates itself by self-sowing. Height, 18 inches. Flowers in June and July. The colors are very bright and effective and in an endless variety of white, pink, crimson and scarlet; many sorts variously edged, eyed and spotted. Double varieties mixed. Each 20c, dozen \$2.00.

HARDY PERENNIAL COLLECTION

The above varieties of Hardy Perennial Plants represent the very best sorts for the Canadian climate, and were selected as being the most desirable for that purpose. All are hardy and should give very satisfactory results, season after season. We now offer a collection of twelve varieties of our selection, all different. We cannot list the varieties as each collection may differ from the others and the date at which the order is received may also have something to do with what one may receive. Nevertheless each collection will prove of great interest and value to the purchaser and will be worth much more than is asked for it. One dozen perennial plants, 12 varieties, \$1.50, postpaid.

Add 10c for postage on all plant orders for less than \$1.00.

Our One Dozen Hardy Perennials Flowering Plants for \$2.50 is Excellent Value.

Hybrid Tea Roses

This is a class of recent creation, embodying the delicate shades and peculiar fragrance possessed by the Tea Roses combined with the vigor and more pronounced pink and crimson shades of color previously confined to the Hybrid Perpetual class. In our opinion the Hybrid Teas will supersede all others because of their superior constitution and marvelously free-flowering qualities. In a sentence, it may be said they combine all the better traits of the two classes from which they sprang, altogether a great advantage. Almost all are highly perfumed, an attribute absolutely essential to a perfect Rose. They are ever-bloomers and hardy. **Price of the following: \$1.00 Each, 3 for \$2.75, 12 for \$10.50.**

ANTOINE RIVOIRE—(Pernet Ducher, 1896), H. T.)—Creamy white, delicately tinted with pink; extra large petals, making a bloom of decidedly distinct and beautiful form; full and double.

DOUBLE PINK KILLARNEY—Possesses all of the good points of Killarney, stronger grower, larger flowers with one-third more petals, two great gains for warm weather.

DOUBLE WHITE KILLARNEY—Sport from the Waban strain of White Killarney, larger size, greater purity of color, more vigorous growth than the parent.

GEORGE DICKSON—As near as we can describe it, the color is a velvety black-crimson, the back of the petal being heavily veined with deep pure crimson maroon. We have regularly had blooms of the highest exhibition standard quite five inches across. It has wonderful lasting qualities, not only as to the retention of its color, but also in its shade and freshness. Awarded the gold medal of the National Rose Society of England, besides many other first awards at various other shows in England and Ireland.

ETOILE DE FRANCE—Color a lovely shade of clear, red-crimson velvet; very fragrant.

GRUSS AN TEPLITZ—(Crimson Hermosa, H.T.)—The clusters of fine long buds and magnificent bright crimson flowers, with fiery red shading, make a brilliant show all summer, and its beauty is still further enhanced by the lovely green foliage, which in the young growth is a dark, rich bronze. It is very fragrant, free-blooming, hardy and vigorous.

IRISH FIRE FLAME—One of Alex. Dickson's single roses that is a good forcer. It makes beautiful buds, having great substance. It comes with long stems. Color is old gold or coppery-yellow, flamed with ruddy-crimson.

OPHELIA (W. Paul, 1912)—Salmon-flesh shaded with rose, large and of perfect shape; of excellent habit, the flowers standing up well on long, stiff stems and produced in great profusion. Excellent for forcing and a fine decorative variety. Growth vigorous. Certainly a glorious Rose. Be sure to have "Ophelia" fixed in your memory.

SUNBURST (Pernet Ducher, 1912)—This magnificent giant yellow Rose is a fine forcer; it stands head and shoulders above all others of its color and will rank with American Beauty and the Killarneys in value and grandeur. The color is orange-copper or golden-orange and golden-yellow; edge of petals lighter; all intense shades, extremely brilliant in effect. Some call the color cadmium-yellow. It is the yellowest of all Roses in the everblooming class.

Hybrid Perpetual Roses

This is a beautiful class and cannot be too highly recommended, including, as it does, many of the hardiest early and late flowering kinds and nearly all of the superb rich crimson, red and pink varieties which make such pleasing contrasts to the yellow and white Teas. These are hardy.

Price of the following: Each \$1.00, 3 for \$2.75, 12 for \$10.50.

ALFRED COLOMB—Bright carmine; large, full, globular; fragrant. Vigorous and free flowering.

AMERICAN BEAUTY—Magnificent, large, globular flowers of a beautiful rosy crimson, on vigorous stems; delightfully fragrant.

CAPTAIN HAYWARD—Scarlet-crimson; of perfect form, fragrant. Vigorous; continuous bloomer.

FRAU KARL DRUSCHKI (WHITE AMERICAN BEAUTY)—This grand white rose has become renowned as the very highest type of its class and the best snow-white rose ever introduced. It is an extraordinary strong grower, and has the vigor and hardness of an oak. Its magnificent flowers are nothing less than glorious—immense in size and produced with great freedom. The color is a marvelous white, without a tinge of yellow or any other shade. A true paper-white, the standard by which all white Roses are judged.

GENERAL JACQUEMINOT—Brilliant scarlet-crimson; an old favorite and one of the best-known roses in cultivation; does well everywhere.

HUGH DICKSON (Hugh Dickson, 1904)—Color brilliant crimson shaded scarlet; large and fine form, opening well in all weathers. Very sweetly scented.

MAGNA CHARTA (W. Paul, 1876)—Bright rose, very large and double, of good form and fragrant; extra.

PRINCE CAMILLE DE ROHAN—Deep velvety crimson-maroon, the best of all the hardy dark roses.

ULRICH BRUNNER—Large cherry-crimson flowers of fine form. Very free flowering and vigorous. A fine all-purpose rose of standard excellence.

JULES MARGOTTIN—Bright scarlet, one of the best.

MOSS ROSES—The origin of the double Moss Rose is left to conjecture. They have always been favorites, for what can be more elegant than the bud of the Moss Rose and more delicious than its fragrance. Perfectly hardy.

BLANCHE MOREAU—White, perfect and free flowering.

CHAPEAU DE NAPOLEON—Red, large and full, nicely mossed.

Hardy Climbing Roses

These roses are suitable for planting where they can climb on walls, fences, galleries, porches, pillars, pergolas, arches, etc., in fact, wherever a hardy climber is required. **Price of the following, except where noted: Each \$1.00, 3 for \$2.75, 12 for \$10.50.**

AMERICAN PILLAR—Of great beauty, which appeals to everyone. The flowers are of enormous size, three to four inches across, of a lovely shade of apple-blossom pink, with a clear white eye and cluster of yellow stamens. These flowers are borne in immense bunches and a large plant in full bloom is a sight not easily forgotten. They last in perfection a long time, and are followed by brilliant red hips or berries, which are carried late into the winter; and as the plant frequently retains its lovely green foliage until the end of November, beautiful throughout the autumn. **Each \$1.25.**

RED DOROTHY PERKINS—It is a good deal to claim for a rose, but we are within bounds when we describe it as a brilliant Crimson Rambler flower on glossy, varnished Wichuraina foliage. The defects of Crimson Rambler are denotation by insects; the infusion of Wichuraina blood assures an ornamental climber which is nearly evergreen, and this will assure this lovely crimson-scarlet pillar rose a place in every garden, for it is quite hardy in addition to all its other fine points. Flowers are very double, produced in large trusses of thirty to forty, and almost every eye on a shoot produces clusters of flowers. The color is intense crimson-maroon, the tips of the petals tinged with scarlet. The finest of all Crimson Ramblers. **Each \$1.25.**

CRIMSON RAMBLER—Bright crimson flowers produced in large clusters of pyramidal form; grand variety for pillars and arches and to train over porches; also makes a fine attractive hedge. Awarded gold medal, N.R.S.

PINK TAUSENDSCHON—We have in this variety the ideal pink Climbing Rose. The color resembles the well-known Ulrich Brunner Rose with its famous cherry-red color.

SHOWER OF GOLD—Color a deep golden-yellow, with orange shadings in the centre. This fills the "long felt want" for a "Yellow Rambler."

PINK DOROTHY PERKINS—Beautiful deep pink; flowers are borne in large clusters; very sweetly scented.

FLOWER OF FAIRFIELD—A counterpart of Crimson Rambler in every respect; ever-blooming tendencies; large cluster of flowers.

WHITE DOROTHY PERKINS—We have the pleasure of offering this White Dorothy Perkins that in every way is the equal, if not superior, of Crimson Rambler as a red, and Dorothy Perkins as a pink. This rose has no rival as a white climber.

Polyantha or Baby Rambler Roses

They are of dwarf habit and bloom so freely as to cover the entire plant with bloom all through the summer and fall. The plants are splendid for bedding, or as edgings for borders they are hardy. They are useful, either pot grown or for bedding purposes or for hedge effects. Completely hide the plant with bloom from early till late. **Price of the following except where noted: Each \$1.00, 3 for \$2.75, 12 for \$10.50.**

ORLEANS BABY (NEW)—The showiest and prettiest of all the Baby Ramblers. This charming and dainty rose is of beautiful rounded habit and is a huge bouquet of deep cerise or geranium-pink with distinct showy centre of pure white; florets not crowded but of beautiful arrangement, making as a whole a charming combination that cannot be beaten. The color is irresistible. The plant grows like a weed and the flowers are nearly "immortelle" in their lasting qualities. We believe that they will outlast almost any other rose in existence with their stiff paper-like texture. This pretty rose has taken Europe by storm, and has made a sensation. Awarded gold medal. **Each \$1.00.**

BABY TAUSENDSCHON—A bush form of the "Climbing Thousand Beauties," having all the charms in the variable coloring in its flowers that its parent has.

CATHERINE ZEIMET, OR WHITE BABY RAMBLER—Grows to a height of twenty inches and produces double pure white flowers in abundance.

HARDY DECIDUOUS SHRUBS

Until seen, one cannot appreciate the effect that can be brought out by properly arranging and grouping the wonderful assortment of foliage, ranging in color from the darkest green and purple to light orange and silver tints. For hedges and for giving privacy to home grounds, they are indispensable; and if selected with reference to period of blooming, it is possible to have flowers continuously from April to November. No yard is complete without one or more beautiful shrubs.

BERBERIS (Barberry)

Thunbergi (Japanese Barberry)—Low growing with glossy dark green foliage, which turns to bright red in autumn. The branches are loaded with small bright red berries in autumn and are clothed with sharp spines. Much used in forming low hedges. **Each, 60c.**

Vulgaria Purpurea (Purple-leaved Barberry)—Of upright habit with bluish purple leaves and masses of coral red berries in clusters in autumn. **Each, 60c.**

DEUTZIA

Crenata F. Pl. (Double Deutzia)—Of tall habit. In June has racemes of double white flowers tinted with pink. **Each, 60c.**

Pride of Rochester—Identical with above except the flowers are pure white. **Each, 60c.**

Gracilis—Of dwarf habit with a profusion of graceful pendulous white flowers in June. **Each, 60c.**

FORSYTHIA (Golden Ball)

A valuable genus of shrubs from China and Japan, blooming very early in spring. Flowers yellow, drooping, borne in great profusion. Entirely hardy here and of the easiest culture.

Fortunei—A strong growing species, with stout, erect branches and rich green foliage, blooming in April and continuing for some time. It is a conspicuous object in shrubbery. **Each, 65c.**

HYDRANGEA

Arborescens Sterilis (Aborecens Grandiflora)—Snowball Hydrangea—Of upright habit and perfectly hardy. It has large, full heads of snow-white flowers in lavish profusion from late in June until the last of August, when but few other shrubs are in bloom. Especially useful for planting in connection with the popular Hydrangea paniculata grandiflora to precede it. **Each, 60c.**

Paniculata Grandiflora—One of the best known and most popular of flowering shrubs. Of vigorous growth and spreading habit with broad terminal panicles of pure white flowers; in August frequently a foot long. In September the flowers change to pink or rose color, and remain in good condition for a long time. **Each, 65c.**

SPIRAEA

Anthony Waterer—The finest of Dwarf Spiraeas. It excels all others in brilliancy of color—a purple crimson—and is the most profuse and persistent bloomer of them all. **Each, 60c.**

Billardi—Of erect habit and produces long, dense panicles of rosy-pink flowers from June until October. **Each, 60c.**

Callosa Alba—Similar to A. Waterer inhabit, but has clear white flowers in dense heads. **Each, 60c.**

Prunifolia Fl. Pl.—An old favorite. In May and early June, there appears along the branches daintily

SPIRAEA
VAN HOUTTEI

pure white, very double flowers. It's pretty, glossy, deep green leaves change to crimson and purple in autumn. **Each, 60c.**

Van Houttei (Bridal Wreath)—The most popular and most valuable of all the Spiraeas. In late May and early June, its pure white flowers are produced in such masses as to entirely cover the broad spreading bush. Frequently planted in hedges. **Each, 60c.**

VIBURNUM (Snowball)

Plicatum (Japanese Snowball)—A choice hardy shrub of compact upright habit. It produces large elegantly formed dense clusters of pure white flowers in great profusion during the last of May and early June. **Each, 60c.**

Opulus Sterilis (Common Snowball or Guelder Rose)—An old variety that retains its popularity. Of strong growth and spreading habit. In late May and early June it bears large round clusters of pure white flowers hung on long swaying stems. **Each, 60c.**

WEIGELIA (Diervilla)

Eva Rathke—Flowers deep garnet red, produced in abundance throughout the summer and autumn. **Each, 60c.**

HARDY CLIMBING VINES

AMPELOPSIS

Veitchi (Boston or Japanese Ivy)—The most popular and best of climbers for covering walls, etc., clinging firmly to brick, stone or other material, and forming a perfect coat of deep, glossy-green foliage, which turns to crimson and gold in autumn. Of rapid growth; entirely hardy. **Each 40c, dozen \$4.00. Extra large plants, Each 60c, dozen \$6.00.**

ARISTOLOCHIA

Sipho (Dutchman's Pipe)—A strong growing species with large plate-like overlapping leaves, which retain a fresh, light green color through the summer and autumn. The pipe shaped flowers of yellowish-brown appear in July and are concealed by the heavy leafage. Very useful in covering stonework, trellises, etc. Strong plants. **Each 85c, 10 for \$8.00.**

CLEMATIS

Paniculata (Japanese Virgin's Bower)—The finest of all hardy vines for airy grace and beauty. It quickly grows to a height of 15 to 20 feet and spreads out in all directions. In August and September, when most other vines have ceased to bloom, it is completely covered with a sheet of fleecy white, made up of numerous pure white, star-like flowers on long stems, and so fragrant that the air is perfumed to a great distance. Its masses of delightful bloom remain until frost, and are succeeded by tufted seed pods. Extra heavy roots. **Each 75c, 3 for \$2.00.**

LARGE FLOWERED CLEMATIS

Any of the following varieties, **Each \$1.00**, or one of each for **\$1.75, postpaid.**

Henryi—The best variety, producing large white flowers. Its large, clear, ivory white flowers appear in great numbers throughout the summer.

Jackmanni—The most popular of the large flowered varieties. Its flowers are rich, velvety, violet-plum and are produced in such profusion as to form a veritable cloud of bloom.

HONEYSUCKLE (Lonicera)

Hall's Japan (L. Halleana)—An evergreen variety of vigorous growth. From May to November it produces pure white, fragrant flowers, that change to buff in profusion. **Each 85c.**

Supervirens (Scarlet Trumpet Honeysuckle)—Blossoms more or less all summer. Long, deep crimson flowers borne profusely in clusters. The flowers are followed by ornamental scarlet berries. **Each 85c.**

Monthly Fragrant or Dutch (L. Belgica)—During June and July it produces a profusion of red and yellow delightfully fragrant flowers. It is frequently termed Woodbine. **Each 85c, one of each \$2.25, postpaid.**

WISTARIA

Chinese Blue (Sinensis)—The flowers of soft, dainty lavender blue are produced in pendulous racemes a foot or more long in May, before the leaves expand. They appear in great numbers. **Each \$1.00.**

Chinese White (S. Alba)—Similar to the blue variety but with pure white flowers. **Each \$1.00.**

GENERAL LIST OF HOUSE PLANTS

TRADESCANTIA

Splendid trailing foliage plants of quick and easy growth that harmonize with Ferns.

Variegata—A new Wandering Jew. Leaves are white and green, very beautiful.

Multicolor—Large beautiful leaves of bronze and silver; highly ornamental. Each 20c, the two for 35c.

DRACAENA INDIVISA

A splendid house or garden plant with slender drooping leaves. It is used extensively as a centre plant for vases and for porch and window boxes. It is unsurpassed for hardiness in the house and eminently fitted to contrast with Palms and other decorative plants. 50c and 75c.

REX BEGONIAS

Silver Spotted—Medium leaves.

Silver Ivy Leaved.

Beautiful plants. Each 40c, 3 for \$1.10.

LAVENDER

English Lavender—Extra strong flowering plants. Each 20c.

CACTUS

All nice strong plants in great variety. Strong seedling plants. Each 50c.

PRIMROSES

Strong plants, to flower the whole summer. Finest plants for the window.

Forbesi (Baby Primrose)—Pink. Each 30c

Obconica—Large flowers, rose. Each 30c.

GIANT CYCLAMEN

Superb Varieties—White, salmon, red, crimson. Each 40c.

HYDRANGEAS

Each, 60c.

General de Vibray—Bright rose.

Otaska—Pink, large.

Mousseline—Blue.

Mad. E. Moulliere—White.

CARNATIONS

Tall giant perpetual flowering. Any of the following varieties. Each 25c, 3 for 70c.

Gorgeous—Glowing crimson.

Enchantress—Pink.

Benora—White, striped crimson.

Hailowarden—Crimson clove.

Marguerite—Double varieties, all colors.

CHRYSANTHEMUMS

PRIZE WINNING, LARGE FLOWERED

Roman Gold—Golden yellow.

Dr. Enguehard—Bright pink.

W. Turner—Magnificent pure white.

Crimson King—Rich golden crimson.

Golden Glow—Refined golden yellow, early.

Ivy Gay—Immense, pink.

Any of the above Varieties, 30c each, 3 for 80c.

GERANIUMS

DOUBLE

Each 35c, 3 for \$1.00

Mad. H. Buchner—Double white.

La Favourite—Double white.

S. A. Nutt—Dark crimson.

Beaute Poitevine—Salmon.

Heteranthe—Bright scarlet.

American Beauty—Carmine.

DOUBLE IVY LEAVED

Each 35c, 3 for \$1.00

Rycroft Surprise—Soft pink.

Chas. Turner—Deep pink.

Incomparable—Rich crimson.

NEW—COLEUS—NEW

The Gems of the Garden in Colors. Our own originations. Superb collection.

Paschendale—Richest crimson shades, green edge. Each 20c.

The Somme—Crimson on dark ground, edged green and crimson. Each 20c.

Cambrai—Bright rose, dark ground. Green edge. Each 20c.

St. Quentin—Dark rose, crimson. Each 20c.

Ypres—Rich pink, centre, crimson red, tipped yellow. Each 20c.

Amiens—Rose pink, crimson and green. A beauty. Each 25c.

Golden Bedder—Golden Queen. Each 20c.

Beckwith Gem—Dr. Ross. Each 20c.

FUCHSIAS

Each 30c, three for 80c.

Black Prince—Deep rose pink, single.

Speciosa—Good pink, single.

Trophee—Double purple, superb variety.

HELIOTROPE

Montreal Blue—Dark blue. Each 20c.

PARLOR IVY

Very fast growing basket plant. Each 20c.

DOUBLE PETUNIA

NEW SUPERB GIANT DOUBLE FLOWERS

Edith Cavell—Pure white, fringed. Each 25c.

General Allenby—Pink and rose. Each 25c.

General Maude—Mauve and white crested. Each 25c.

Marshal Foch—Giant Crimson. Each 25c.

Marshal French—Giant crimson and white. Each 25c.

Viscount Kitchener—Magnificent flower, like a pale Japanese Iris. Each 25c.

SUMMER FLOWERING BULBS

SPECIAL NOTICE—The packages or boxes in which the bulbs are received should be opened and unpacked at once upon receipt. The bulbs not needed for immediate planting should be spread out thinly in a dry, cool place where they will be safe from the extreme heat or freezing.

GLADIOLUS

The following varieties, each 10c, dozen \$1.00, postpaid. By express or freight, 100 for \$6.00. Add 40c per 100 if wanted by mail.

America—The sterling qualities of this variety have placed it in the foreground of all Gladioli, and it has come to be used as a standard by which all others are judged and compared. Flesh pink, tinted with lavender. Vigorous and easily grown; long spike. Large flowers, well placed, excellent foliage.

Pink Beauty—Brilliant dark pink with distinct red dark blotch. The earliest of all; best forcer, extra selected.

Baron Hulet—The finest blue Gladiolus yet seen. Rich deep color of an indigo shade.

Golden West—One of the best exhibition varieties on account of the variety of markings, the color being a clear orange scarlet, the lower petals striped and blotched with golden yellow faintly suffused with violet shadings. The individual flowers are of large size and seem to stand out boldly, making it very noticeable among any collection.

Glory of Holland—Large pure white tinted rose. Strong healthy grower and free bloomer.

Schwaben—A most meritorious imported variety of wonderful vigor, with strong erect spikes and large well-expanded flowers of a clear canary-yellow with a small blotch of deep garnet in the throat. This may now be considered the best and freest growing yellow variety.

I. X. L. Mixture—A splendid well-balanced mixture, containing a marvelous variety of bright colors, many charmingly blended, striped, and blotched. For brilliancy these Gladioli cannot be surpassed. Those who wish an ample supply to cut for bouquets should plant liberally of this choice mixture at intervals of two weeks. We were awarded the first prize for largest and best collection of bloom at the Western Fair, as grown from such bulbs as we now offer you. Price within the reach of all. Dozen 60c, 25 for \$1.10, 50 for \$2.10, 100 for \$4.00.

Augusta—Love pure white, with blue anthers; strong, straight spikes, often having two or three branches.

Halley—The predominating color of these flowers is delicate salmon pink, with a slight roseate tinge; the lower petals bear a creamy blotch with a stripe of bright red through the centre, the whole producing a delightful effect.

Mrs. Francis King—Effective flower spike with flower four and a half inches across, and five to six flowers well spread out on the spike at the same time; gives for vases an effect not produced by any other Gladiolus. Brilliant flamingo pink blazed with vermilion red; is most effective both in daylight and under artificial light.

Empress of India—Very dark red with white blotch on throat. A variety that commands marked attention; extra fine.

Panama—Exquisite and magnificent, being fully the equal of America in form and size, but superior to it in color, being more on the order of salmon pink.

Peace—One of the grandest white varieties. The pale lilac feathering on the lower petals, together with its strong, broad, rich green foliage and spike, make it a most desirable Gladiolus in any collection.

Prince of Wales—Beautiful light salmon with orange shade, very early. First class certificate Haarlem.

10c MUST BE ADDED FOR POSTAGE AND PACKING ON ALL PLANT ORDERS FOR LESS THAN \$1.00

DAHLIAS

Cactus Dahlias

The following embraces the very best Cactus to date. The highest types of perfection in Cactus Dahlias, and from our observations in the fields we offer them with the utmost confidence that they will give the greatest satisfaction to Dahlia lovers who want the very best to be had.

Each 35c, 10 for \$3.00—Your Selection

MARJORIE CASTLETON—The best standard pink Cactus Dahlia. It is much softer than most of the pinks, and is an early, continuous bloomer. The color is soft rosy pink, tinting lighter toward the centre. It is a very rapid grower, with good stems and keeps well after cutting.

GOLDEN GATE—A very large hybrid cactus of a rich deep golden yellow, suffused and shaded fawn, lights up well under artificial light. Long stiff stems, very free.

GENERAL BULLER—Very bold and striking. Rich velvety maroon, shading to crimson, tipped white; a profuse bloomer on stiff stems, well above the foliage.

KRIEMHILDE—Deep cerise pink, tinting to creamy pink at centre. A distinct and valuable variety as the flowers keep a long time after cutting.

LIBELLE—Another grand variety of medium size, a profuse bloomer on long stiff stems. Color a beautiful aster purple; very effective.

WHITE SWAN CACTUS—A beautiful pure white cactus, medium size and a profuse bloomer on long stiff stems. Fine for cutting and the garden.

QUEEN OF HEARTS—A beautiful pure white with yellow at base of petals, making it a most lovely and effective flower.

Decorative Dahlias

The Decorative Dahlia is an intermediate class between a Cactus and Show Dahlia. The most popular and valuable of Double Dahlias. The flowers are very large, full to the centre. They are of varied forms, flat, incurved or reflexed petals, but above all, strong vigorous growers, early and free bloomers. Among this class is found many of the best commercial cut flower varieties.

Each 35c, 10 for \$3.00—Your Selection

AYESHA—Immense size, clear light yellow, of beautiful regular form. The plant is a very strong vigorous grower and free bloomer. Fine for garden, exhibition and commercial purposes.

DR. TYRREL—A very large, rich bronzy golden yellow, shaded orange. A rather late flower of great size, on long stiff stems.

JACK ROSE—The best crimson for garden or cutting; that brilliant crimson red that made the "Jack" Rose popular and suggested the name.

LYNDHURST—Brightest vermilion; the best bright red for stems. An early, free and continuous bloomer on long straight stems.

MELODY—One of the finest, being of splendid regular form with full high centre and reflexed outer petals. Color clear canary yellow, tinting to creamy white at the tips; an effect so delicate and pleasing as to suggest the name.

MINNIE McCULLOUGH—One of the most indispensable decorative varieties that is largely, but should be universally, grown. It is entirely distinct, in a class by itself, on account of the combination of Autumn shades—the gold and red of Autumn leaves. The flowers must be seen to be fully appreciated. Especially under artificial light. Selected stock.

PERLE DE PARC—Very large white with long stiff stems. A profuse bloomer.

PINK JACK ROSE—A pink sport of Jack Rose; a very free bloomer and fine for bedding.

CANNAS

The finest plants for the garden. No flower-garden complete without Cannas. Any of the following dormant roots: **Each 25c, dozen \$2.50. Growing Plants 40c each, dozen \$3.50.**

Fanal—Fiery cinnabar red, 4 feet.

Austria—Pure canary yellow, red dots, 4 feet.

Pennsylvania—Vermillion scarlet, 5 feet.

Crimson Bedder—Bright crimson, 4 feet.

Chas. Henderson—Brilliant crimson, 4 feet.

Queen Charlotte—Red bordered with golden band, 3 feet.

King Humbert—Orange scarlet flowers, bronze foliage, 5 feet. Used extensively for bedding.

RED DUKE—Very large, rich dazzling cardinal red; splendid form with quilled petals. A red Grand Duke Alexis.

SYLVIA—Deep pink, tinting to light pink at the centre; large perfectly formed flowers produced profusely on long stiff stems. This variety is indispensable where quantity of flowers are wanted. It is a strong vigorous grower, and always blooms. Selected stock.

Paeony Flowered Dahlias

Each 40c, 10 for \$3.50—Your Selection

This is one of the newer types, also called the Art or Artistic Dahlias. The true type resembles the Japanese Paeony; yet several of the most valuable and popular varieties differ from the true type.

BARON G. DE GRANCY—A waxy, almost pure white; a flower of excellent type, perfect form and purity of color. The blooms are borne profusely on long graceful stems.

CANARY—Pure canary yellow of very largest size; an early, free and continuous bloomer on long slender stems, one of the best.

FORDHOOK BEAUTY—An outstanding shade of bronzy red, delicately suffused with salmon and yellow. A beauty.

HORTULANUS BUDDE—Large rich scarlet on long stems. A strong grower and free bloomer.

Show Dahlias

Each 40c, 10 for \$3.50—Your Selection

Show Dahlias are a branch of the old Ball type, being of perfectly full rounded regular form, cupped or quilled petals and solid color or tipped darker than the ground color.

CAROL—A beautiful ball of small size, but beautiful round full form, with quilled petals and clear pink color. Large strong plants and produces the lovely flowers freely on long stiff stems.

DUCHESS OF YORK—Yellow heavily tipped carmine, shaded darker. A fine variety.

EMILY MAY—Yellow flaked rosy lake, beautiful effect.

QUEEN VICTORIA—Rich golden yellow, quilled petals. A strong grower and a profuse bloomer.

RED HUSSAR—Richest dazzling cardinal red. A strong vigorous grower and a free bloomer on long stems. Best red show Dahlia for cutting.

STRADELLA—Deep purple crimson, early and profuse.

WHITE SWAN—Pure white, the standard commercial white Ball Dahlia. A strong grower and free bloomer.

Panama—Orange-red, margin of yellow.

Uncle Sam—Massive brilliant orange-scarlet.

Mrs. F. Canard—Exquisite salmon-pink.

Eureka—Giant white flowers.

Firebird—Grand glistening scarlet.

Goldbird—Grand glistening yellow.

BEGONIAS

Single Tuberous Rooted—Giant flowers, superb colors, white, pink, crimson, yellow. **Each 25c, dozen \$2.50, 25 for \$4.50.**

Double Tuberous Rooted—Double flowers of immense size. White pink, yellow, crimson. **Each 30c, dozen \$3.25.**

THE ABOVE DAHLIAS ARE THE BEST OFFERED IN THEIR DIFFERENT CLASSES.

CHOICE FRUITS

ST. REGIS EVERBEARING—THE "EARLY 'TILL LATE" RASPBERRY

Raspberries for four months. That's what you get when you plant the St. Regis. Moreover, they are not only raspberries, but raspberries of the very highest grade—in size, color, firmness and flavor.

The merits of this truly reliable everbearing raspberry may be summarized as follows:

1. It is the earliest of all red raspberries; beginning to ripen from June 15th to 20th—just as the strawberry crop is waning.
2. It is wonderfully prolific; the first or main crop being far greater than that of any other red variety known.
3. It gives a crop of fruit all summer and autumn, fruiting on the old canes in generous quantities until late in August. By this date berries begin to ripen upon the young canes, which continue to produce berries until severe frosts occur.
4. The berries are of a bright crimson, of large size and of surpassing quality—rich, sugary, with full raspberry flavor. Keep in good condition longer after being gathered, than any other red raspberry.
5. The canes are of a stocky, strong growth, with a great abundance of dark green leathery leaves.
6. It succeeds upon all soils, whether light and sandy or cold, heavy clay, and the canes are absolutely hardy.

Each 25c, dozen \$2.50, postpaid; 100, \$12.50, by express; 6 at dozen rate; 50 at 100 rate.

RASPBERRIES—Each 20c, 3 for 50c, 12 for \$1.50.

Cumberland—Black, very large; very similar to Gregg in quality and firmness; in hardiness and productiveness it is unexcelled. One of the best mid-season market berries.

Cuthbert—Deep, rich crimson, large to very large; very firm. One of the very best market varieties. Season, medium to late.

Marlboro—An early variety of great value, ripening a week earlier than Cuthbert. A vigorous grower, fruit large, and of finest quality. Cannot be equalled for clay soils.

GOOSEBERRIES—Each, 50c; 12, \$5.00.

Downing—Fruit large, roundish, light green, with distinct veins, skin smooth, juicy and very good, vigorous and productive.

Houghton—An American variety, bears abundant and regular crops, fruit smooth, red, tender and good.

BLACKBERRIES—Each 25c, 3 for 60c, 12 for \$2.00.

Kittatiny—Is ripe as soon as black, and much earlier, sweeter and better in all respects than the Lawton, which it resembles.

Eldorado—Medium to large, jet black, melting, sweet and rich small seeds and core; very hardy and productive.

CURRENTS—Each 30c, 3 for 75c, dozen \$2.75.

Fay (Fay's Prolific)—Bush vigorous; cluster medium to long; color, darker red than cherry; berry averages large; juicy and less acid.

Black Champion—A good black currant. Berry and cluster large; a heavy annual bearer.

Cherry—Large berries, bright crimson; of sharp acid flavor.

GRAPES—Each 40c, 3 for \$1.10.

Brighton (Red)—Bunch medium to large, long, compact, shouldered; berries medium, skin thin, flesh tender, sweet with scarcely any pulp; quality best. One of the best early red grapes.

Campbell's Early—A superb black grape; hardy, vigorous vine, early ripening, handsome clusters of grapes of superior quality.

Niagara—The vine is hardy and a remarkably strong grower; very large bunches, uniform and very compact; larger than Concord.

Concord—A universal favorite, vigorous and productive, large bunches, nearly black, moderately early, sweet.

PLUMS—Each, \$2.00; Dozen, \$22.00.

Bradshaw—Early. Purple. Very large, reliable.

ALL OUR PLANTS ARE STRONG AND WELL ROOTED, GROWN ESPECIALLY FOR OUR LARGE MAILING TRADE, and will be packed carefully and sent in good time, so order early. We can send plants by mail to Manitoba and British Columbia without any trouble, so please send us a trial order. Single plants, half dozen and dozens postpaid on receipt of price. Half-dozens furnished at dozen rates; fifty at hundred rates. Trees are sent per express only, and not prepaid.

NEW EVERBEARING STRAWBERRY "SUPERB".

There is practically not a day from June 1st to November 1st that one cannot pick big delicious berries from the Superb Ever-bearer. The foliage of this variety is large and gives an excellent protection beneath the foliage. The berries are not only large but very firm, good keepers and excellent shippers. Indeed, Superb is a big money-maker for growers who wish to produce for market. It also is an ideal berry for home use. **Dozen \$1.00, 100 for \$6.00, postpaid.**

STRAWBERRIES

Any of the following field-grown plants—Price, postpaid, dozen 50c, 25 for 80c, 50 for \$1.25, 100 for \$2.25. By express at buyer's expense, 100 for \$1.75.

Parson's Beauty—This great variety is especially adapted for climates as cold and colder than Ontario. One northern grower states that he has found this an ideal variety in every way. It is very productive. The berries are large, perfectly formed, and bright red, and of a mild and delicious flavor.

Kellogg's Prize—The late berry without a fault. Unquestionably the heaviest fruiting late variety ever originated; the berries are not only borne in great quantities but are very large and most beautiful, and their quality is ideal in every respect. It has no preference for any particular soil or climatic conditions, but produces its customary big load of berries wherever it is grown.

Williams, Improved—This wonderful variety continues, to grow in popularity. The reason for this is that it has proved more profitable uniformly than other sorts and succeeds almost anywhere strawberries can grow. Produces enormous crops of large, dark red firm berries.

Senator Dunlap—Plants very healthy, strong vigorous. Fruit is large, uniform, smooth and of excellent quality. It is firm and a splendid shipper.

Green Gage—Mid-season. Yellowish green, highest quality.

Lombard—Mid-season. Violet-red, large, reliable; very popular.

Reine Claud—Mid-season. Green marked with red on sunny side.

Burbank—Abundant yearly bearer, fruit large, roundish, dark red or purplish, flesh amber yellow, melting, juicy, with rich sugary flavor; stone small and free. Bears second year after planting.

CHERRIES—Each, \$2.00; Dozen, \$22.00.

Early Richmond—Bright red, very acid, extremely prolific.

Gov. Wood—Light red and amber, large excellent quality; reliable.

Montmorency—Light red, popular for pie making.

PEACHES—Each, \$1.15; Dozen, \$12.00.

Early Alberta—Golden yellow with deep blush. Fruit handsome, quality the best. Tree a strong grower, carrying moderate loads of fruit.

Crosby—The fruit is of medium size, bright orange yellow streaked with red, flesh yellow, mild pleasant flavor. Middle September.

Yellow St. John—Large, yellow, free-stone, skin orange yellow. with a deep red cheek; flesh juicy, sweet. Season middle of August.

Alexander—A very early peach, fruit of medium size, handsomely shaded, flesh melting, juicy, rich. One of the best. Middle of July.

Early Crawford—Fruit large, skin yellow with fine red cheek, yellow flesh, juicy and sweet. First of September.

PEARS—Each, \$2.00; Dozen, \$22.00.

Sheldon—Autumn. Russet, large, round, very juicy, high quality.

Anjou—High quality, juicy and melting. Autumn variety.

Bartlett—Summer, yellow; the most widely grown of all varieties.

Clapp's Favorite—Early summer. Large juicy, melting; prolific.

Kieffer—Very showy fruit, color red and yellow, early autumn variety.

APPLES—Each, \$1.50; Dozen, \$15.00.

Red Astrachan—Of extraordinary beauty, abundant bearer, an early bearer. Flesh white, crisp, juicy, with an agreeable acid flavor. Ripens July to middle August.

Fameuse (Snow Apple)—Fruit medium size. Color pale yellowish, light streaks of pale red, to a deep red in the sun. Fine and juicy.

Northern Spy—Delicious, fragrant and highly prized. One of the very longest keepers. Fruit large. Greenish yellow, striped with red.

Maiden's Blush—Ripens about the latter part of August and continues until late in October. A desirable apple for cooking, market or for drying.

Yellow Transparent—Fruit large, showy, pale yellow. Flesh delicate, sub-acid, good quality. July and August.

McIntosh Red—Originated in Canada. A good bearer, handsome fruit of excellent quality; flesh white, tender, juicy, sub-acid.

Rhode Island Greening—In much demand for dessert and cooking.

Talman Sweet—Pale yellow, tinged red; firm, rich, sweet. The most valuable apple for baking. November to April.

Wealthy—It will always sell well. Free grower, exceptionally hardy. Skin smooth, covered with dark red. Late fall variety.

Wolf River—Very large; beautiful red in the sun; strong grower and good bearer. Original tree in Wisconsin is 40 years old.

Duchess—The most profitable early variety, medium to large size, yellow streaked with red, sub-acid.

Delicious—Large dark red, flavor sweet, slightly acid, flesh crisp and juicy. Will keep till April.

NOTE:—All trees are sent per express at purchaser's expense.

TRY SUGAR BEETS THIS YEAR—THEY ARE SUPERIOR TO MANGELS FOR FEEDING

O-K SPRA

The Sprayer Built for the Man who Sprays

SPECIFICATIONS

PUMP—Brass tube cylinders, diameter 2 inches, stroke 12 inches. Top cap of tank attached to cylinder, a special rubber packed flange tightens with pressure. The locking and carrying clamp is of unique design. The cylinder valve is rubber and is very simple. The pump can be instantly removed, allowing a large opening, for filling the tank.

TANK—Made either of the best quality galvanized sheet steel, or sheet brass. The carrying strap is wide and easy on the shoulder. It has an adjusting buckle, so that it can be adjusted suitable to the operator. The diameter is 7 inches and height 21½ inches, with about 3½ gallons capacity. The tank should be about two-thirds filled.

HOSE—Made of a 20-inch section of ½-inch 4-ply, wire wrapped to prevent breaking at points with most friction.

LANCE—Galvanized ¼-inch pipe 2 feet long, curved at one end to enable the operator to spray at all angles, especially under the leaves. This lance also allows the operator to work at ease in an erect position.

PRICE: Galvanized Tank, \$7.50; Brass Tank, \$10.50.

O-K SPRA

LITTLE WONDER SPRAYER

Made extra strong and is heavily reinforced. You can lay it down without danger of spilling the contents of the can.

It is especially adapted to spraying any kind of Lice Killer into cracks and crevices of your poultry house or for spraying bushes, plants, shrubbery and potato vines. **Price 75c, postpaid 85c.**

FERTABS

PILLS FOR PLANTS.

(Registered under the Canadian Fertilizer Act, No. 2603)

FERTABS (Pills for Plants) are the most highly concentrated fertilizer produced.

FERTABS contain all the Special Nourishment necessary for plant life; the analysis alone will demonstrate their value.

Nitrogen.....	13 per cent.
Soluble Phosphates.....	34 per cent.
Potash.....	11 per cent.

All water soluble and immediately available.

NOTE—Nearly 60 per cent. of active soluble fertilizer.

FERTABS are suitable for all Garden Plants, Hot House Plants, Rose Trees, Vegetables and Seeds, and prolongs the life of cut flowers if one pill is dissolved in each vase.

FERTABS are easy, clean and economical to use. You fertilize as you plant and for all ordinary plants you only require one **FERTAB** per plant.

FERTABS are clean odorless pills entirely free from the objectionable features of manures and ordinary fertilizers.

There is no fear of unequal distribution of fertilizer if you use **FERTABS**. A **FERTAB** feeds the plant it is set near and you do not fertilize the waste ground between plants—consequently you have less weeds because this waste ground is not fertilized.

Fertilizing the **FERTAB** way means healthier, more prolific plants and no waste.

HOW TO USE FERTABS

Plant a **FERTAB** just below the surface of the soil, and about two inches from the plant—only one **Fertab** to each plant—per month. The above is sufficient for all garden plants, pot plants, window boxes, vegetables, etc.

For **Rose Trees, etc.**, use from 2 to 4 **FERTABS**.

For **Seeds**, dissolve one **FERTAB** to each quart of water, and apply every other day.

For **Cut Flowers**, place a **FERTAB** in each flower vase.

Size A—Enough for 500 Plants.....	\$1.50
Size B—Enough for 200 Plants.....	75c
Size C—Enough for 50 Plants.....	25c

Auto Spray No. 25

CONTINUOUS ATOMIZER

The Auto-Spray No. 25 operates continuously on both the up and down stroke and throws a fine misty spray.

Will handle all solutions, insecticides and disinfectants. Used in the greenhouse, kitchen, garden, window garden, for rose bushes and in the poultry house.

Two spray caps—one straight, the other at an angle for reaching under leaves or spraying directly down. Construction of tank permits the sprayer to be operated at any angle and it will not tip over when filling.

By a convenient arrangement the wooden plug that guides the handle can be taken out of the pump cylinder without removing any screws.

Auto-Spray No. 25-A—One quart, all tin: **Each \$1.50, postpaid \$1.75.**

Auto Spray No. 25-B—One quart, tin pump, galvanized tank: **Each \$1.65, postpaid \$1.90.**

Auto-Spray No. 25-C—One quart, tin pump, brass tank: **Each \$1.90, postpaid \$2.15.**

The Acme Insect Bellows

For use in dusting powder of any kind on plants or fowls and makes a saving of 25 per cent. on insect powder. There is no more need of any waste of powder by using this bellows. It is the handiest thing out.

Each 25c, postpaid.

This is not only a good weeder and scraper, but with its point becomes a good implement for thinning out where the plants are too thick, and for lightening the soil. The blade is solid steel, all tempered, 7-8 in. wide, and is sharp on all its edges. Capital for weeding, thinning, and stirring soil among onions, carrots, strawberries, etc. **Postpaid, 40c.**

By Mail
PREPAID

Japanese Palm Food

Manufactured Expressly for Palms, Rubber Plants and Ferns. **Guaranteed Analysis**—Nitrogen 2½ per cent.; Avail, phos Acid, 7 per cent.; Potash K 2 O, 3 per cent.

Made of material just suitable for these delicate classes of plant. Have you a palm, fern or rubber plant? Then you should have a package of Japanese Palm Food. A chemically prepared fertilizer that will make healthy plants and beautiful foliage. Can be used in a solution, top dressing for repotted plants. When used once a week for two or three weeks, you will notice it producing a green and more luxuriant growth. After the third application, it is not necessary to use it oftener than once in six weeks. **Price 35c, postpaid 45c.**

Makes Flowers Flourish

Flowers are like people. Their health depends upon their food. It must be nourishing, but not too rich to force growth and cause reaction. The one chemically correct flower food for house plants is

Walker's Excelsior Brand

It has no odor whatever, and can be used dry or dissolved in water for sprinkling. Use it and your flowers will flourish and their health will last.

Small size (feeds 25 plants 6 months), **25c**; large size (enough for a year), **50c**. Sent prepaid anywhere, for **30c** and **60c**.

INSECT DESTROYERS

For Spraying Trees, Potatoes, Plants, Vines, Etc.

Niagara Soluble Sulphur

Soluble Sulphur does all the work of Lime-Sulphur, and does it quicker and better.

Keeps any length of time anywhere. Does not freeze. Sticks like paint. Easy to mix. No clogging of nozzles.

Put up in tight cans of 100 pounds, 50's, 25's, 10's and smaller.

Soluble Sulphur has perfect control of San Jose Scale and all other scales. It is a stronger and better fungicide than Lime-Sulphur. It has given remarkable results in the control of Aphis, and many reports show that fruit sprayed with Soluble Sulphur had far better color.

With all the advantages of Soluble Sulphur, it costs no more than home boiled spray.

Price, lb. 40c, postpaid. By express or freight, 5 lbs. \$1.25, 10-lb. drum \$1.85, 25-lb. drum \$3.90, 50-lb. drum \$6.50. Special prices in larger quantities.

"Nico-Fume" Liquid

Is a highly refined solution of "free" nicotine, guaranteed under the National Insecticide Act to contain 40 per cent. of nicotine. For Spraying, one or two teaspoonfuls to the gallon of water furnish an effective remedy against Green Aphis and Thrips; and for Vaporizing, one-half ounce per 2,000 cubic feet furnishes a strong fumigation. "Nico-Fume" Liquid thus has the advantage of being employed both for spraying and for fumigating. The labels contain complete directions.

Quarter-lb. tin 90c, 1-lb. tin \$2.50, 4-lb. tin \$8.50, 8-lb. tin \$16.50. 

Hammond's Slug Shot

Death to the cut worm, potato bug, rose bugs, and all lice, worms and caterpillars, which destroy the young plants of melons, squash, cucumber, cabbage, egg plants, and all fruiting plants as currants gooseberry and the grape. It is considered an excellent fertilizer. It contains nothing injurious. Lb. 30, postpaid 45c. By express at purchaser's expense, 5 lbs. for 75c, 10 lbs. \$1.40.

Whale Oil Soap

Makes an excellent wash for trees and plants; kills insects and eggs on bark. Mix one-quarter pound in a gallon of water and spray on with a syringe or force pump. Lb. 35c, postpaid 50c, 5 lbs. by express \$1.50.

Sulpho Tobacco Soap

A WONDERFUL AND INEXPENSIVE INSECTICIDE.

Sulpho-Tobacco Soap is a powerful agent for the destruction of bugs and insects. One or two applications will rid plants of the pests. Full directions with each cake.

Three-ounce cake makes $1\frac{1}{2}$ gallons prepared solution: 15c. Mailed postpaid for 20c.

Eight-ounce cake makes 4 gallons prepared solution: 25c. Mailed postpaid, 35c.

Black Leaf 40

(Sulphate of Nicotine)

Highly recommended for destroying aphids, thrips, etc., without injury to foliage. Perfectly soluble in water; no clogging of nozzles.

For all kinds of Fruit Trees, Small Fruits, Grapes, Flowering and Ornamental Shrubs, Roses and all plants or trees which insects prey on. Being diluted at about 1 part to 400 of water makes this only trifling in cost and the results are wonderful.

Bottle 40c, $\frac{1}{2}$ -lb. cans \$1.35; 2 lbs. \$3.75, 10 lbs. \$15.50, per express not prepaid.

Arsenate of Lead Powder

Has all the advantages of the paste form but goes twice as far and is easier to handle. Can be applied like Paris Green with powder guns. Gaining in favor.

Lb. 75c, 5 lbs. \$3.00, postpaid; by express, 10 lbs. \$5.40, 25 lbs. \$11.75, 50 lbs. \$22.00, 100 lbs. \$40.00.

Dry Bordeaux Mixture

In a popular and convenient form for immediate use; can be used dry or with water. Lb. 60c, 5 lbs. \$2.50, postpaid.

Bordo-Arsenate

One of the best materials made for destroying potato bugs and a sure cure and preventative for blight. Lb. boxes 60c, postpaid 75c; 2 lbs. \$1.40, postpaid.

Pyrethrum Roseum or Persian Insect Powder

For destroying roaches, ants, fleas and all other noxious insects. Oz. 15c, $\frac{1}{4}$ -lb. 50c, 1 lb. \$1.50, postpaid.

Paris Green

Guaranteed strictly pure. Lb. 75c, postpaid. By express or freight at purchaser's expense; 5 lbs. or more at 65c per lb.

Hellebore

For destroying rose bugs, currant worms, etc.; very effective. Oz. 15c, $\frac{1}{4}$ -lb. 50c, lb. \$1.25, postpaid.

Copper Sulphate

Lb. 20c, postpaid 35c; 10 lbs. or over at 18c per lb., by express or freight at purchaser's expense.

FERTILIZERS

Bone Black—A complete Fertilizer. Especially adapted for truck gardeners and plant growers. It is manufactured from the best pure high-grade materials, and is very soluble.

Potato Manure—Contains all the elements required for an average yield, and at the same time supplies them in forms best suited to the potato crop.

Write for price on fertilizers, stating about how much you might use, also for what crops.

Dessicated Bone is a pure animal bone without adulteration, from which all the grease has been extracted by a patent process, leaving the resultant bone in a finely divided state.

Nitrate of Soda—Used by leading market gardeners to hasten growth of cabbage, cauliflower, tomatoes, etc. Its effects are astonishing. Wherever tried has been more extensively used. Try it for yourself. Lb. 25c, 5 lbs. \$1.40, postpaid; express or freight, 10 lbs. \$1.25, 25 lbs. \$2.25, 100 lbs. \$7.50.

A Real Maggot Remedy MAGOTITE

PROTECTS YOUR CROPS

against the ravages of the destructive Root Maggot, and other garden crops, making it possible to get fine crops of

RADISHES TURNIPS CABBAGE
ONIONS KALE CAULIFLOWER

Also eradicates Earth Worms from Lawns and Putting Greens. Easily applied and is not in any way injurious to plant life, but is a valuable stimulant and fertilizer.

In powder form, ready for use.

Approximate Quantity Required

A 2-lb. package for about 300 feet of drill, or for field culture 300 to 500 lbs. per acre.

"BUCO"

"BUCO" GARDEN CULTIVATOR

For Weeding, Cultivating, Potato Digging, etc.—Length of handle 4 feet 5 inches, weight 3 pounds. This new hand garden cultivator has five tines of crucible spring steel, oil tempered, which can be adjusted to desired width. They can be removed to sharpen in after years when dull, or can be replaced with new ones, if necessary. For special work one or more of the tines can be removed if desired. For preparing soil, planting, cultivating, etc., there is no hand tool made which can compare with it. It takes the weeds all out by the roots, cleans out the stones, loosens the soil thoroughly, and leaves it clean and smooth. All gardeners who have used it pronounce it indispensable and a great labor saver. **Price, \$1.50, by express or freight at the purchaser's expense.**

We disposed of an immense quantity of these last year, and every purchaser was delighted and many said it was worth \$5.00 to them.

Guaranteed
to sow 60
acres of clo-
ver per day.

Will sow
Clever,
Timothy
Flax,
Wheat,

BUCKEYE INCUBATORS

65 TO 600 CAPACITY

Every "Buckeye" We Sell is GUARANTEED to Hatch More Chicks and Better Chicks—and—
THEY NEVER COME BACK!

That's The Proof.

The name "Buckeye" represents "service"—and when we talk to you about Buckeye Incubators, we do not refer to the wood and metal of which the machine is constructed, but to the "service" we guarantee the incubator to give.

Over five hundred thousand satisfied users represent the proof that we offer in support of Buckeye superiority—little breeders, big breeders, beginners, experts—breeders that include every class from boys and girls with a little 60-egg machine—up to the tremendous poultry plants with capacities of 50,000 eggs and more—all uniting in the same verdict.

The entire Buckeye System is so simple that any boy or girl who can read intelligently can operate a BUCKEYE INCUBATOR just as satisfactorily as an experienced operator.

We positively GUARANTEE that no previous experience is necessary to operate a Buckeye. You simply follow our instructions and get a chick from every HATCHABLE egg that you put in the machine. There is so little for the operator of a BUCKEYE to do, that it can be told in a few words.

It's simply this—

YOU KEEP THE LAMP BURNING AND TURN THE EGGS TWICE A DAY.

That's positively all there is to do—and even the turning of the eggs is reduced to an operation that takes just about one minute for each trayful

POULTRY LEG BANDS

Why They Are Used

Different individuals use them for different purposes. One uses them to establish ownership and to enable him to distinguish his own birds from those of his neighbors; another uses them to keep tab on the age, breeding and laying qualities, etc., of individual birds in his flock; while others use them to identify individual birds both at home and in the show room.

LEADER

LEADER ADJUSTABLE

Latest and best adjustable leg band out. Has neat, compact and smooth fastening. Easily attached, absolutely secure and has no catching points. Will fit any breed.

Are made from heavy aluminum, strong and substantial and will hold their shape.

Over a quarter of a million were sold last year. We guarantee them to give satisfaction.

12 for 15c; 25 for 25c; 50 for 45c; and 100 for 80c.

NOTE—Orders are filled in rotation as received. We cannot ship on a certain date, but fill all orders in rotation as soon as possible.

Pap For Peeps

The Wonderful Baby Food for Baby Chicks.

EVERY YEAR thousands and thousands of Baby Chicks die when a week or ten days old. This is due chiefly to improper feeding. They are usually fed hard-boiled eggs and bread crumbs for a couple of days, and the food is then changed to hard cracked grain which they cannot fully digest. The undigested portion of the food acts as an irritant in the bowels, causing diarrhoea, which kills all but the sturdiest chicks.

A newly-hatched chick is just a wee baby and it needs Baby Food until its digestive system has developed sufficiently to handle coarser food.

PAP FOR PEEPS, the wonderful Baby Food for Baby Chicks, is a perfectly balanced ration that supplies every ingredient they need from the time they are forty-eight hours old, when they begin to require food until ten days to two weeks old.

It is composed of a mixture of selected grains which are steam-cooked and mechanically predigested; finely-ground meat which all little chicks require; and lime to build strong bones and avoid leg weakness. There is also included a digestive to aid digestion and assimilation, and an alternative for the bowels which prevents diarrhoea and saves the weak chicks.

Thousands of Baby Chicks have been started on this crumbly, balanced mash during the last five years. They eat it greedily and grow faster than if fed in any other way.

PAP FOR PEEPS really costs nothing because the value of the chicks saved more than equals the cost of the food. Start your chicks on **PAP FOR PEEPS** and you'll raise the heartiest chicks and the largest flocks you ever had.

Price: Bag, 35c; Bag, 70c; Bag, \$1.40; 50 lbs., \$3.75; 100 lbs., \$7.00. These prices are here, not postpaid.

WE HAVE WHAT YOU WANT, WHEN YOU WANT IT.

BEE KEEPERS' SUPPLIES

All goods now offered are made of the best material money can purchase, and put together by first-class workmen.
Quality counts in the end, and if you purchase cheap Bee Supplies you will be given no end of trouble and disappointment.
Buy the best, it will pay you.

LANGSTROTH HIVES

Our Hives and their furniture are made from selected well-seasoned material in white pine and cypress lumber and are carefully and accurately constructed by competent workmen.

We stock the Langstroth style of Hive only, and in the Eight and Ten frame sizes and with dove-tailed corners.

The Langstroth Hive is the recognized standard throughout Canada and we invariably advise beginners to adhere to this standard. Besides other reasons it will often save them much difficulty in procuring hive parts and fixtures.

The style of frames and fixtures for the Eight and Ten frame sizes are identical, the difference being in the width of the hive and supers and the number of frames required.

No. 1—Is a one-story hive. Price, in flat, 8-framed, each \$3.50, 5 for \$14.75; 10-framed, each \$4.00, 5 for \$16.50.

No. 2—Is a one and a half story hive for comb honey. Price, in flat, 8-framed, each \$4.80, 5 for \$20.00; 10-framed, each \$5.65, 5 for \$23.00.

No. 3—Is a two-story hive for extracting. It includes a bottom board and cover, two bodies with thick top-bar Hoffman frames and two division boards. Price, in flat, 8-framed, each \$5.50, 5 for \$23.00; 10-framed, each \$5.75, 5 for \$24.75.

SUPERS—FOR COMB OR EXTRACTED HONEY

Super B—For comb honey, includes super, separators, section-holders and followers. Price, in flat, 8-framed, each \$1.40, 5 for \$5.50; 10-framed, each \$1.70, 5 for \$6.60.

Super E—For extracting honey. It may also be used as the body of the hive. Price, in flat, 8-framed, each \$2.00, 5 for \$8.75; 10-framed, each \$2.20, 5 for \$9.00.

Super D—Is a shallow super for extracted honey, 5½ inches in depth with a light top bar grooved for comb foundation. 8-framed, each \$1.65, 5 for \$6.25; 10-framed, each \$1.75, 5 for \$7.00.

BROOD FRAMES

Self-spacing Hoffman, with thick top bars. Doz. \$1.25, 25 for \$2.30, 50 for \$4.00, 100 for \$7.50.

Shallow Extracting. Doz. \$1.00, 25 for \$1.75, 50 for \$3.25, 100 for \$6.00.

SECTION HONEY BOXES

Our sales of sections the past season have been very large, owing in a large measure, to the excellence of our goods. We handle nothing but first-class, 4¼x4¼x1½, slotted on top and bottom. Split top, 100 for \$1.50, 250 for \$3.30; 500 for \$6.00, 1000 for \$11.75.

QUEEN OR DRONE TRAPS

The Alley—It is placed over the entrance of the hive, the queen being captured, and thus preventing a swarm, from absconding. 8-framed, each 70c, postpaid 85c; 10-framed, 80c, postpaid 90c.

PORTER BEE ESCAPE

It is not an untried thing, but something that has given the best of satisfaction. Each 25c, doz. \$2.50, postpaid; with boards, 8 or 10-framed, by express or freight, each 60c.

PERFORATED METAL

This is used between the upper and lower stories to prevent the queens from going up above. It is also used in entrance guards, drone traps, etc. Per square foot, 30c. Sheet 20x84 inches will cut 6 excluders for the 8-framed, or 5 for 10-framed. Per sheet, \$2.75.

NOTE—Price of metal subject to change without notice.

COMB FOUNDATION

BROOD FOUNDATION—For Langstroth Frames, 8 sheets to pound. Per lb., 80c; 5 lbs., 78c per lb.; 10 lbs., at 75c per lb. If wanted by mail, add 15c per lb.

SECTION FOUNDATION—If you use full size of section, one sheet will cut into four. The weight is 28 sheets to pound. Per lb., 85c; 5 lbs., at 83c per lb.; 10 lbs., at 82c per lb. If wanted by mail, add 15c per lb.

NOTE—Price of Foundation subject to change without notice.

SMOKERS

Easy, quick-responding bellows giving a good blast, and no valves to get out of order. Pressed iron attachments, a large fire pot, and bent hinged nozzle.

No. 1 Hinged Smoker, 4 in. barrel.....Each, \$1.90, Postage 25c.
No. 2 Hinged Smoker, 3½ in. barrel.....Each, \$1.70, Postage 25c.
No. 3 Straight Nozzle, 2½ in. barrel.....Each, \$1.25, Postage 20c.

RUBBER GLOVES

We have a nice line of imported, long-sleeved rubber gloves.
Ladies' sizes, No. 7, 8 and 9.....Per pair, \$2.25
Gentlemen's sizes, No. 10, 11 and 12.....Per pair, \$2.40
Gentlemen's extra large sizes, No. 13 and 14.....Per pair, \$3.25

BEE VEILS

There is nothing like a good, comfortable Bee Veil, especially if one fears stings about the face. A good veil gives one confidence in handling bees. Leno—Brussels 55c, Postage 5c.

UNCAPPING KNIVES

The Bingham Knife (American)—This is a broad flat knife bevelled at the edges only. 10-inch blade. Each \$1.85, postage 15c.

HONEY EXTRACTORS

Honey Extractor

Best material, strongly made and easily operated. Write for prices.

No. 1—I.X.L.—Two baskets, Langstroth, size 9x18, \$16.00.

No. 2—I.X.L.—Two baskets, Jones, size 12x18, \$17.00.

No. 3—I.X.L.—Four baskets, Langstroth, size 9½x18, \$19.50.

No. 4—I.X.L.—Four baskets, Jones size 12x18, \$21.00.

Note—The Jones, or 12x18, will also do for the Langstroth or 9½x18. Also Automatic Reversible Extractors, 4 or 6 baskets, Jones or Langstroth sizes. Prices on application.

QUEEN EXCLUDERS

These are used to confine the queen to the brood chamber, especially necessary in the production of extracted honey. Owing to

the unsettled condition of the zinc market, these prices are quoted subject to change without notice.

Woundbound zinc, 14x20, 8 fr.....60c each
Woundbound zinc, 16x20, 10 fr.....65c each
Unbound zinc, 14x20, 8 fr.....45c each
Unbound zinc, 16x20, 10 fr.....50c each

WIRE QUEEN EXCLUDER

An all-wire Queen Excluder we believe will ultimately supersede the perforated zinc altogether. The strands of wire run lengthways of the excluder, are accurately spaced for bee passages and moulded perfectly rigid by small seams of metal. Highly recommended at the recent Ontario Bee Keepers' Convention. Price, 8-frame, 70c; 10-frame, 80c.

BEE BRUSHES

Highly recommended. Made of hair and with a long handle, giving a soft sweep the full width of the comb. 45c, postage 10c.

SECTION HOLDERS

Slotted—Slotted section holders are used with slotted section. Each 7c, 25 for \$1.50, 100 \$5.25.

SEPARATORS

Slotted—Slotted separators are used with slotted section holders. 25 for 75c, 50 for \$1.40, 100 for \$2.60.

WIRE, Tinned

No. 30—The most suitable of any for wiring frames. ¼-lb. spool, each 20c; ½-lb. spool, each 30c; 1 lb. spool, each 50c; postage, 5, 10 and 15c extra.

HONEY CANS

Owing to fluctuation in prices of sheet tin, we cannot quote definitely for this season. Write for prices.

60-lb. Cans—The 60-lb. package still continues to be in large demand, though the smaller packages are increasing year by year. For safety, neatness and convenience, the Round Veneer Jacketed Can cannot be excelled.

Plain or Lithographed—The lever-covered can is the only really safe package for shipping liquid honey, is preferred on account of its convenience for removal, and also being less liable to get out of order in use.

5-lb. and 10-lb. Pails.

WE BUY BEES-WAX.

SEND US YOUR ORDER EARLY, SPRING WILL SOON BE HERE.

A LIST OF VALUABLE BOOKS

FOR GARDENERS AND FLORISTS, FARMERS AND OTHERS

A B C and X Y Z of Bee Culture—By A. L. Root. A complete work on the honey bee. Price, 50c.

Alfalfa—By F. D. Coburn. Its growth, uses and feeding value. Price, 80c.

Asparagus—By F. M. Hexamer. For home use, well as for market. 174 pages, 5x7 inches. Cloth, 80c.

Cabbages, Cauliflowers—By C. L. Allen. Cultivation and general management. Insects and fungi. Illustrated; 126 pages; cloth. Postpaid, 80c.

Celery Culture—By W. R. Beatty. From early plants to the handling and marketing of celery in carload lots. Price, 80c.

Early Vegetables—How to grow them. Price, 40c, postpaid.

Fruit Growing—A concise manual giving instructions for the management of every important fruit in cultivation. Postpaid, 60c.

Gardening for Profit—By Peter Henderson. The standard work on market and family gardening. The successful experience of the author for more than thirty years, and his willingness to tell, as he does in this work, the secret of his success for the benefit of others, enables him to give most valuable information. The book is profusely illustrated. 376 pages. 5x7 inches. Cloth, \$2.00.

The Window Flower Garden—By Julius J. Heinrich. The author is a practical florist, and this enterprising volume embodies his personal experience in window gardening during a long period. Illustrated. 123 pages. 5x7 inches. Cloth, 80c.

Mushrooms, How to Grow Them—By Falconer. \$1.50.

Poultry Feeding and Fattening—By G. B. Fiske. Chickens, broilers, capons, turkeys, water fowls; how to feed. 160 pages. 5x7 1/2 inches. Cloth. Price, 80c.

Poultry Appliances and Handicraft—By G. E. Fiske. Over 100 illustrations, 5x7 inches. Cloth. Price, 80c.

Perpetual Carnations—The cultivation of these beautiful flowers is fully discussed, and hints are given for retaining the best blooms. Price, 40c.

Practical Chrysanthemum Culture—Dealing with every important point in the culture for show, flower gardens, and green houses. Price, each, 40c.

Profitable Small Fruits—The value of small fruits, cultivation, diseases and insects. Price, 40c.

Small Fruit Culturist—By Andrew S. Fuller. Their culture, varieties, packing for market, etc., 298 pages, 5x7 inches. Cloth. Price, \$1.50.

Spraying Crops—Why, When and How?—This is a book that anyone with fruit should not fail to get. 75c.

Sweet Peas and How to Grow Them—This work tells how to grow Sweet Peas for home and exhibition. Price, 50c.

Parsons on The Rose—By Samuel B. Parson. A treatise on the propagation, culture and history of the rose. A simple gardening classification has been adopted and the leading varieties under each class enumerated and described. Illustrated. 211 pages. 5x7 inches. Cloth. \$1.50.

Strawberry Culturist—By Andrew F. Fuller. Containing all information necessary to enable everybody to raise their own strawberries. Fully illustrated. Price, postpaid, 40c.

The Beginners' Gardening Book—General information on the flower gardening, amateur greenhouse, vegetable and fruit, insects and how to destroy them. Price, 40c.

The New Egg Farm—By H. H. Stoddard. The management of poultry in large numbers. Illustrated. Cloth. Price, \$1.50.

The Carnation Book—The reader is told various ways of growing carnations to the best possible advantage. Price, 50c.

Tobacco Culture—Full, practical details by fourteen experienced tobacco growers. Price, 45c.

Tomatoes and Salads—The tomato preparation of salads, and what to use. Price, 40c.

Tomato Culture—By Will W. Tracey. Practical experience of the best posted expert on tomatoes in the world. 150 pages; cloth. Postpaid, 80c.

The New Onion Culture—By T. Griener. Onions of larger size and yield on less land than can be raised by the old plan. 140 pages. Postpaid, 80c.

Vegetable Growing for Amateurs—A profusely illustrated book, which deals in a simple and practical manner with the cultivation of all commonly grown vegetables. 150 pages. 45c postpaid.

THE FIRST AID FARM VETERINARIAN

For The Farmer or Owner of Live Stock.

The purpose of this book is to assist him in the timely recognition and prevention of ailments peculiar to live stock. Also to provide a convenient reference as to the various Breeds of Live Stock and their characteristics and through its ninety or more illustrations to enable him to become familiar with the best types produced of each breed. It is a veritable Short-Course of Useful Information about Live Stock, a subject in which the farmer is very vitally interested.

It has been compiled by an authority whose opinions are highly respected and the wording and arrangement is pleasingly prepared. For the farmer, it is a booklet that will be carefully preserved and appreciated for years.

WHAT THIS BOOK CONTAINS.

48 pages and cover—7x10 inches.

70 Ailments of Live Stock described, with Suggestions for Treatment, by S. H. Ward, Veterinary Surgeon, Sec.-Treas. of United States Live Stock Sanitary Association, State Veterinarian of Minnesota for fifteen years.

98 Illustrations of famous Types of Live Stock, etc.

1 Full Colored Anatomical Chart of Cattle, Sheep, Swine and Horses.

5 Breeding Tables and Records for Live Stock.

3 Diagrams in Detail—Telling Age by Teeth.

4 Miscellaneous Diagrams—Buildings, etc.

3,430 Square Inches of data of exceptional interest to Farmers and all Owners of Live Stock.

Information and Data as to Origin, Characteristics and Production of Various Breeds of Live Stock.

All of a Genuinely Practical Value to the Farmer or Stock Owner. Price, 50c postpaid.

NOTE—We can get you any book, you want on any subject—Let us know your wants.

CUCUMBER

Early Fortune

In color Early Fortune is a rich, attractive deep green. This inviting color it retains during a much longer period of growth than any other variety, it is so regular in form, one so much like the other, growers marvel at the purity and trueness of our stock--in fact these Cucumbers are so perfect it is almost impossible to say which is best.

The quality is superb, flavor delicate, refreshing and delightful, entirely free from any bitterness, being fine grained, the flesh compact, it is exceedingly crisp and brittle, making it an ideal slicing cucumber.

As a shipping Cucumber "Early Fortune" cannot be surpassed as it holds up in color and quality longer and better than any other variety.
